INTRODUCTION

Since 2007, the Scientific and Technical Department has been working towards enhancing the status of its knowledge and technical skills through the publication of reference documents.

A visual identity was created\(^1\), and an editorial policy defined that was then adopted at the international level, which resulted in a sharp increase in the number of documents published. Over a three-year period more than 28 publications were issued in French, English and/or Spanish and disseminated both in-house and outside ACF (donors, partners, universities,...).

Most of these documents can be accessed on ACF’s websites. The link indicated in this document is usually that of ACF-France. The Network’s other sites can also be consulted:

| ACF-France | http://www.actioncontrelafaim.org/publications/scientifiques-et-techniques |
| ACF-Canada | www.actioncontrelafaim.ca |
| ACF-Spain  | www.accioncontraelhambre.org |
| ACF-UK     | www.actionagainsthunger.org.uk |
| ACF-USA    | www.actionagainsthunger.org |

Today, coherence, visibility and the promotion of technical skills and know-how have been very much improved.

In parallel, Action contre la Faim has at its disposal a large documentary base that contains a wide range of reports, summaries, position papers and so on, not all of which are intended for publication. Amongst these latter for example is the recently created international newsletter “Tech the News!”, drafted and edited by the field and coordinated at Headquarters level.

ACF’s technical teams also regularly contribute to the publications prepared by Hunger Watch\(^2\).

Numerous and varied technical documents have been compiled on CDs, DVDs and self-training modules.

In this Catalogue of Scientific and Technical publications readers will find:

1. Scientific and technical documents listed first by year of publication, and then by sector of activity: Nutrition; Health; Mental Health and Health Care – Food Security and Livelihoods – Water, Sanitation and Hygiene; Research; Crosscutting documents.
2. All Newsletters published internationally
3. Hunger Watch publications

This document does not pretend to record every single scientific and technical reference document that exists, preferring to list those that have been published and those that are the subject of a specific promotion (“Tech the News”)

Please note: This document does not include articles published in external scientific journals.

\(^1\) Please refer to the appendix « Visual identity of Scientific and Technical Publications »
\(^2\) Hunger Watch, based in London. More detailed information is available in Chapter 3.
CHAPTER 1 – SCIENTIFIC AND TECHNICAL PUBLICATIONS

With some rare exceptions (for reasons of document confidentiality for example), all the publications of the Scientific and Technical Department can be accessed online at the Action contre la Faim website. Documents can be downloaded from: www.actioncontrelafaim.org/publications/technique-et-recherche and where other technical reference documents are also available for consultation.

Chapter 1 presents the publications in a summary table by year and then gives details by sector:
- Nutrition / Health / Mental Health and Health Care
- Food Security and Livelihoods
- Water, Sanitation and Hygiene
- Research
- Cross-cutting documents

1 - Documents published before 2007

CHAPTER 2 – TECHNICAL NEWSLETTERS

“Tech the News !”: The International Technical Newsletter

This international newsletter was designed and created to build on and enhance the status of knowledge and technical expertise of the members of ACF’s International Network. It is published quarterly, each issue focussing in turn on one technical programme area (WASH, FSL, Nutrition). Whilst it is primarily intended for the network’s technical teams, both at Headquarters and in the field, the newsletter is also widely distributed to staff members (Operations, Communication...), the Board of Trustees and the International Scientific Committee. It is circulated by means of e-mail and is intentionally not made available on Internet.

Each issue usually contains about 12 pages and sections in it always follow the same order:

1 - Editorial
2 - News from Headquarters
3 - Did you know… ?
4 - Questions asked...
5 - Zoom on a project
7 - Research and technical development
9 - What has happened?
10 - What’s next? What’s up?

The Newsletter is for the most part drafted in English. However, if an article exists only in French or Spanish, then it is included in the original language.

Feature Articles :
- Caracolí en medio de la sed cuando se esta rodeado de agua.
- Groundwater qualification in coastal areas

1 - WASH - September 2008 - Paris
2 - FSL - October 2008 – Madrid

Feature Articles:
- Fuel efficient stoves or not? When we are able to follow up our own recommendations.
- Can the environment absorb our activities? The "acadjas", a pilot fish production project on Lake Tanganyika.
- Integrated Nutrition and Food Security Surveillance in Malawi.
- ACF-E in Paraguay. Projects including the concept of value chain.

3 - Nutrition – January 2009 – Paris

Feature Articles:
- What is Research?

4 - FSL – June 2009 – New York

Feature Articles:
- Direct cash after the Post Election Violence in Kenya.
- Direct cash project in Lira, Uganda.
5 - WASH – July 2009 - Madrid

Feature Articles:
- Sustainability factors for Water points in Liberia.
- Light casing for rapid rehabilitation / construction open wells.

6 - FSL – December 2009 – Paris

Feature Articles:
- Direct Cash transfer in Uganda: results and lessons learnt.
- Partnership in programme implementation: an experience of ACF in Barguna, Bangladesh.
- Changing general food distribution into cash based interventions.

Feature Articles:
- What is Infant Feeding in Emergency core group (IFE) about?
- Projet de support nutritionnel et de sécurité alimentaire des Personnes Vivant avec le VIH.
8 – Wash- April 2010- Paris

Feature articles:
- Hygiene promotions in emergencies
- Groundwater research in Uganda
CHAPTER 3 – HUNGER WATCH PUBLICATIONS

In 2005 ACF created Hunger Watch, an epicentre for advocacy and research. The main concern of this observatory is to identify the causes of and responsibilities for current food crises and their potential solutions. The Hunger Watch team examines crosscutting factors such as conflict, market instability, gender, HIV/AIDS and analyzes their relationships with acute hunger. The observatory also visits families suffering from malnutrition in order to gather first hand testimony and discuss their experiences of living with hunger. Moreover, it develops tools to define, measure and compare the magnitude and gravity of malnutrition and hunger around the world.

Findings and recommendations are used to inform and influence humanitarian practices and policies, enabling Action contre la Faim to enhance its own capacities, fine-tune programme effectiveness, and influence external stakeholders.
### Hunger Watch Publications

**Feeding Hunger and Insecurity**
- **Briefing paper**
- Published in January 2009
- 16 pages
