**Crop production**

85 000 families

**Livestock support**

29 896 families

- **Prioritized FAO interventions:**
  - ❖ ensure planting where conditions permit through provision of crop seeds and fertilizer, and repair of vital infrastructure through cash-for-work schemes.
  - ❖ keep livestock alive, productive and healthy by distributing animal feed, fodder seed and veterinary supplies.
- **Funds and inputs must be secured now to prepare for *Kharif* (spring) planting**, which include staple foods such as rice, as well as fodder crops and summer vegetables.
- **FAO is well positioned to ensure effective, well-targeted assistance**, stemming from its extensive response to the 2010 floods and related preparedness work – from contingency planning to detailed livelihood assessments.

**BACKGROUND**

- **Heavy monsoon rains** beginning in mid-August led to severe flooding in Sindh and Balochistan provinces of southern Pakistan, where 70 percent of people depend on agriculture for their livelihood.
- **Around 10 percent of the flood-affected area remains inundated.**
- **The floods left 3 million people in urgent need of agricultural support** to resume farming activities – their main source of food and income. Around 35 percent of the affected population was also struck by floods in 2010.
- **Pakistan Floods Rapid Response Plan 2011:** launched 18 September to meet immediate needs in the food security, WASH, health and shelter sectors. FAO appealed for USD 18.9 million within the Plan and is co-leading the Food Security Cluster with the World Food Programme (WFP).

**Flood damage/losses**

- **Affected population:** 5.1 million (Sindh, Balochistan)
- **Standing crops:** 0.88 million ha damaged/destroyed – e.g. cotton, rice, sugarcane, sorghum, pulses, vegetables (Sindh)
- **Livestock:** 116 000 dead; 5 million affected; 33% killed/sold (Sindh)
- **Irrigation:** 20 400 structures submerged (Sindh)

*Sources: PDMA, Departments of Agriculture and Livestock Extension (Sindh, Balochistan), MSNA*

**CHALLENGES FACING AGRICULTURE**

- ❖ **Standing crops, stored seed/grain and productive assets were lost, leaving the population food insecure and unable to resume crop production.** Depending on the crop, 63-100 percent of the expected 2011 *Kharif* (spring) production was lost in affected areas.
- ❖ **Meeting planting deadlines is critical to recovery and cannot be underestimated.**

**Rabi planting (Oct.– Dec.)**

Many affected farmers missed the opportunity to plant wheat due to water recession rates and lack of rapid funds.

**Zaid Rabi planting (Jan. – Feb.)**

Farmers required inputs to cultivate *Zaid Rabi* crops (e.g. sunflower, vegetables, pulses) particularly where *Rabi* planting was not possible.

**Kharif planting (Mar. – Apr.)**

Funds and inputs must be secured now to ensure that farmers can plant *Kharif* crops, including rice and vegetables.

- ❖ **Livestock are vital to livelihood recovery.** Livestock, primarily managed by women, provide a vital source of meat, milk, income and draught/tillage power, and often represent a family's entire savings.
- ❖ **Recurrent floods demonstrate the need for consistent levels of funding for disaster mitigation activities.**

## FAO PRIORITY INTERVENTIONS: USD 18.9 million

- **FAO appealed for USD 18.9 million**, within the 2011 Pakistan Floods Rapid Response Plan, to provide time-critical support to save, protect and restore agricultural livelihoods (total Food Security Cluster requirements: USD 174 million).
- **FAO has received USD 13.3 million** in contributions from Australia, Belgium, Canada, CERF, Sweden and the United Kingdom.

### Emergency assistance to support agriculture-based livelihoods of vulnerable flood-affected households in Sindh

OCHA code	Objective	Funding	
		Requested	Received
<b>PAK-FL-11/A/43136/123</b>	To provide immediate livelihoods support to ensure livestock survival and immediate resumption of agricultural activities.	USD 18 900 000	70.4%

## FAO IN ACTION

Australian Government  
Aid Program

Canadian International  
Development  
Agency

### FAO's assistance to flood-affected families in Sindh and Balochistan provinces includes approximately:

- **85 000 households** (535 500 people): receiving wheat, vegetable and sunflower seeds and fertilizers for the winter (*Rabi* and *Zaid Rabi*) planting seasons.
- **29 896 households** (188 345 people): receiving animal feed and veterinary supplies to safeguard livestock survival.

Input	Total quantity	Delivered as of 23/01/12	Unit
Wheat seed	1 325	1 325	tonnes
Sunflower	117	109	tonnes
Urea fertilizer	4 250	4 250	tonnes
DAP fertilizer	4 250	3 805	tonnes
Vegetable seeds	20	20	tonnes
Animal feed	522	522	tonnes
Wheat straw	5 619	5 619	tonnes
Dewormer	23 200	23 200	tablets

## SPENDING TO SAVE

It is around 90% less expensive to save a large animal – such as a cow or buffalo – than to replace it.

FAO's 2010 wheat seed and fertilizer distribution to farmers cost only 30% of the total value of the wheat grain harvested from that intervention.

Cash-for-work provides much needed income to affected families and gives them choice, while rebuilding community-based assets.

## MOVING FORWARD AND BUILDING ON PAST EXPERIENCE

**FAO's 2010 flood response** reached 7 million people (900 000 families) with winter and spring planting inputs, livestock support and irrigation repair.

**Preparedness:** worked with government/sectoral partners to develop contingency plans; completed a post-flood Detailed Livelihoods Assessment in 28 districts; flood modeling and mapping in collaboration with Pakistan Space and Upper Atmosphere Research Commission; preparation of district level Hazard, Livelihood and Vulnerability Baseline, Contingency Plans and *Rabi* Season Guidelines.

**Presence:** FAO has strengthened its presence and partnerships in Pakistan, with a national office in Islamabad and provincial coordination offices in Peshawar (Khyber Pakhtunkhwa), Multan (Punjab), Hyderabad (southern Sindh) and Sukkur (northern Sindh), with presence in Quetta (Balochistan).
