*No hay información disponible sobre superficie cultivable en Brasil. Con el fin de tener un total en la región se ha estimado que la superficie cultivable es igual a la mitad de la superficie agrícola (es decir, la suma de la superficie arable, cultivos permanentes y praderas y pastos permanentes).

No information on cultivable area is available for Brazil. In order to have a total for the region, half of the agricultural area (i.e. sum of arable land, permanent crops and permanent meadows and pastures) is estimated to be cultivable.

**América del Sur**
Southern America
