

## Session 6: Stamping out Group exercise

### Group 1

2

#### The scenario

- Country recently affected by LSD
- Intensified Industrialized cattle farm with 200 high quality milking cows!
- All cattle have been recently vaccinated against LSD
- 3 days after vaccination LSD clinical signs were observed in 3 animals.  
Adverse reactions have been ruled out. Diagnosis was pos. for LSDV

#### What are the possible actions from the veterinary authorities ?

## Group 2

3

### The scenario

- Country recently affected by LSD
- Vaccination has been planned but vaccine can be available in a month.
- LSD confirmed in backyard with 5 cows (1 cow with clinical signs) in a village 20 km from affected area.
- In the village there are other 20 backyards with from 1 to 10 cows sharing different pastures

### Please discuss what are the possible actions from the veterinary authorities?

Stamping out? Compensation?

Biosecurity? Disinfection? Vector control?

Methods used?

Awareness?

Lumpy skin disease prevention, control, and awareness works

## Group 3

### The scenario

- Country not free from LSD with vaccination practice.
- Vaccination coverage – 60 %
- Cattle herd 143 animals on summer pastures high in the mountains far away from public roads and other animals
- 100 cattle vaccinated against LSD before 1 year and two months
- 43 calves over 4 months of age have never been vaccinated against LSD
- Generalize skin nodules detected in 7 calves and 3 days later LSD was confirmed by lab.
- The herd has not any connection with other herds. Animals were supposed to come back from pastures in the autumn.

### Please discuss what are the possible actions and tools?

- Standstill/ Partial or total stamping out/ Disposal/vaccination/vector control /
- What methods are you going to use

Lumpy skin disease prevention, control, and awareness workshop

Budapest, Hungary, 7-9 March 2017

## Group 4

### The scenario

- Country free from LSD without vaccination practice
- LSD Clinical signs detected in two cows at **animal market**.  
Movement ban imposed immediately of all animals at the market
- The two animals belong to a group of 7 animals of one trader.
- LSD was confirmed early next morning!
- At the market there were other:
  - 200 cattle of 5 traders,
  - 50 sheep of 5 traders
  - 5 donkeys of one trader
