

SUMMARY OF THE DISCUSSION ON THE FSN FORUM FROM 12TH TO 20TH NOVEMBER 2007

SUGGESTIONS FOR EMERGING TOPICS TO INCLUDE IN THE PROGRAMME OF THE 2ND (OR 3RD) INTERNATIONAL CONFERENCE ON POVERTY, FOOD AND HEALTH IN WELFARE – ORGANIZED BY THE INSTITUTE OF PREVENTIVE MEDICINE, UNIVERSITY OF LISBON

1. Bridging from food security to nutritional security food relief modalities on humanitarian food aid intervention - awareness about the meaning of nutrition (E. Elamin, H. M. Salim)
2. Implementation of right to food guidelines (R. Lao)
3. Probiotic research (A. S. M. Selim)
4. Economic cost of social inequalities in developing countries (J. L. Vivero Pol)
5. Scaling up successful anti-hunger and anti-poverty programmes (J. L. Vivero Pol)
6. Childhood poverty and children's rights (K. E. Islam)
7. Monitoring mechanism of the state's commitment towards fulfilling food security as human rights (B. Rajbhandari)
8. Assessing the relationship between land rights, food rights and primary health rights (B. Rajbhandari)
9. Monitoring the impact of WFP toward ensuring food security in developing countries (B. Rajbhandari)
10. Documentation and dissemination of best mechanisms and practices for ensuring food security and public health (B. Rajbhandari)
11. One blow to hunger, poverty, food insecurity and poor health – involving primary stakeholders including government (B. Rajbhandari)
12. Emergency measures to ensure food security and health service in conflict hit regions- challenges, better practices and prospects
13. Focus on Africa – the globe's most impoverished land (H. Iyawe)
14. Putting pressure on the governments of developing countries to invest more in education, health and agriculture (L. de Clementi)
15. Focus on small farm holders (S. Mehta)
16. The impact of climate change on food security and livelihoods (C. Lagu)
17. The need for research into livestock labour saving technologies for improved production including for persons living with HIV/AIDS (C. Lagu)
18. The role and contribution of the shea plant in food security in sub-Saharan Africa (C. Lagu)
19. Detailed diagnosis of poor communities' coping mechanisms - blending proven appropriate technologies with valuable indigenous knowledge systems (D. M. Myeni)
20. Approaches to the feasibility of food production and income generation for particular situations to address the issue of food and nutrition security in a sustainable way (D. M. Myeni)
21. Interventions being undertaken more as a relief rather than a sustainable development measure (D. M. Myeni)
22. Sharing experiences for developing and adopting working models to address multi-dimensional challenges within the SSA countries (i.e. structural, systematic and policy related) (D. M. Myeni)
23. Establishment and sustainable management of community information centres (F. I. Oumo)
24. The role and contribution of different partnerships in the management of food security and nutrition in sub-Saharan Africa (F. I. Oumo)
25. Focus on quality, nutrition and safety, not just production in agriculture (S. Mehta)

26. Discussion on ideal food security and nutrition index (P. Dutta)
