

The future of water lies in a more productive agriculture

Why does agriculture consume so much water?

Can irrigation produce more with less water?

What policy tools are needed to achieve this?

Join us for a lively discussion at the Session

DROPS FOR CROPS

Water demand management in agriculture

17 March 2009 | 8:30 - 13:00 | Feshane Halic Hall - Room IV

Session organized by FAO, OECD and IWMI
