

Regional Workshop

Consolidating School Food and Nutrition Approaches in Europe and Central Asia

Minsk, Republic of Belarus
11–13 December 2019

Annotated Agenda

The Food and Agriculture Organization (FAO) is organizing a Regional Workshop “*Consolidating School Food and Nutrition Approaches in Europe and Central Asia*” under the FAO project “[Developing Capacity for Strengthening Food Security and Nutrition in Selected Countries of the Caucasus and Central Asia](#)”, which is funded by the Russian Federation.

The aim of this Regional Workshop is to contribute to the production of a conceptual approach, a broad framework, to guide the implementation of School Food and Nutrition approaches in the region as a whole. Based on current country experiences, the workshop will discuss innovative ideas and future directions (targets) for governments, development partners and donor agencies in the region to support the progress of school food and nutrition approaches. The framework will identify realistic actions that could be implemented within 3 to 5 years at countries level. This will serve to guide FAO and Donor interventions for countries in the region. The backbone of the resulting framework will be how to increase the institutional, social, economic and environmental sustainability of the school food and nutrition programmes.

The main objectives of the Regional Workshop are to:

- Share experiences of implementation of various school food and nutrition approaches through highlighting the main obstacles and the enabling environment in the region for an efficient implementation.
- Exchange lessons learned and make recommendations to increase the sustainability of school food and nutrition approaches in the region.
- Illustrate good practices of linking the school feeding programmes with local economic development: agriculture, sustainable value chains, social protection, education, trade, and sustainable food systems.

This workshop will follow the FAO approach for school food and nutrition that is based on four elements: i) enabling policy, legal and institutional environment; ii) food and nutrition education; iii) healthy food environment and school food; and iv) inclusive procurement and value chains. An additional element of coordination government, civil society and private sector is added.

Regional Workshop: Consolidating School Food and Nutrition Approaches in Europe and Central Asia

The workshop will consist of the following:

- Keynote presentations on country experiences in the thematic areas of the workshop.
- Working groups and panel of experts to compile lessons learned and to produce recommendations.
- School and school meals production unit visits with practical examples of good practices.
- Plenary discussion moderated by rapporteurs to present the conclusions.

Expected deliverables at the end and after the workshop:

- Participants will share their views and recommendations during the panel discussions and the working groups, and present good practices from their countries.
- The outputs of the working groups will be summarized, analysed and included into the regional workshop proceedings.
- Draft recommendations for a framework for effective multisectoral, cross-ministerial and inter-regional cooperation in the field of school food and nutrition will be presented by the end of the third day.
- The workshop proceedings / detailed report of discussions and lessons learned will be shared with the participants in January 2020. All information will be posted on the FAO project's webpage: <http://www.fao.org/in-action/fsn-caucasus-asia/en/>
- The final framework for recommended actions that could be implemented within 3 to 5 years in countries of the region will be shared by March 2020. This document will be based on the results of the project's pilots, the regional workshop, the regional and country policy research papers, the countries case studies and the regional consultations.

This regional workshop will host around 85 practitioners and decision makers from the region, including representatives from governments/line ministries and national experts in nutrition, food security, agriculture, food safety and social protection. The participants represent local/municipality authorities, schools, NGOs, private sector, parents associations, UN organizations such as UNICEF, WHO and WFP, other international organizations and regional initiatives. A few participants are invited from outside the Eurasian region to share their experiences and good practices in the development and implementation of the school food and nutrition programmes.

This three-day regional workshop will take place from 11 to 13 December 2019 in Minsk, Republic of Belarus. The venue is held at the Beijing Hotel.

Market place: participants can bring and share relevant dissemination materials and publications in both hard copies and electronic form. A special place is organized for this display.

Russian Federation Funding

FAO-Russian cooperation comprises support to a wide array of development initiatives in the region and around the world as well as FAO assistance within the Russian Federation. FAO's Project "Developing Capacity for Strengthening Food Security and Nutrition in Selected Countries of the Caucasus and Central Asia" (funded by the Russian Federation), is timely to strategically mediate the challenges in the region and promote cross-sectoral collaboration by providing adequate capacity to effectively pursue and manage coherence between agriculture, nutrition, health, education and social protection sectors.
