<b>Objective:</b>	To improve staple crop production (cereals and pulses), protect livestock assets, and increase vegetable production for household consumption and income generation.
<b>Project partners:</b>	State and Federal Ministries of Agriculture and Forestry and of Animal Resources, and local and international NGOs.
<b>Beneficiaries reached:</b>	14 930 households (10 000 through crop production and 4 930 through vaccination and treatment of their livestock).
<b>Activities implemented:</b>	<ul style="list-style-type: none"><li>▪ 75 tonnes of cereal and legume seeds provided to 10 000 households.</li><li>▪ 58 000 animals belonging to 2 900 livestock owners vaccinated against common livestock diseases.</li><li>▪ 10 000 animals belonging to 2 000 households treated for disease and infection.</li><li>▪ 20 agricultural para-extension workers trained in crop production techniques.</li><li>▪ 30 community animal health workers (CAHWs) received refresher training.</li><li>▪ 50 women trained in vegetable production and processing.</li></ul>
<b>Results:</b>	<ul style="list-style-type: none"><li>▪ Beneficiary farmers produced 1 315 tonnes of cereals and legumes with an estimated market value of USD 912 132.</li><li>▪ Number of cases of contagious animal diseases reduced, along with a drop in the loss of livestock from epidemic diseases.</li><li>▪ Refresher training of CAHWs afforded communities in 23 villages access to veterinary services.</li><li>▪ The training of 20 para-extension workers significantly contributed to improving the knowledge and skills of a considerable number of farmers in their localities.</li></ul>
