

KENYA

Conservation

Management and Control of *Prosopis juliflora* in Kenya (TCP/KEN/3002)

Scope

- Establish a coordinated strategy for the control and management of *Prosopis* by farmers and pastoralists;
- Strengthen capabilities on integrated control and monitoring of biological control agents affecting pods and seeds of *Prosopis*;
- Strengthen capabilities on stands management, product harvesting and utilization.

Approach

- Implementation through forestry field farm schools;
- Change of perceptions from problematic invasive species to utilisable resource.

Weaving knowledge into development

Development of a clear national strategy and awareness campaign to control the spread and improve utilization of *Prosopis juliflora*.
