WFC2015
XIV World Forestry Congress
Forests and People: Investing in a Sustainable Future

"Role of agroforestry and trees outside forests in integrated land use"

TITLE: Role of agroforestry and trees outside forests in integrated land use

SUB-THEME 3: Integrating forests and other land uses

ST3, SESSION 4: Integrated land use: from policy to practice

DATE AND TIME: Wednesday, 9 September; 14:30-16:15

ROOM: Hall 3 BC

DESCRIPTION: This session will discuss the role of agroforestry and trees outside forests for the achievement of various objectives of landscape management. Drawing on examples from different regions of the world and from perspectives of different stakeholder groups, it will explore experiences and best practices, socio-economic issues, and enabling policy and institutional frameworks related to agroforestry development. The session consists of presentations by the authors of selected voluntary papers submitted to the Congress followed by an interactive discussion among the speakers and with the audience. Each author will be asked to give a short presentation of the paper, then to focus on providing a few key messages of wider relevance. The outcome of the session will be summarized in a report and the key message(s) reflected in the report of the World Forestry Congress.

PROGRAMME

14:30-14:40: Welcome and opening by the session moderator

Dr. Philip Dobie – Senior Fellow, World Agroforestry Centre

14:40-15:30: Voluntary paper presentations

Dr. Terry Sunderland – Senior Scientist, Centre for International Forestry Research
The contribution of forests and trees to food production in the tropics: a systematic review working paper.

Ms. Geneviève Laroche – Ph. D. student, Laval University, Canada
Integrating agroforestry intercropping systems in contrasted agricultural landscapes: a SWOT-AHP analysis of stakeholders' perceptions.

Dr. Verina Ingram – Researcher, Centre for International Forestry Research and Assistant Professor, Wageningen University
Gender in forest, agroforestry and tree value chains

Dr. Achille Ephrem Assogbadjo – Associate Professor, Faculty of Agronomic Sciences, University of Abomey-Calavi, Benin
Biodiversity and socioeconomic factors supporting farmers' choice of edible forest trees in the parkland systems in Benin

Dr. Alain Olivier – Professor, Laval University, Canada
Silvopastoral systems for increased food security in Mali.

Mr. Eduardo Lopez Rosse - Ph.D candidate, UMSS-Tropico, Plurinational State of Bolivia
The hidden potential of agroforestal systems in the coca production of Chapare, Bolivia.

Ms. Mina Esteqamat – Managing Director, Center for Conservation and Development of Sustainable Ecosystems (ZIPAK), Iran
Adopting traditional agroforestry systems to restore degraded lands and achieve sustainable livelihood in arid and semi-arid areas of Iran

Mr. David Wilson – Senior Associate, World Agroforestry Centre, Philippines
An approach to determining the impacts of swidden transitions in the uplands of Southeast Asia

15:30-16:00: Moderated discussion among the speakers and questions/remarks from the audience

16:00-16:15: Summary and discussion of the key points of the session by the moderator
