Respected Sir,

**Sub:** The online public consultation on the **zero draft of the political outcome document for the second International Conference on Nutrition (ICN2)**

**Ref:** February 2014 e-Update/ vide Email: UNSCN [scn@who.int](mailto:scn@who.int)

I wish to submit below my draft on the above subject.

"The reward of deeds depends upon the intentions". As all the men are the children of only one father Adam [AS], all are equal. Everyone is second to none. No one is entitled to prefer over other, by claiming colour, country, continent, language and region, but based on the deeds one does.

Even the minutest good deed with good intention becomes the greatest act due to its dedication and even the biggest good act can become worse due to bad intention. All men should be united and integrated with love, affection and broad mindedness to spread the humanitarian equality among the world community. Everyone must wish for the welfare of the Ruler because of whom the development of citizen and its survival is possible. It is always good for entire mankind as well as our self and our family welfare.

Everyone is having two themes: 1. Human body 2.Soul. The Creator created man [Adam] from sounding clay like clay of pottery. The soul [the Spirit] is one of the things, the knowledge of which is only with The Creator. Even after the great research no one can specifically find out about the soul that of what it is! Still the mankind is able only to realize the soul; like air and electricity. The body is used to grow with the things [foods] from the earth and the soul is used to grow with the good deeds. Hence the world community has to expect the real health of mankind, not mere through good foods, by simply ignoring good deeds. Both the good foods and the good deeds are playing a vital role with the human health.

"Though hunger and malnutrition are inevitable in the world normally, the world community is capable to overcome them by taking three types if efforts;

1. Appropriate efforts, 2. Required efforts, 3. Possible efforts.

In 1992 **International Conference on Nutrition**, the FAO had accepted the fact of having enough food for all.

The world community is already having nine priority themes in **the Plan of Action for Nutrition** *as follows in accordance with the International Conference on Nutrition, held in 1992.*

1. incorporating nutritional objectives, considerations and components into development policies and programmes;
2. improving household food security;
3. protecting consumers through improved food quality and safety;
4. preventing and managing infectious diseases;
5. promoting breast-feeding;
6. caring for the socio-economically deprived and nutritionally vulnerable;
7. preventing and controlling specific micronutrient deficiencies;
8. promoting appropriate diets and healthy lifestyles;
9. assessing analysing and monitoring nutrition situations.

Nothing more is required than these nine priority themes to be implemented in proper manner. Hence, the world community is having a legitimate responsibility to review [not to find fault, but to promote and to get achieved the goal ] with oneness of mind and thoughts, about the activities took place in more than two decades since 1993, to make them fruitful in future to attain the goal as expected earlier.

Furthermore, I humbly submit my few suggestions in my draft “the online public consultation on the **Global Nutrition Report**” about the both cultivations;

1. To cultivate the intention to enable the people to have proper food &
2. To generate the awareness to enable the people to cultivate the possible food crops and medicinal plants with available source.

I hope that these efforts will be useful to the entire mankind!

Thank you very much.

With respectful regards

DR.I.ABDUL RAHIM
