

WATER WITHDRAWAL

SOURCES OF WATER:

FRESHWATER

-  Surface water
-  Renewable groundwater
-  Fossil or non-renewable groundwater

NON-CONVENTIONAL WATER

-  Desalinated water
-  Treated wastewater
-  Agricultural drainage water

WATER WITHDRAWAL DISTRIBUTION

Withdrawal by sector

Withdrawal by continent

Withdrawal by source

from freshwater

Percentage of water withdrawal by continent (size of spot proportional to total water withdrawal)

WITHDRAWAL FOR AGRICULTURE

Agricultural water withdrawal varies depending on climate and the place of agriculture in the economy

2/3 of countries dedicating less than 10% of their water withdrawal to agriculture are industrial countries with a moderate climate in Europe

AGRICULTURE INCLUDES:

Irrigation (including fodder and pasture for livestock)

Livestock watering and cleaning

Aquaculture
