(a) Other sources give 50 or 61.

(b) Estimate. Not all of the groundwater (GW) recharge becomes surface water, some gw flows directly into the sea. All surface water generated internally in Pakistan depends on GW, it is drained by the rivers and becomes the base flow of the water courses.

(c) 5.5 from Afghanistan (Kabul to Indus); 243.58 from India (11.1 Eastern Indus tributaries and 232.48 Western Indus tributaries)

(d) From India to Indus: 11.1 Eastern tributaries (Rabi, Beas and Sutlej) and 232.48 Western tributaries

(e) Western tributaries coming from India and reserved under the Indus Water Treaty (1960)

(f) To Afghanistan (Kunar): 10; to China: 0.718.
