

EToCalculator 3.1 installation procedure

- Download EToCalculator 3.1 from EToCalculator website (<http://www.fao.org/nr/water/eto.html>) and save the zipped file “EToCalculatorV31.ZIP”.
- Double-click on the zipped file “EToCalculatorV31.ZIP”, and unzip the file.
- Click on Setup.EXE.
- Agree with all questions by clicking “Next”. The directory <C:\Program Files\FAO\EToCalc> is proposed as the default EToCalculator directory by the installation program.
- If the installation was successful, the EToCalculator will appear in the list of programs.

EToCalculator 3.1 installation procedure - Window Vista operating system

EToCalculator 3.1 can run in Window Vista operating system, if specific steps are taken during the installation process.

- In the C: drive, create a new folder called “EToCalc”.
- Download EToCalculator 3.1 from EToCalculator website (<http://www.fao.org/nr/water/eto.html>) and save the zipped file “EToCalculatorV31.ZIP”.
- Double-click on the zipped file “EToCalculatorV31.ZIP”, and unzip the file.
- Click on Setup.EXE.
- Agree with the first question by clicking “Next”.
- The second question concerns the definition of the EToCalculator directory for the installation of the program. The directory <C:\Program Files\FAO\EToCalc> is proposed as the default EToCalculator directory by the installation program. However, this is a protected directory in Windows Vista operating system. It is thus necessary to assign another EToCalculator directory. To do so, click on “Browse”, and select the new directory <C:\EToCalc>.
- Agree with the following questions.
- If the installation was successful, the EToCalculator will appear in the list of programs.
