

Session 3: Animal movement control

Group exercise

Country X
LSD not free
FMD not free

Country Y
LSD not free
with
vaccination

Country Z
LSD free
No vaccination

The scenario

- **Country Y** affected by LSD in previous year.
- Total stamping out, movement restrictions and vaccination was applied as control measures.
- In May a farmer has requested to move his cattle 50 km to summer grazing pastures. All animals from the herd were vaccinated before 1 year and two months except three calves at the age of 5 months. Animals should return to the farm in October.

Please discuss what are the possible actions from the veterinary authorities?

- Not allow movement? Reasons?
- Allow movement? Conditions?

The scenario

- **Country Z** free from LSD without vaccination neighboring to **country Y** (LSD affected with vaccination)
- Regional veterinary department in **country Z** was notified by the police about truck (registration country Z but not approved for animal transportation) with 15 cattle stopped in country Z 20 km from the border.
- Animals were not identified and not accompanied by veterinary movement certificate.

Please discuss what are the possible actions from the veterinary authorities?

Group 3

5

The scenario

- Two trucks with 28 cattle each travel from **country Z** (LSD free without vaccination) to **country X** (LSD and FMD not free) transit through **country Y** (LSD not free with vaccination), accompanied by vet. certificate.
- The trucks stop at control post (staging point) in **country Y** (LSD not free with vaccination) for rest.
- Trucks exit through the exit point of **country Y** but are stopped at the BIP of **country X** and not allowed to move on.

Please discuss what are the possible actions from the veterinary authorities of **country Y**?

Group 4

6

The scenario

- Animal collection center in **country Y** (LSD not free with vaccination) collecting animals from different parts of the country for export to **country X** allowed on bilateral agreements
- During the veterinary control before departure of animals it was found out that 10 animals introduced 10 days ago in the collection center where not identified and certificate for their animal health status was not available. In the center there are additionally 200 cattle.

Please discuss what are the possible actions from the veterinary authorities of **country Y**?
