#### The Reform of Curriculum at the Department for Geodesy and Geoinformatics of Belgrade University

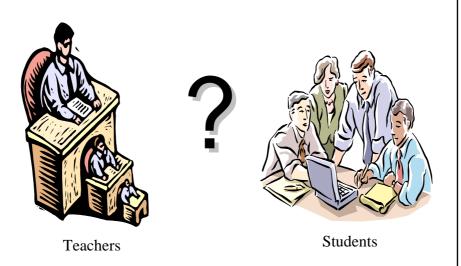

Stevan Marosan

Prague 2006

### What is University

- University is traditional institution which originates from the Church
- University was not made for the current world
- There are two interested groups on university: teachers and students

### Do we have the same goals

### Where is the Science

- For a long time science does not exist on University.
- The biggest part of scientific work is out of university in civil industry, military, non government, business and other institutions (FAO...)

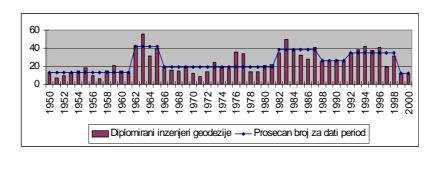

### Values of New University

- A democratic attitude
- Critical thinking
- Academic integrity
- Ethnic and social diversity
- Proactive action against discrimination
- Strong humanism
- A creative academic environment

## Structure of old studies at Geodesy Department

	Duration	Title-Serbian	Title-English
Basic studies	5	Dipl.ing.geod	BSc.
Master Science studies	2	Magistar geod.	MSc.
Science doctor studies	2-3	Dr.ing.geod.	Ph.D.

# Number of Geodesy graduated engineers in Serbia from 1950 to 2000.

## The Profile of Future Education of Geodetic Experts

- Geodetic engineer with technical knowledge
- Geodetic engineer with land management skills
- Geodetic engineer with the knowledge of economy-finance

Engineering + Law + Economics

## Structure of new studies at Geodesy Department

First generation of students started their learning process since October last year (2005).

	Duration	Title-Serbian	Title-English
Basic studies	3	Ing.geod	BSc.
Master Science studies	2	Magistar geod.	MSc.
Science doctor studies	2	Dr.ing.geod.	Ph.D.

# Current labour market in Serbia

- Very prosperous labour market
- Increased employment in private companies (real estate management companies and others)
- Difficulties for employers outside main urban regions
- New challenges for the RGZ (Governmental Geodetic Authority)

Transformation of cadastre maps in digital form Real estate cadastre (Unique registry) development Privatisation and corporisation of public departments

## The future (10-15 years)

- Increased retirement of public servants in land administration
- RGZ needs a yearly input of 40- MSc in Surveying and Land Management
- Increased employment in municipalities (GIS, Data base, land administration)
- Land Consolidation avalanche
- Continued emphasis on the private market
