In the table above, all records are shown for all regions / countries, including women, men and others as owners. Others refer to those without valid ID number and there are a lot of them in almost every country. In the table bellow, there are total numbers of female and male owners per each country, as well as total number of female and male together. The difference between total Female + Male number and Total records number from the table above is actually the number of “others” (those without ID numbers), calculated per each country and summarized.
