

Policy processes and multistakeholder dialogue in the field of food security and nutrition at global scale

By Cordelia Salter, Communication Coordinator, CFS

- 1 What's CFS for? What does it do? Why is it needed?
- 2 Brief overview of the CFS Reform and how it opened up FSN governance to multi-stakeholders

(Please refer to the CFS website here: <http://www.fao.org/cfs/en>)

- 3 Introduction to the CFS process – using the [Principles for Responsible Investment in Agriculture and Food Systems \(RAI\)](#) as an example:
 - FSN problem is identified
 - CFS is mandated to look into the problem
 - Working groups discuss and negotiate - FSN forum plays a role in this stage
 - When consensus is reached, the document is endorsed in Plenary
 - All FSN stakeholders then use and promote the product
 - Feedback and lessons learned are identified – FSN forum plays a role here too
- 4 Quick look at other CFS products – VGGT, GSF, FFA (please refer to <http://www.fao.org/cfs/cfs-home/products/en>)
- 5 Overview of policy recommendations
- 6 What can you do? How can you get involved.
