**OPENFORIS**

*Open Source Tools for Forest Monitoring*

# OPENFORIS Suite

The OPENFORIS Initiative develops, shares and supports Open Source software tools for multipurpose forest inventories

## Collect Earth

Forest sampling analysis in synchronism with Google Earth Engine and Open Foris Collect.

## Collect Mobile

Collect for hand-held devices and tablets

## Collect Desktop

Entry point for data collected in field-based inventories. A fast, easy and flexible way to set up a database with user-friendly interface for managing field data.

## Calc

A robust, modular browser-based tool for data analysis and results visualization.

## Geo

A set of advanced tools for processing of remote sensing and other geospatial data.

## OPENFORIS workflow
