

Recognizing Progress, Taking Action for the Future We Want

Water Day @Rio+20

Tuesday 19 June 2012, 9:30 - 21:00

VENUE Room P3-6, Riocentro, Rio de Janeiro, Brazil

MASTER OF CEREMONY Bert Diphorn, Vice Chair, UN-Water

WORKING LANGUAGE OF ALL SESSIONS English

UN-Water apologises that no simultaneous interpretation can be provided.

UN-Water is the United Nations inter-agency coordination mechanism for all freshwater related issues. Building on a long history of inter-agency coordination, UN-Water was established in 2003 to facilitate synergies and joint efforts among UN entities in the area of water.

UN-Water seeks to: promote coherent actions of the UN System on water issues, especially at country level; contribute to the global policy debate on water issues; contribute to the knowledge base on water and serve as an entry point for water-related indicators, data and information; and identify emerging issues and provide a platform for strategic discussion on how to prepare for and cope with them more effectively.

The objectives of the **Water Day at Rio+20** are:

1. To demonstrate to the broad range of stakeholders, particularly decision makers, that some of the major challenges facing humanity today are water related.
2. To identify major water issues connecting with the themes of the Rio+20 Conference.
3. To focus on the means of implementation, particularly focusing on the action areas where the United Nations can act together through UN-Water.

The Water Day will bring the UN-Water contribution to the Rio+20 Conference, building on the UN-Water Statement for Rio+20 submitted to the Rio+20 Secretariat in November 2011 and on the UN-Water Deliverables for Rio+20 submitted in March 2012 through the United Nations High Level Committee on Programmes.

At the Water Day UN-Water will release its Report on Water Resources Management, specifically produced for Rio+20, and it will engage in high level panel discussions on the relevance of water in the Rio+20 outcomes and beyond, and on the role of the human right to water and to sanitation. Finally, the 2013 International Year of Water Cooperation will be introduced as the first concrete step in the follow-up of the outcomes of Rio+20.

9:30-11:30 | **SESSION 1**

**Integrated Water Resources Management (IWRM):
Benefiting countries for a sustainable and equitable future**
