

MOZAMBIQUE – Evaluation of the nfp Process

Matrix of Progress of the nfp Process – May 2007

For each box, please attribute one of the following values:

0 = if the indicator has not been developed / if it is absent from the country nfp process

1 = if the indicator exists but is incipient / is just starting / there is plenty of room to develop it further

2 = if the indicator is developed / is progressing well within the country nfp process

3 = if the indicator is completed to the country's full satisfaction / if the indicator can serve as a model for others to follow

Please provide the evidences when necessary

Nfp phase	Cluster of nfp principles		
	N3.1 - Cluster 1: country leadership	N3.2 - Cluster 2: Inter and intra sectoral linkages	N3.3 - Cluster 3: Partnerships and participation
Analysis (Assessing the situation of the forest sector and its development)	2 Forest sector reviews 1 Forest information (in website and other depositories) freely available and accessible to all stakeholders (please provide examples e.g. web link) 2 Forestry Outlook study	3 Analysis of the consistency of laws and legal prescriptions related to forestry 1 Identification of traditional forest-related knowledge 2 Compilation and analysis of policies, laws, regulations and strategic plans of other sectors that influence forestry 2 Assessment of the role of forests in the national economy (including valuation of its contributions) and the linkages with central issues in other sector strategies 1 Assessment of impact of other sectors on forestry sector development 3 Identification of approaches for intra and inter-sectoral dialogue (Please provide examples)	3 Stakeholder analysis: identification of stakeholders ² , their importance/influence, interests, rights, roles and responsibilities 3 Training in use of participatory tools to promote stakeholder participation 3 Existence of qualified staff to conduct participatory processes
