

EuFMD e-Learning Resources

Available for countries in South East Asia

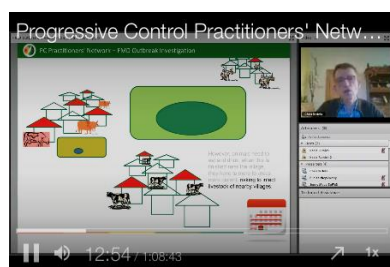

Introduction to the Progressive Control Pathway

Self directed e-learning course

This course introduces the **Progressive Control Pathway** for FMD Control (PCP). It has six modules which aim to answer common questions related to the PCP, from why is FMD control challenging, to what activities are involved in the PCP, how is a country's PCP stage assessed or what is my role in FMD control? The course is suitable for all of those with an interest in FMD control in countries that are not free of the disease, from decision makers to field veterinarians.

Time required: 6 hours

Progressive Control Practitioners' Network

Connect to a global network of colleagues working on FMD control, and take advantage of bite-sized training

The Progressive Control Practitioners' network is a new EuFMD network for those who are actively working to improve FMD control through the Progressive Control Pathway. The network aims to help you to:

- Connect to colleagues worldwide working on similar issues;
- Present your work and activities to others;
- Learn from the experience of other countries and colleagues;
- Access interactive, practical training on topics which relate directly to your work, from internationally recognized experts.
