The NFP Facility, together with the Growing Forest Partnerships (GFP), has started a new regional initiative – “Economic, Social, and Environmental Benefits of Sustainable Forest Management: West Africa” – to strengthen the link between forest management practices and socio-economic development. The scope of this initiative is to develop a practical, applicable, and sustainable financial strategy and mechanism for supporting community-based, sustainable, multiple-use forest management models. The project is being implemented by FAO in close collaboration with the NFP Facility, building synergies with the Growing Forest Partnerships (GFP). The project aims to: i) form a basis for development of a practical, applicable, and sustainable financial strategy and mechanism for supporting community-based, sustainable, multiple-use forest management models; ii) support national actors engaged in ecosystem management to develop sustainable forest management strategies and action plans; and iii) promote awareness of relevant governmental and non-governmental stakeholders of the Forest Instrument and thus to maintain and enhance the economic, social and environmental values of all types of forests, for present and future generations.

The Food and Agricultural Organization of the United Nations (FAO) ACP-FLEGT Support Programme has allocated 700 small grants (70% to the civil society and 30% to governments) based on national priorities, agreed by the SC members. Drawing on the 10 years of experiences of the NFP Facility, a Programme Document on the FLEGT-related information and lessons learned among stakeholder groups in ACP countries. The FAO ACP-FLEGT Support Programme – fourth call for proposals.

The NFP Facility Newsletter, together with the Growing Forest Partnerships (GFP), has started a new regional initiative – “Economic, Social, and Environmental Benefits of Sustainable Forest Management: West Africa” – to strengthen the link between forest management practices and socio-economic development. The scope of this initiative is to develop a practical, applicable, and sustainable financial strategy and mechanism for supporting community-based, sustainable, multiple-use forest management models.
