DIRECTORY OF FISHERIES AND AQUACULTURE INFORMATION RESOURCES IN AFRICA
(preliminary version)

compiled by

Jean Collins
Fisheries Library, FAO

and

Janet Mwobobia
Library, Kenya Marine and Fisheries Research Institute

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS
Rome, 2000
PREPARATION OF THIS CIRCULAR

This preliminary version of the Directory of fisheries and aquaculture information resources in Africa has been prepared by staff of the Fisheries Library, FAO, in collaboration with the staff of the Kenya Marine and Fisheries Research Institute (KMFRI) and the RECOSCIX-WIO Project in Mombasa, Kenya. James Macharia, KMFRI, and Armand Gribling, FAO Fisheries Library, did much of the work involved in the design and preparation of questionnaires and data input to the Directory.

The data is available in a CDS/ISIS database, the structure for which was kindly supplied by the European Association of Aquatic Sciences Libraries and Information Centres (EURASLIC). The formats, including print formats, are based on the Directory of European Aquatic Sciences Libraries and Information Centres, 2nd edition, which was published jointly by EURASLIC and Instituto Español de Oceanografía in 1994.

Establishing contacts and collecting the data has, as an exercise in itself, given an indication of the extreme difficulties faced by many institutions with regard to communications, even at the level of postal services. Fortunately, the availability of electronic mail services in Africa is improving, which has a very positive impact on the work of libraries, information producers and information services. However, there is no doubt that the majority of libraries listed do not yet have the advantages of modern information technology. For this reason it was decided to publish the preliminary version of the Directory as an FAO Fisheries Circular.

The Directory is being distributed to the institutions listed, as well as to a number of resource people who have already contributed ideas and information as most welcome input to the Directory. This second round of information gathering is intended to enable us to publish a more complete Directory in printed and digital format.

The following people have provided useful contacts and information to assist in the compilation of the Directory: Martha Pretorius, Coordinator of the Africa Regional Group of IAMSLIC; Wariboko West, FAO Regional Office for Africa; Hilary Cochrane, FAO Fisheries Information, Data and Statistics Unit, (Project for the distribution of the Aquatic Sciences and Fisheries Abstracts (ASFA) CD ROM to African institutions); George Hanek, Project Coordinator Lake Tanganyika Research; Margaret Crampton, NISC South Africa.

Comments on omissions and suggestions for improvement of the Directory would be welcome. Please send to the FAO Fisheries Library, Viale delle Terme di Caracalla, 00100 Rome, Italy.

Collins, J.; Mwobobia, J. (comps.)
Directory of fisheries and aquaculture information resources in Africa (preliminary version).

ABSTRACT

An overview of the fisheries and aquaculture information resources available in Africa has been compiled using the CDS/ISIS software and the database structure and formats designed by the European Association of Aquatic Sciences Libraries and Information Centres. The Directory includes details of the information resources and services of international organizations, regional bodies and networks; and national institutions and organizations in Africa. Fisheries and aquaculture periodicals and newsletters published in Africa are listed. Relevant Internet sites are listed with their URL and a brief description. The Directory will be used to facilitate effective dissemination of FAO fisheries information and in efforts to promote collaboration and information resource sharing activities between fisheries institutions in Africa. Data gathered as a result of the distribution of this preliminary version will be incorporated in the database, which will also be published on the FAO Homepage.

1. INTRODUCTION

The dissemination of fisheries information is one of the primary tasks of the Fisheries Information, Data and Statistics Unit (FIDI) of FAO. This Directory is intended to provide an overview of the status of fisheries libraries and information centres in Africa in order to enhance the following activities:

- To facilitate a more effective dissemination and distribution of the published work of the FAO Fisheries Department;
- To ensure widest possible access to the information products and services of FAO's Fisheries Department, including the Aquatic Sciences and Fisheries Abstracts database;
- To make the most effective use of information technology in the production and dissemination of fisheries information in appropriate formats for the target audiences.

Libraries have traditionally co-operated within information networks, usually of an informal character, in order to provide the most cost-effective services to their clients. This cooperation has been based on arrangements for the exchange of publications, inter-library lending, supply of photocopies etc. Whereas the resources of information relevant to the fisheries sector are growing and diversifying at an ever increasing pace, it is unfortunately rare that the financial resources needed to acquire or access them are growing at the same rate. Maintaining an information resource in support of research and management activities has always been costly. The recent adoption of information as a commodity in a so-called "information society" will probably not render it less expensive.

The need for even greater co-operation between libraries, for providing access to and sharing the available resources, is essential in regions where institutions do not have a strong information base or adequate funding to obtain the wealth of information available. The second purpose of this Directory is therefore:

- To enhance information resource sharing activities between fisheries institutions in Africa;
- To provide an overview of the status of fisheries libraries and information centres in Africa, particularly for those agencies and organizations which can provide assistance or support to their activities.

The organisation of libraries and information centres into more formalised networks at national, regional and even international level provides a more effective means of sharing not only the information resources but also the available expertise. Details of the information programmes and products of some international and regional organizations and networks are also included.

The content of the Directory and some of the terminology used are further clarified as follows:

**Information Resources**: Includes external information in the form of publications (printed or digital); Publications and databases produced in Africa; Facilities for the storage and retrieval of information; Information communications and technology resources; Information networks and other regional initiatives; and perhaps the most important of all - Human resources and the available skills and qualifications.
The Organizations: The decision on which organizations to include in the Directory has been arbitrary to the extent that they have been included if they have been identified as holding or producing fisheries or aquaculture information. The inclusion of only fisheries institutions and organizations would have been an easier task but would have omitted the important resources of universities and training centres. In some countries the only significant information resources are held by the universities. In others the fisheries community depends upon them for providing access to the scientific and technical literature as well as for the expertise of their staff. Omissions are unintentional and will be corrected as soon as the information is supplied.

The Data: As was pointed out in the Preface, the collection of data has been a time-consuming activity. There are many gaps, which are easily identified in the list of institutions, and which it is hoped can be filled for the updated version of the Directory. Data was collected on facilities, equipment and budgets which has not been published but which has been useful in identifying those institutions with the greatest difficulties in accessing information. The data on the library collections is not intended to be an absolute record of the number of items, but rather an indication of the volume and types of information resources available.

Analysis and Indexes: For this preliminary version of the Directory no attempt has been made to analyse the data or to produce indexes. This will be done for the updated version, in particular to identify participation in networks, the availability of software, databases and Internet access in addition to broad subject categories.

NOTES: From 1994 to 1997, the AAAS Africa Program ran a CD-ROM pilot project in seven African universities, coupling the provision of CD-ROM bibliographic databases in the sciences and social sciences with document delivery assistance. Current efforts are exploring the extent to which online journals can meet African information needs.

3. REGIONAL INFORMATION NETWORKS AND PROGRAMMES

This section includes details of some of the networks, products and programmes which were reported in the completed questionnaires.

3.1 FISHBASE and the ACP-EU Training Program on Fisheries and Biodiversity Management

FishBase is now available on the web. Users can search for information on a species by scientific name or common name. The search covers over 20,000 species, 40,000 synonyms and 60,000 common names. Work is underway to also make accessible on the Internet the entire 15,000+ pictures in FishBase. Users can also search the FishBase glossary for definitions of terms used in FishBase. Future plans for the FishBase web pages include enhanced accessibility and remote data entry so that collaborators can add and modify the information of their respective countries or areas of expertise. FishBase can be accessed at http://www.fishbase.org/

EC-funded Project “Strengthening Fisheries and Biodiversity Management in ACP Countries”. The training program has its own web page at http://www.fishbase.org/training/.

The ACP-EU Fisheries and Biodiversity Project has established five regional nodes in countries in Africa, the Caribbean, and the Pacific (ACP countries). Each regional node is staffed by one or two Regional Coordinators. The nodes are provided with travel budgets, computer hardware, and Internet access. The role of the coordinators in their respective region is to follow up on training activities of the project and lend support to fisheries scientists and managers in respect to information retrieval and exchange.

The Regional nodes in Africa are:

Regional Node for Western and Central Africa (Senegal) / Centre Régional de Coordination pour l’ Afrique de l'Ouest et du Centre (Sénégal)

Centre de Recherches Océanographiques Dakar Thiaroye (CRODT). E-mail: acpcro@telecomplus.sn

Regional Node for Southern Africa (Namibia)

National Marine Information and Research Center, Ministry of Fisheries and Marine Resources. E-mail: newhites@iafrica.com.na

Regional Node for East and Central Africa (Kenya)

National Museums of Kenya. E-mail: biofish@africaonline.co.ke

3.2 International Commission for the Scientific Exploration of the Mediterranean Sea (CIESM)

Launched in 1910, CIESM is one of the oldest and most enduring scientific intergovernmental organisations in the world. The Commission is currently funded by 22 Member States which support the work of a large scientific network - some 500 institutes and over 2500 researchers - united by a commitment to promote marine science for the lasting protection of the Mediterranean Sea and for the well-being of its coastal populations.

Headquarters:
16, bd. de Suisse MC 98000 Monaco.

CIESM GUIDE OF MARINE RESEARCH INSTITUTES
http://www.ciesm.org/resources/marin.html
This directory offers practical information on the facilities (equipment, library, courses, etc.) available in some 70 marine research institutes of the Mediterranean and Black Sea coasts. It is restricted to institutes with full laboratory and/or oceanographic capacity, which are located on the shore or very near. Institutions in the following African countries are included in the Directory: Algeria, Egypt, Libya, Morocco, Tunisia.

3.3 National Inquiry Service Centre (NISC South Africa)

Contact information: http://www.nisc.co.za/
Margaret Crampton
PO Box 377
Grahamstown
6140
South Africa
Tel: +27 (0) 46 - 6229698
Fax: +27 (0) 46 - 6229550
Email: info@nisc.co.za

The mission of NISC South Africa is to provide local and global information for Africa, about Africa and by Africans. By combining our African resources with those of the rest of the world, NISC provides sophisticated information sources relevant to Africa's needs.

**Aquatic Biology, Aquaculture & Fisheries Resources (1971+) (ABFR)**

This two disc set has 680,000 references from the world's premier aquatic databases; Automated ASFA thesaurus; Monitoring List of indexed ASFA journals; ASFA Geographic Authority List; NODC and FISHLIT taxonomic codes automate access to scientific names: species, genus, family ... to subkingdom.

ABFR combines complete (ASFA 1) Aquatic Sciences & Fisheries Abstracts Part 1 (1978 - present) with Fisheries Review (1971 - present) and FISHLIT(1985-present); Fisheries and Aquaculture subsets from AGRIS (FAO) and CABI; Fish & Wildlife Reference Service (1960 - present), AQUACULTURE (1970 - 84), Fish Health News (1978 - 85), and Castell's Nutrition References(1970-present). New in 1989 is the Database of the Fishing Industry Research Institute (FIRI) in Cape Town (25,000 new records) and fish disease and human health subset from Medline (22,000 new records); These major database collections together provide unrivaled access to information on the science and management of aquatic organisms, environments and their explanation.

>>CD-ROM and BiblioLine - Quarterly Updates

**Fish & Fisheries Worldwide (1971 and earlier - present) (FFW)**

Published by NISC South Africa. Over 180,000 citations are drawn from Fisheries Review, formerly compiled by the US National Biological Service and now compiled by NISC SA; the Fish & Wildlife Reference Service file; FISHLIT compiled by NISC SA in collaboration with the JLB Smith Institute of Ichthyology, South Africa; NOAA's Aquaculture; Fish Health News abstracts; and Castell's Nutrition References. New in 1998: the database of the Fishing Industry Research Institute, CSIR, South Africa expanding the coverage of fish processing and quality control in fish products; the fish subset of Medline, which offers information on fish diseases and the effect of a fish diet on human health.

Leading files cover the world's literature on fisheries, aquaculture and ichthyology of Africa, Europe, North America and the rest of the world. Unsurpassed access through scientific and species names, this disc features the FISHLIT & Fisheries Review taxonomic and geographic identifiers.

>> CD-ROM and BiblioLine - Quarterly Updates

**Marine, Oceanographic & Freshwater Resources (1964+) (MOFR)**

The enhanced ASFA offers more than 885,000 references from 14 databases. This two disc set (1960 - 1984) & (1985 - current) provides an exclusive collection of the world's premier databases on marine, oceanographic, and freshwater resources. MOFR combines: Aquatic Sciences & Fisheries Abstracts Part 2 (Ocean technology, policy and non-living resources) & Part 3 (Aquatic Pollution and Environmental Quality) (1978 - present); Oceanic Abstracts (1964 - present); Institute of Oceanographic Sciences Deacon Laboratory/Proudman Oceanographic Laboratory (1983 - 1996), continued as Oceans (1997 - current) from the Southampton Oceanography Centre and BIDLIB
This unprecedented combination of major databases provides comprehensive coverage of international marine and oceanic information, as well as substantial coverage of estuarine, brackish water, and freshwater environments. Automated searching with the ASFA thesaurus is provided. Also includes the ASFA Monitoring List of publications indexed in ASFA and the ASFA Geographic Authority List.

>>Cd-rom and BiblioLine - Quarterly Updates

**Water Resources Worldwide (1970 - present) (WRW)**

*More than half a million references*

Global, regional, national, and local coverage is provided by WATERLIT (1975-present) from the Water Research Commission in South Africa, with unequaled information for Africa: AQUAREF (1970-1992) from the Inland Waters Directorate of Environment, Canada; and DELFT HYDRO (1977-87) from the Delft Hydraulics Laboratory of the Netherlands. Coverage of water in arid lands, engineering projects, water quality, water treatment and international water-related topics is particularly strong. WRW provides roughly 390,000 citations and abstracts and features the WATERLIT thesaurus. Holding libraries in South Africa are indicated and WATERLIT offers document delivery from the CSIR, South Africa. Excellent African coverage as well as other countries. NEW: Aquatic subset of CAB Abstracts (1984 -current), compiled by CAB International, UK

>>Cd-rom and BiblioLine - Quarterly Updates

**FISHLIT (1985 - present)**

NISC SA compiles this database in association with the JLB Smith Institute of Ichthyology, Rhodes Univ., South Africa. FISHLIT now covers all areas of world fish and fisheries literature, providing over 100,000 fully indexed citations, with some coverage dating back to the 1800s. More than 3,000 sources include journals, monographs, proceedings of conferences and symposia, government reports, grey literature, books, theses, and dissertations. Many are not indexed by other databases. Coverage of tropical areas and African freshwater fish in particular is comprehensive, and there is much information that is essential for developing countries. About 24,000 records are added per year

### 3.4 Regional Cooperation in Scientific Information Exchange in the Western Indian Ocean Region (RESCOSCI-WIO)

RESCOSCI-WIO is an information project working towards establishing a lasting network of marine and aquatic institutes in the Western Indian Ocean (WIO) region with the Regional Dispatch Centre (RDC) in Mombasa Kenya as its central node. Through its information services to the scientific community, the project aims at promoting the scientific capabilities of the region.

In 1989 the Intergovernmental Oceanographic Commission of Unesco (IOC) started the pilot phase of the RESCOSCI-WIO project with the assistance of Belgium. IOC’s Marine Information Management (MIM) programme activities are developed within the wide framework of the International Oceanographic Data and Information Exchange programme (IODE).

RESCOSCI-WIO is based on a network of co-operating institution (CIs) and co-operating libraries (CLs). Furthermore, there is a pool of contacts spread throughout the world. The Regional Dispatch Centre (RDC), based at the Kenya Marine and Fisheries Research Institute (KMFRI) acts as a traffic controller, linking the different components of the system.

The following information systems are produced or contributed to by RESCOSCI-WIO:
3.5 Regional Network for Marine Information Exchange in the Central Eastern Atlantic (RECOSCIX-CEA)

Based on the same principles and arrangement of the RECOSCIX-WIO network, the following information was distributed by RECOSCIX-CEA in 1998.

The Documentation Centre of the Centre de Recherches Océanologiques of Abidjan (CRO-Abidjan) with the collaboration of the Intergovernmental Oceanographic Commission of Unesco (IOC-UNESCO) has set up a documentary network named Regional Co-operation in Scientific Information Exchange in the central Eastern Atlantic (RECOSCIX-CEA). This network is composed of 15 countries and 16 Documentation Centres.

This network will be made of all the documentation centres and libraries in Africa coastal member countries of IOC located between Morocco and Angola, whose activities are concentrated on marine sciences.

Objectives of the Project

- Establish a self sustained marine information exchange and dissemination network for Central Eastern Atlantic region
- Develop an integrated information management for marine information
- Develop national and regional strategies and policies for the long term management of marine information.
- Provide marine scientists in the region with the necessary scientific information to enable them to do their work
- Enhance the use of scientific information available in the region
- Promote and facilitate communication within and between national, regional and international scientific communities
- Produce and distribute various information products relevant to marine scientists

Expected Services of this Project

- Information retrieval service. A bibliographic search service through which scientists are able to get information on scientific literature on given topics or fields in aquatic sciences. The searches will be done on an ASFA CD, Current Contents and institutions databases. Each active documentation centre within the network will receive an ASFA subscription.
- Document delivery service. This service, thanks to national, regional and international libraries collaboration will provide copies of documents.
4. CURRENT AFRICAN FISHERIES AND AQUACULTURE PERIODICALS

The periodicals listed below are those currently held by FAO Fisheries Library for the years given. An important function of FAO Library is to collect and make available the published work of institutions and organizations in developing countries, within the subject areas of expertise of FAO. This function is encapsulated in the first paragraph of the Constitution of FAO:

"1. The Organization shall collect, analyse, interpret and disseminate information relating to nutrition, food and agriculture. In this Constitution, the term "agriculture" and its derivatives include fisheries, marine products, forestry and primary forestry products."

Many of the following periodical titles fall within the category "grey literature" which means that they are often not easy to obtain. But the information contained within them is often unique, not available via other means and it is essential that the results of research from African institutions is disseminated - not only to FAO Staff but to as wide an audience as possible.

FAO ensures that these periodicals are indexed and included in the Aquatic Sciences and Fisheries Abstracts (ASFA) database, thereby reaching the international fisheries community. Some of the most recent issues are old enough for the periodical normally to be transferred to the non current category. In these particular cases, either we have been informed that funds are being sought in order to publish a current issue or the country publishes almost no other fisheries information and we try to keep at least one title "current".

The Internet offers enormous potential for fisheries and aquaculture institutions in Africa to be able to publish and disseminate their information and research results via this means. However, there is some way to go before this technology is available and affordable by many of the institutions in question.

In the meantime, FAO Fisheries Library will continue to collect, make available and archive this literature and would welcome details of gaps in our collection to the address given in the Preface.

5. DIRECTORY OF FISHERIES, AQUACULTURE AND RELATED INTERNET SITES

The following list of Internet sites is an extract of a broader Directory maintained by FAO Fisheries Library for the benefit of FAO staff and Library users. The Directory is available on the FAO Homepage at http://www.fao.org/fi/library/Links.htm.

Maintaining and updating the links is a time-consuming job and notification of any corrections or omissions would be welcome.

The brief abstract added in this list is taken directly from the specific Homepages.

AFRICA

- GENERAL AND REGIONAL
- REGIONAL LAKES AND RIVERS
- INDIVIDUAL COUNTRIES

GENERAL AND REGIONAL

African Academy of Sciences
http://www.oneworld.org/aas/

The AAS has developed a vigorous programme of activities that include Networking, Publication, Policy, Research and Capacity Building in Science and Technology. These programmes are provided under five broad programme areas.

AfricaNews
http://www.africanews.org/

Africa News Service has been a leading source of reporting on Africa for U.S. media and a large North American audience, generating public and policy attention to the least-covered continent. Africa News has made Africa coverage more frequent, more substantive and more accurate.

African Studies (University of Pennsylvania)
http://www.sas.upenn.edu/African_Studies/AS.html

The African Studies Center at Penn is an interdisciplinary program that offers undergraduate students an opportunity to explore the historic and cultural diversity of sub-Saharan African peoples. The major and minor courses of study provide an understanding of the dynamics of the continent's social, political and economic systems.

African Universities Online
http://www.aaas.org/international/ssa/univs.shtml

A directory of sites maintained by the American Association for the Advancement of Science. The Africa Program was inaugurated in 1987 as a component of the AAAS Directorate for International Programs. To date activities, developed and implemented in partnership with African institutions, have centered on improving access for African researchers to scientific and technical information, on encouraging other aspects of scientific capacity-building, on articulating research and policy agendas for critical issues facing African science and society, and on promoting productive collaborative ties between US and African scientists and their institutions.

Coastal Resources Center, East and South Africa
http://www.crc.uri.edu/field/esa/index.html

Throughout eastern Africa, the coastal resource base is being degraded at an ever-accelerating rate. This has caused economic hardship to the millions of residents whose livelihoods are directly dependent upon these resources and the loss of substantial national development opportunities and undocumented, but significant, loss in biodiversity. The University of Rhode Island's Coastal Resources Center (CRC) began working in East Africa in 1994 to turn integrated coastal management
(ICM) principles into practice in Kenya and Zanzibar. Today CRC continues to work with its partners in Kenya, Tanzania and South Africa to promote ICM in the region.

**Coral Reef Degradation in the Indian Ocean (CORDIO)**
http://www.cordio.org/index.html

CORDIO is a program created to respond to the degradation of coral reefs throughout the Indian Ocean. The program was initiated by the extensive bleaching and mortality of corals that occurred during 1998. CORDIO is supported by Sida (Swedish International Development Cooperation Agency), the World Bank, FRN (Swedish Council for Planning and Coordination of Research), MISTRA (Foundation for Strategic Environmental Research) and WWF (Worldwide Fund for Nature). Activities within the program are conducted in Kenya, Tanzania, Mozambique, Madagascar, Seychelles, Reunion, Comoros, Mauritius, Maldives, India and Sri Lanka and co-ordinated from sub regional secretariats in Kenya, Sri Lanka and Reunion.

**Common Market for Eastern and Southern Africa (COMESA)**
http://www.comesa.int/

COMESA exists 'as an organisation of free independent sovereign states which have agreed to co-operate in developing their natural and human resources for the good of all their people'. With its 21 member states and population of 385 million it forms a major integrated trading block.

**East Africa : Coastal Resources Database and Atlas (UNEP)**
http://www.unep.org/eaatlas/

The Eastern African Database and Atlas Project was initiated in 1993 by UNEP and its goal is to produce an atlas of the coastal resources of Eastern Africa, and to develop a GIS based database of the Coastal zone of Eastern Africa, including Kenya, Tanzania, Mozambique, Comoros and Seychelles. The database covers the land-sea interaction area, approximately 50 Km of the land and 50Km of the ocean.

**Eastern African Action Plan : UNEP Regional Seas Programme**
http://www.unep.org/unep/program/natres/water/regseas/eaf/eaf.htm

Covers the Convention for the protection, management and development of the marine and coastal environment of the Eastern Africa Regions: Comoros, France (La Réunion), Kenya, Madagascar, Mauritius, Mozambique, Seychelles, Somalia and the United Republic of Tanzania.

**Ena-Tiers Monde (environnement et développement du tiers-monde)**
http://www.enda.sn/

L'organisation internationale enda tiers-monde est constituée, au Sénégal, d'un ensemble d'équipes et de programmes en synergie. Mais enda tiers-monde, c'est aussi un réseau d'antennes décentralisées.

**EU-ACP Cooperation : African Countries**
http://europa.eu.int/comm/development/country/afri_en.htm

**EU-ACP Cooperation : Fisheries Cooperation with developing countries**
http://europa.eu.int/comm/development/sector/fish.htm

Fisheries was introduced into the EC development cooperation from the very beginning, albeit at very modest levels. Initial work concentrated on infrastructure improvements, mainly targetting industrial operations. During the eighties, support to the artisanal subsector grew in significance as both countries and donors realized that industrialisation was neither an easily achievable nor always desirable objective in fisheries and that the predominant characteristics of ACP fisheries were small to medium scale in nature.
Farmesa : Farm-level Applied Research Methods for East and Southern Africa
http://www.farmesa.co.zw/

The Farm-level Applied Research Methods Programme for East and Southern Africa is a regional collaborative initiative of Kenya, Tanzania, Uganda, Zambia and Zimbabwe, in collaboration with Botswana, Malawi, Mozambique and South Africa. FARMESA is executed by the Food and Agriculture Organization of the United Nations (FAO) with financial support from Swedish International Development Cooperation Agency (Sida). The FARMESA Programme contributes towards sustained improvement in productivity, and real incomes and welfare of the small holder farming communities in Eastern and Southern Africa, focusing on poverty eradication, sustainable natural resource management, human and institutional development and regional collaboration through systems oriented, participatory, gender sensitive approaches with special emphasis on ownership and empowerment.

Index on Africa (Norwegian Council for Africa)
http://www.africanindex.africainfo.no/

Comprehensive guide to the continent of Africa.

Indian Ocean : Oceanography & Climatology Virtual Centre
http://www.iprolink.fr/~tranthao/index.htm

This site is the meeting point for all of you interested in the oceanography and the climatology of the Indian Ocean. It proposes a historical and bibliographical guided tour of the research in the Indian Ocean region as well as some of my personal results...and many relevant links!

Institut de Recherche pour le Développement (IRD) en Afrique

L'Institut de Recherche pour le Développement (IRD) est l'héritier de L'ORSTOM, établissement public français de recherche qui, depuis plus de cinquante ans , travaille à la connaissance scientifique des régions tropicales. L'ORSTOM a été présent en Côte d'Ivoire dès 1946. Le changement d'identité correspond à la volonté de l'Institut d'impulser une nouvelle dynamique à son activité de recherche pour le développement, de promouvoir sa capacité d'expertise collégiale en réponse aux questions des décideurs du développement, et de contribuer à la formation des cadres scientifiques et techniques des pays partenaires .

Melissa : Managing the Environment Locally in Sub-Saharan Africa
http://www.melissa.org/

The MELISSA Program (Managing the Environment Locally in Sub Saharan Africa) has the goal of supporting and facilitating the improvement of the local environment through partnership development and knowledge management. In this way, the Program contributes to finding the balance between social equity, economic advancement and sustainable development to ensure improved living conditions and a better quality of life for urban, peri-urban and rural citizens.

Network for Environment and Sustainable Development in Africa (NESDA)
http://www.nesda.org/nesda1/indexg.html

NESDA is a regional non-governmental and non-profit organisation concerned with identifying capacity building needs that promote environmentally sustainable development in Africa and developing, implementing and evaluating methods and programs to meet those needs through co-ordinated advisory services, technical support, advocacy and networking

Organization of African Unity
http://www.oau-oau.org

Its purposes are to promote the unity and solidarity of the African States; defend the sovereignty of members; eradicate all forms of colonialism; promote international cooperation having due regard for the Charter of the United Nations and the Declaration of Human Rights; coordinate and harmonize Member States economic, diplomatic, educational, health, welfare, scientific and defense policies.
The harmful consequences of the phenomena of environmental pollution are felt in all the West African area and are at the origin of increasing concerns as well decision makers as of the populations. This site has information on these concerns.

Pan African Information Development System (PADIS)

PADIS is a co-operative regional development information system created in January 1980 under the aegis of the United Nations Economic Commission for Africa (ECA) in Addis, Ababa, Ethiopia. The Pan African Documentation Centre Network (PADISNET) is a project to link 34 countries into a network of participating development planning centres which exchange databases and information. [Latest update 1995?]

Regional Cooperation in Scientific Information Exchange - Western Indian Ocean Region (RECOSCIX)
http://www.recoscix.org/introduction.htm

RECOSCIX-WIO is an information project working towards establishing a lasting network of marine and aquatic institutes in the Western Indian Ocean (WIO) region with the Regional Dispatch Centre (RDC) in Mombasa Kenya as its central node. Through its information services to the scientific community, the project aims at promoting the scientific capabilities of the region.

Secretariat for Eastern African Coastal Area Management (SEACAM)
http://www.seacam.mz/

In August 1997, the Secretariat for Eastern African Coastal Area Management (SEACAM) was launched in Maputo, Mozambique. The Reference Group of country representatives from the ten Eastern African countries officially opened the Secretariat in October 1997. The Secretariat springs from the desire of the Eastern African countries to accelerate implementation of integrated coastal zone management (ICZM) in the region as put forth in the Arusha Resolution (1993) and Seychelles Statement (1996) on ICZM.

Southern African Development Community (SADC)
http://www.sadc.int/

Originally known as the Southern African Development Coordination Conference (SADCC), the Organisation was formed in Lusaka, Zambia, on April 1, 1980, following the adoption of the Lusaka Declaration - Southern Africa: Towards Economic Liberation by the nine founding member states. The Declaration and Treaty establishing the Southern African Development Community (SADC), which has replaced the Coordination Conference, was signed on August 17, 1992 in Windhoek, Namibia.

Southern African Environment Project
http://www.saep.org/

Gateway to environment and sustainable development information in Southern Africa. (SAEP) is an environmental non-governmental organisation with offices in Cape Town and Port Elizabeth. SAEP works with a variety of South African government departments, educational institutions, environmental non-governmental organisations, and community-based organisations. Its educational programmes run the gamut from workshops and conferences to a rapidly growing internship programme. Its initial focus has been on South Africa, but it is expanding into Lesotho and other SADC countries as opportunities and funding permit.
United Nations. Economic Commission for Africa

ECA is the regional arm of the United Nations, mandated to support the economic and social development of its 53 member States, foster regional integration, and promote international cooperation for Africa’s development. Established in 1958 and based in Addis Ababa, Ethiopia, ECA The Pan African Development Information System (PADIS)

University of Rhode Island. Coastal Resources Center. East and South Africa Program
http://www.crc.uri.edu/field/esa/index.html

Throughout eastern Africa, the coastal resource base is being degraded at an ever-accelerating rate. This has caused economic hardship to the millions of residents whose livelihoods are directly dependent upon these resources and the loss of substantial national development opportunities and undocumented, but significant, loss in biodiversity. The University of Rhode Island's Coastal Resources Center (CRC) began working in East Africa in 1994 to turn integrated coastal management (ICM) principles into practice in Kenya and Zanzibar. Today CRC continues to work with its partners in Kenya, Tanzania and South Africa to promote ICM in the region.

West and Central Africa Action Plan : UNEP Regional Seas Programme
http://www.unep.org/unep/program/natres/water/rgseas/wacaf.htm

Covers the Action Plan, which was adopted in 1981 as the Abidjan Convention, and the Protocol concerning Cooperation in Combating Pollution in Cases of Emergency

Western Indian Ocean Marine Science Association (WIOMSA)
http://pages.intnet.mu/ams/wiomsa.htm

The Western Indian Ocean Marine Science Association (WIOMSA), is a non-governmental and non-profit regional organization for promoting the educational, scientific and technological development of all aspects of marine sciences throughout the Western Indian Ocean (WIO) region. The Association gathers and disseminates marine science information; it holds all types of meetings to foster marine science development and information exchange; and enhances better communication among the marine scientists and other professionals involved in the advancement of marine science research and development on the WIO region.

World Conservation Union. Eastern African Regional Office
http://iucn.org/places/earo.html

Addresses regional conservation needs through theme components involving capacity building, networking and practical conservation projects. A Regional Advisory Council, membership meetings and frequent scientific and technical conservation fora promote collaboration between the office, membership and partners.

REGIONAL LAKES AND RIVERS

Cichlid Fishes of Lake Malawi
http://www.connix.com/~mko/mwfishes.htm

A scientifically oriented, noncommercial site devoted to a fascinating trove of tropical biodiversity, both the largest lake-fish fauna and the largest vertebrate species flock on earth, the cichlids of southeastern Africa's Lake Malawi. (It is Lake Nyasa or Niassa to the people of Tanzania and Mozambique, who share this giant rift lake with Malawi.)
Data on African Lakes (ILEC)
http://www.ilec.or.jp/database/map/regional/africa.html

International Lake Environment Committee Foundation (ILEC) in co-operation with the United Nations Environment Programme (UNEP), established a data collection project entitled “Survey of the State of World Lakes” in 1986. The aim of this project is to gather basic and important environmental information on natural and artificial lakes and its dissemination for their best use especially in developing countries and countries with economies in transition.

Environmental Aspects of the African Great Lakes Region (UNEP/USGS/NASA)
http://grid2.cr.usgs.gov/greatlakes/

Provides information on the African Great Lakes region which is composed of a variety of ecosystems with significant biodiversity.

Global Lake & Catchment Conservation Database (UNEP)
http://wwwcpg.mssl.ucl.ac.uk/orgs/un/glaccd/html/home.html

The aim of this database is to contribute new global environmental data and information for large lakes (greater than 100km² in area) thus supporting the monitoring and management of both inland water resources and biological resources.

International Decade for East African Lakes (IDEAL)
http://lrc.geo.umn.edu/IDEAL/

Information provided on various East African Lakes, part of the International Geosphere-Biosphere Program (IGBP).

Lake Tanganyika Biodiversity Project
http://www.ltbp.org/

The aim of the Lake Tanganyika Biodiversity Project is to help the riparian states produce an effective and sustainable system for managing and conserving the biodiversity of Lake Tanganyika into the foreseeable future.

Lake Tanganyika Nyanza Project (Arizona University)
http://www.geo.arizona.edu/nyanza/

Information on a research opportunity for outstanding undergraduates interested in tropical lakes. The Nyanza Project is sponsored by the U.S. National Science Foundation and the Lake Tanganyika Biodiversity Project. The project is run by The University of Arizona for the International Decade of East African Lakes (IDEAL), an organisation that promotes research and training on African lakes.

Lake Tanganyika Research

Following recommendations adopted at the 1st Session of the Committee for Inland Fisheries of Africa (CIFA), Sub-Committee for Lake Tanganyika, convened in 1978, the Lake Tanganyika Research (LTR) Project ‘Research for the Management of the Fisheries on Lake Tanganyika’ - (GCP/RAF/271/FIN) became operational in January 1992. The project is regional in scope, being shared by the four lake basin States of Burundi, Democratic Republic of Congo (DRC), Tanzania and Zambia.

Lake Victoria Research (University of Michigan, USA)
http://www.biology.lsa.umich.edu/~gwk/research/victoria.html

Provides information on the proposed work in Lake Victoria and offers several unique opportunities for moving to this next level, and for testing and extending the generality of established limnological wisdom. Lake Victoria serves as the basic food and economic resource for millions of people.
PLEA is a research, training, and service program of the African Studies Center of Michigan State University in collaboration with the fisheries research institutes of Kenya, Malawi, Tanzania, and Uganda. PLEA does research on Lakes Victoria and Malawi on the Anthropology and Sociology of fisheries management and development, women and gender, environmental policy, the socio-economic impacts of species introductions, and relations of production. PLEA trains African and international scholars in fisheries socio-economics and provides bibliographic databases, conferences, and consultancies.

**INDIVIDUAL COUNTRIES**

Particularly for countries where specific fisheries and aquaculture Homepages are not found, a more general government or news agency site may be included.

**ANGOLA**

Angola Links (SAEP)
http://www.saeep.org/sadc/country/angola/angolal.html

A site devoted to links revolving around Angola. Includes information on basic facts, news, and information on development and the economy.

Republic of Angola. Government
http://www.angola.org/

Includes information on news, politics, business and economics, reference and arts and culture.

**BENIN**

African Studies : Benin General
http://www.sas.upenn.edu/African_Studies/Country_Specific/Benin.html

Includes various information and links revolving around Benin.

Centre Songhai
http://idf.ext.jussieu.fr/drought/songhai.htm

Centre Songhai is an agrobiologique centre of formation, production, transformation, research and development. Its ambition is to raise the level of life of the populations by a rational use of the local resources, in partnership with all the other actors of the development.

**BURKINA FASO**

Institut de Recherche pour le Développement (IRD)
http://ird.bf/index.html

Dynamique et usages des ressources en eau et des milieux aquatiques

**CAMEROON**

Lake Nyos and Lake Monoun
http://www.biology.lsa.umich.edu/~gwk/research/nyos.html

Describes the gas disasters in Lakes Nyos and Monoun on 26 August 1986, when an enormous volume of carbon dioxide (CO₂) was released from Lake Nyos that killed about 1700 people. Two years earlier in Lake Monoun there was a smaller release of CO₂ that killed 37 people. Two possible explanations for these events were originally proposed, and were centered around a limnologic hypothesis (limnology is the study of lakes and streams) and a volcanic eruption hypothesis. This rare
natural disaster is complex, little understood, and difficult to study. Below and in the accompanying articles it is shown that these events were essentially limnological in origin, and that volcanic activity at the time of the events was absent.

COMOROS ISLANDS

Comoros Islands Government Web Site
http://www.ksu.edu/sasw/comoros/comoros.html

Included information on all aspects of the Comoro Islands including language, climate, population, economy, news, political organisations, etc.

CONGO, DEMOCRATIC REPUBLIC

Democratic Republic of Congo. Government

CONGO, REPUBLIC

Pointe-Noire News
http://www.pointenoire.com/

Information on Pointe-Noire, Congo such as economy, language, weather, travel, accommodations and entertainment.

CÔTE D'IVOIRE

Centre de Recherches Oceanologiques (CRO)

Institut de Recherche pour le Développement (IRD) en Côte d'Ivoire
http://www.ird.ci/

Actuellement, l'IRD mène en Côte d'Ivoire des recherches en partenariat avec différents organismes ivoiriens dans le domaine de la santé, des sciences sociales et économiques de l'environnement et des ressources vivantes. Il participe à la formation du personnel de la recherche de Côte d'Ivoire et apporte une base de connaissances du milieu tropical, un réseau de compétences et de relations scientifiques et techniques utiles au développement.

GHANA

Government of Ghana.
http://www.ghana.gov.gh/

Includes details of some government agencies.

University of Ghana
http://www.ug.edu.gh/

Provides information on all aspects of the University of Ghana including admissions, programs, courses, faculties, libraries and resources and student societies.

Volta River Authority
http://www.vra.com/

A wholly owned Ghanaian statutory public institution created by an Act of Parliament in 1961 to take over from the then Volta River Project Preparatory Commission primarily to develop the Akosombo Hydroelectric Dam and also see to a multi-faceted development of the Volta River Basin. Primary interest is to generate, transmit and (in the northern half of Ghana) distribute electricity. In addition, we have other responsibilities and activities we engage in furtherance of our corporate mandate. These include lake transportation and maritime administration of the Volta Lake, Lakeside health, Management of Akosombo Township among others.
GUINÉE, République

Ministere de la Peche et de l’ Aquaculture
http://www.fis-net.com/guinea/

Provides information on the Ministry of Fisheries and Aquaculture for the Republic of Guinée.

KENYA

Kenya Marine and Fisheries Research Institute
http://www.recoscix.org/toc1.htm

Kenya Marine and Fisheries Research Institute (KMFRI) was born out of the East Africa Marine Fisheries Research Organisation (EAMFRO) and the East African Freshwater Fisheries Research Organisation (EAFFRO).

National Museums of Kenya. Ichthyology Department
http://www.museums.or.ke/resicht.html

This department focuses on the study of fish, both freshwater and marine. The main aim of the department is the development of an ichthyology research unit for the East African region for documentation, information and conservation of the existing fish diversity and fish resources of the region.

MALAWI

Cichlid Fishes of Lake Malawi
http://www.connix.com/~mko/mwfishes.htm

A scientifically oriented, noncommercial site devoted to a fascinating trove of tropical biodiversity, both the largest lake-fish fauna and the largest vertebrate species flock on earth, the cichlids of southeastern Africa’s Lake Malawi. (It is Lake Nyasa or Niassa to the people of Tanzania and Mozambique, who share this giant rift lake with Malawi.)

MAURITIUS

Ministry of Agriculture, Food Technology & Natural Resources
http://ncb.intnet.mu/moa/index.htm

The domain of activity of the Ministry includes agriculture in general, sugar and non sugar activities, livestock, central services to the agricultural sector, food technology and natural resources. The structure of the Ministry evolves around three poles of activities, namely sugar and food technology, non sugar activities and central services and livestock and natural resources.

Ministry of Fisheries & Cooperatives
http://ncb.intnet.mu/fishco/index.htm

The Ministry of Fisheries and Cooperatives acts as a facilitator in providing the necessary support to the development of the fishing industry and the cooperatives sector. For fisheries, the Ministry ensures that the fisheries resources are managed and exploited at sustainable level so that optimum socio-economic benefits are derived while protecting the marine environment. As for the cooperatives sector, the Ministry assists in its consolidation, promotion and development.

MOROCCO

Ministry of Fisheries
http://www.mp3m.gov.ma/
NAMIBIA

Benguela Environment Fisheries Interaction & Training Programme (BENEFIT)
http://www.benefit.org.na/

BENEFIT is a regional partnership between Namibia, Angola and South Africa focused on fisheries and the marine resources of the Benguela current ecosystem off southwest Africa.

National Archives of Namibia (with Links)
http://witbooi.natarch.mec.gov.na/

The National Archives of Namibia will provide a national information service by preserving and making publicly accessible the collective memory of the nation and of the Government of Namibia. It will contribute to the protection of the rights of all Namibians, and enhance a sense of their national identity by acquiring, conserving and providing access to private and public records in all formats and media of national significance; and by guiding the management of central, regional and local Government records.

NIGER

Institut de Recherche pour le Développement (IRD) au Niger
http://www.ird.ne/

RÉUNION

Université de la Réunion
http://www.univ-reunion.fr/sommaire1.htm

Includes all aspects about the university.

SÉNÉGAL

Centre de Recherches Oceanographiques Dakar-Thiaroye (C.R.O.D.T)
http://www.orst.edu/dept/oird/temp/irn/senegal/Crodt.htm

Collectif National des Pêcheurs artisans Sénégalais (CNPS)
http://www.gmt2000.co.uk/apoints/cnps/english/program.htm

Its activities include documenting and taking action on the outstanding claims of fishworkers. CNPS represents some 35,000 fishworkers (men and women), predominantly drawn from Muslim fishermen and their wives (90%). It has however played an important role in promoting religious tolerance and mutual understanding within different sections of the Senegalese artisanal fishworkers community.

Institut de Recherche pour le Développement (IRD) Sénégal
http://www.ird.sn/

L’identification des stratégies d'acteurs compatibles avec le développement durable serait certainement d’une grande utilité en matière de politique des pêches. On s'intéresse aux différences techniques dans la pêche artisanale (changements d'engins, innovations, répartitions, mobilités, etc.). Celles-ci sont d'abord vues comme des changements organisationnels, et seront ensuite interprétées en termes de changement social (“fonctions”) et écologique (“adaptations”), puis enfin en termes de dynamique d'ensemble.

Institut Fondamental d’Afrique Noire Cheikh Anta Diop
http://www.refer.sn/sngal_ct/rec/ifan/accueil.htm

Describes the institute’s purpose and activities
SOMALIA

Somali Fisheries Society
http://somali-fisheries.homepage.com/

Somali Fisheries Society (SFS) is a professional non-governmental organisation representing both Somalia’s marine and fisheries scientists. SFS has no lineage with any political party or factions and it is committed to remain so. It hopes to offer important platforms for fisheries and marine scientists in useful mechanism for people to collaborate on issues of fundamental importance.

SOUTH AFRICA

CSIR Foodtek-FIRI
http://www.foodtek-int.co.za/firi.htm

On 1 April 1995, FIRI was incorporated into the CSIR’s Division of Food Science and Technology (Foodtek) as the Firi Programme. Since 1995, FIRI has expanded to meet the needs of the non-fish food sector of the market while still retaining our expertise in fish and fish products.

Department of Environmental Affairs and Tourism

Covers marine and coastal management, biodiversity, environmental quality and protection.

JLB Smith Institute of Ichthyology
http://www.rhodes.ac.za/affiliates/jlb/

A National Facility of dedicated scientists, environmental educationalists and skilled support staff, committed to the development and care of the national fish collection; to the search for and dissemination of ichthyological knowledge and the conservation of fishes, and to the training of young African scientists for the benefit and upliftment of present and future generations.

Marine and Coastal Management (formerly Sea Fisheries Research Institute)

MCM’s mission is to provide responsible custodianship of South Africa’s marine and coastal resources and ecosystems for the benefit of current and future generations of South Africans. This is achieved by the conservation of such resources and ecosystems through the control of, and the orderly, fair, and equitable access to, their optimum sustainable utilisation. Activities are undertaken in accordance with national and international norms.

University of Cape Town. Centre for Marine Studies
http://emma.sea.uct.ac.za/cms/index.html

University of Cape Town's centre of marine expertise, controlled by a Board and a Steering Committee and run by a full-time manager. Provides a consultancy service which draws on the resource of highly skilled specialists in marine and coastal sciences amongst its teaching and research staff to provide multidisciplinary marine expertise to the broader community. Co-ordinator and facilitator of inter-disciplinary and inter-departmental networking among marine researchers. Promoter of marine, maritime and coastal studies and job creation in southern Africa.

University of Cape Town. Department of Oceanography
http://emma.sea.uct.ac.za/

TANZANIA

Tanzania Coastal Management Partnership
http://www.epiq.or.tz/page2.html
The Tanzania Coastal Management Partnership (TCMP) is a co-operative initiative among the government of Tanzania, the United States Agency for International Development and the University of Rhode Island’s Coastal Resource Centre. The goal of the TCMP is to establish a foundation for effective coastal governance by working closely with intersectoral working groups, the network of existing Integrated Coastal Management (ICM) programs, external technical support and the private sector.

Tanzania Fisheries Research Institute (TAFIRI)
http://www.isp.msu.edu/AFRICANSTUDIES/PLEA/TAFIRI.HTM

Tanzania Fisheries Research Institute (TAFIRI) is a parastatal organisation established in 1980 to cater for fisheries research in the country. The Institute comprises five centers: Mwanza and Soti on Lake Victoria, Kigoma on Lake Tanganyika, Kyela on Lake Nyasa (Malawi) and Dar es Salaam on the Indian Ocean. The last is also the Institute’s headquarters.

University of Dar-es-Salaam. Institute of Marine Sciences
http://www.udsm.ac.tz/marine/super.html

The Institute of Marine Sciences (IMS) of the University of Dar es Salaam was established on July 1st, 1979. It is based in Zanzibar on the premises of the former East African Marine Fisheries Research Organization (EAMFRO). IMS supports a wide ranging interest in marine science and coastal research on a theoretical laboratory and field basis.

TUNISIA

Institut National des Sciences et Technologies de la Mer
http://www.refer.fr/tunis_ct/rec/centrec/instm.htm

Describes the Institute's purpose and studies it conducts.

ZIMBABWE

ALCOM Aquatic Resource Management for Local Communities
http://www.zamnet.zm/zamnet/alcom/alcom.htm

ALCOM is a regional community-based aquatic resource management program, executed by the Food and Agricultural Organization (FAO). Programme activities began in Zambia in 1987 under the “Aquaculture for Local Communities Development Programme”. Today ALCOM collaborates with all SADC member-countries and has pilot projects in four. ALCOMs objective is to enhance outputs from smallholder farming systems and economies through improved management of aquatic resources. In order to reflect this broadened scope, the name of the programme has changed to “ALCOM, Aquatic Resource Management for Local Communities.”
6. QUESTIONNAIRES

The following explanatory letter was sent out in 1999 together with the questionnaires.

**Subject: Directory of Fisheries and Aquaculture Information Resources in Africa**

The Fisheries Department of FAO in collaboration with the Kenya Marine and Fisheries Research Institute is in the process of compiling the above Directory. The Directory will include details of specialised libraries, information centres, databases, internet resources and other information resources on fisheries and aquaculture in Africa.

The Directory will be of benefit to the information dissemination activities of FAO and will be used to encourage and enhance resource sharing activities between institutions within the Region. It is also intended as a reference tool to assist other international organizations and to foster North-South collaboration between fisheries and aquaculture libraries and information centres.

We are gathering as much information as possible via our contacts in FAO and national institutions with the help of the enclosed questionnaire. I would be most grateful if your librarian / documentalist could provide the relevant details and return the form to either of the below addresses. All entries will receive a copy of the Directory as soon as it is available.

A longer period of time than was expected has elapsed and apologies are due to those who responded quickly with the relevant data.

Copies of the questionnaire can be requested via Email, either for new entries or for updating existing information. Please request from fi-library@fao.org
