

Computation of long-term annual renewable water resources (RWR) by country (in km³/year, average)

Serbia

Internal RWR		
Precipitation (mm/year)	[1]	<input type="text"/>
Area of the country (1000 ha)	[2]	8 836
Precipitation (km ³ /year)	[3]	49.98 <small>=([1]/1000000)x([2]x10)</small>
Surface water: produced internally	[4]	<input type="text"/>
Groundwater: produced internally	[5]	<input type="text"/>
Overlap between surface water and groundwater	[6]	<input type="text"/>
Total internal renewable water resources	[7]	8.407 <small>=([4]+[5]-[6])</small>
External RWR		
	Total	Accounted
<u>Surface water</u>		
Surface water entering the country	<input type="text"/>	
Inflow not submitted to treaties		[8] <input type="text"/>
Inflow submitted to treaties		<input type="text"/>
Inflow secured through treaties		[9] <input type="text"/>
Flow in border rivers	<input type="text"/>	[10] <input type="text"/>
Accounted inflow		[11] <input type="text"/> <small>=[8]+[9]+[10]</small>
Surface water leaving the country	<input type="text"/>	
Outflow not submitted to treaties		<input type="text"/>
Outflow submitted to treaties		<input type="text"/>
Outflow secured through treaties		[12] <input type="text"/>
Total external renewable surface water		[13] <input type="text"/> <small>=[11]-[12]</small>
<u>Groundwater</u>		
Groundwater entering the country	<input type="text"/>	[14] <input type="text"/>
Groundwater leaving the country	<input type="text"/>	<input type="text"/>
Total external renewable water resources		[15] <input type="text"/> <small>=[13]+[14]</small>
Total RWR		
Surface water		[16] <input type="text"/> <small>=[4]+[13]</small>
Groundwater		[17] <input type="text"/> <small>=[5]+[14]</small>
Overlap between surface water and groundwater		[6] <input type="text"/>
Total renewable water resources	[18]	1622 <small>=[16]+[17]-[6]</small>
Dependency ratio (%)	[19]	<input type="text"/> <small>=100*([11]+[14])/([11]+[14]+[7])</small>
