

Teppo Vehanen is a research scientist at Finnish Game and Fisheries Research Institute (FGFRI, Finland). He received his Diploma (M.Sc.) in Biology and his Doctorate (Ph.D.) in Fish Biology, in 1990 and 1998, respectively, both from the University of Oulu. In 2008 he was given Docenture in Fish Biology from the same university. In 2011 he accomplished a Diploma in Environmental Economics from the University of Helsinki. From 1990 to present he has been working in the FGFRI in different tasks. His current expertise is in studies of fish community structure, especially in EU Water Framework (WFD) directive, where he is responsible for fish based ecological classification of rivers in Finland. He also works in experimental studies, mainly with juvenile salmonids and in studies related to restoration of rivers. He has been involved in several international duties like development of European Fish Index (EFI+) and recently in the intercalibration process of the WFD.
