

An outbreak of FMD in Egypt in 2012

REHAB ABDELKADER SAYED ELBASSAL

**CENTRAL ADMINISTRATION OF PREVENTIVE
MEDICINE –GOVS-EGYPT**

Who should be interested (stakeholders)

- **Veterinary services authorities**
- **Producers**

Significant of what we found

- We are endemic now by A,O,SAT2 FMD strains and we need to move forward in strong steps to control the disease and reduce its impact in our animal population.
- modified procedures have been put in place in response to these tree endemic serotypes and retained to improve FMD surveillance and response in the long -term
