| 31. Kiribati | 63. Western Samoa |
| 32. Lao People's Democratic Republic | |

ⁱ The list depicts countries not members of any of the on-going international processes/initiatives on criteria and indicators for sustainable forest management. This, however, does not necessarily mean that some of those countries are not individually developing and implementing their own national and/or forest management unit levels criteria and indicators. Total forest coverage of these 63 countries is: 94,820,168 ha.

ⁱⁱ Examples of "i" above are Cuba, Lao People's Democratic Republic and Paraguay which are not a members of any of the on-going international processes but have developed their own national criteria and indicators within the overall framework of the Lepaterique Process of Central America in the case of the first.
