

TSETSE AND TRYPANOSOMIASIS INFORMATION QUARTERLY

Index

Volume 21

Part 1–4, 1998

Numbers 10255–10712

DFID

SUBJECT INDEX

Numbers refer to the abstract and bibliographic reference numbers appearing in the *Tsetse and Trypanosomiasis Information Quarterly*, volume 21 (1998).

acaricide

beneficial effect of application to domestic animals, 10604

acid α 1-glycoprotein

in human African trypanosomiasis, 10388

acute phase proteins

in human African trypanosomiasis, 10388

acute phase response

T. b. brucei infection of mice, 10518

adenopathy

in human African trypanosomiasis, 10623

administrative criteria

human trypanosomiasis focus, 10616

adrenal gland response

acute trypanosomiasis in rabbits, 10660, 10668

T. congolense infection of rabbits, 10668

Advanced Very High Resolution Radiometer

(AVHRR), 10365

Africa

Central

host preferences of tsetse, 10607
human trypanosomiasis surveillance system, 10493
sleeping sickness situation, 10369
trypanosomiasis epidemics, history, 10485

East

host preferences of tsetse, 10607
T. brucei strain comparison with endemic area, 10677

Northern

ethnoveterinary practices of camel pastoralists, 10367

West

host preferences of tsetse, 10607
PCR for epidemiology of animal trypanosomiasis, 10488

age, of tsetse

field-caught tsetse, 10478
maternal, effect on offspring quality, 10595
measurement, 10478
trypanosome infection, 10490

Ag-ELISA

bovine trypanosomiasis diagnosis, 10501
T. evansi diagnosis, in camels, 10397, 10398, 10498
see also ELISA

agriculture

conversion of rangelands and effect on biodiversity, 10470

agropastoralists

participation in control of trypanosomiasis, 10256

Alamar Blue assay

drug sensitivity determination, 10325

alanine aminotransferase (ALAT)

diagnosis of nervous stage of trypanosomiasis, 10492

albumin

changes in *T. congolense* infection of Zambian goats, 10301

diagnosis of nervous stage of trypanosomiasis, 10492

T. evansi infection of calves, 10650

alkaline phosphatase

diagnosis of nervous stage of trypanosomiasis, 10492

amino acids

aromatic, excretion in *T. evansi* infection, 10659
in sleep and human trypanosomiasis, 10629

anaemia

bovine trypanosomiasis and, 10507
dietary protein effect on *T. congolense*-infected Scottish Blackface sheep, 10406
nutrition effect in animal trypanosomiasis, 10646, 10647
splenomegaly/hepatomegaly not correlated, in *Trypanosoma* infection of rats, 10419
T. congolense infections
buffalo, 10508
cattle, 10511, 10642
Gobra Zebu cattle, 10642
N'Dama cattle, 10508, 10642
rabbits, 10668
rats, 10419
sheep/goats, 10403, 10406
T. vivax, infections of buffalo and N'Dama cattle, 10508

Angola

Cuanza Valley, sleeping sickness (1900-1901), 10366
northern, control of human trypanosomiasis, 10619
recrudescence of trypanosomiasis, 10465

Angotrip/Caritas project

control of human trypanosomiasis, 10619

- 1'-(substituted 9-)anilinoacridines**
antitrypanosomal activity, 10315
- animals, domestic** *see* domestic animals
- animal trypanosomiasis** *see* experimental trypanosomiasis; trypanosomiasis in animals
- anorexia**
cattle, trypanotolerance not affected by, 10399
N'Dama and Gobra Zebu cattle, *T. congolense* infection, 10642
- anthropology**
women and African trypanosomiasis in Chad, 10588
- antibodies**
antitrypanosomal
human trypanosomiasis surveillance, 10621
in serum/CSF, 10283, 10494
autoantibodies
anti-tryptophan-like antibodies, 10629
neurofilament, 10627
in camels, 10474
detection
animal trypanosomiasis diagnosis, 10293
immune lysis test, 10284
in donkeys, 10292
IgM and IgG anti-VSG antibodies, aggregation-disaggregation of *T. brucei*, 10568
monoclonal
alternative oxidase purification, 10356
immunodepletion, 10356
neutralising, *T. congolense* and *T. vivax* infections of buffalo/cattle, 10508
to non-trypanosome antigens in *T. congolense*-infected cattle, 10401
polyreactive, in *T. congolense/T. vivax*-infected cattle, 10401
T. b. gambiense in serum and cerebrospinal fluid, 10283, 10494
T. congolense-infected cattle, 10401, 10508
T. evansi infection, effect on antibody response in vaccinated guinea pigs, 10665
T. vivax, indirect ELISA, 10637
trypanolytic, *T. b. brucei* experimental infection of cattle, 10506
trypanosome tyrosine aminotransferase (TATase), 10499
trypanosusceptible cattle, 10509
trypanotolerance, 10412, 10509
for use in trypanosomiasis control centres, 10260
see also immune response
- antigen-ELISA** *see* Ag-ELISA
- antigenic drift**
intra-host antigenic switching, *T. brucei*, 10418
- antigenic variation**
molecular phylogeny of Salivarian trypanosomes, 10525
new approaches to drug development, 10424
telomeres of *T. brucei*, 10575
trypanosomes, 10435
virulence and, *T. brucei*, 10441
see also variable surface glycoprotein (VSG)
- antigens**
Ag-ELISA for animal trypanosomiasis diagnosis, 10293
non-trypanosomal, antibodies in *T. congolense/T. vivax*-infected cattle, 10401
T. brucei, in donkeys, 10292
T. brucei detection by ELISA, 10657
T. congolense, in donkeys, 10292
T. vivax, 10401, 10633
trypanosomal, in domestic animals in Cameroon, 10633
for use in trypanosomiasis control centres, 10260
see also variable surface glycoprotein (VSG)
- antimonials**
CNS-trypanosomiasis, 10522
- anti-neurofilament antibodies**, 10627
- antiparasitic/antiprotozoal agents**
broad-spectrum, prediction, 10314
prediction by computer-assisted modelling of phosphofructokinase, 10314
structure-based approach to drug discovery, 10318
validating targets, 10326
WHO Model Formulary, 10496
see also drug(s)
- antitrypanosomal compounds**
1'-substituted 9-anilinoacridines, 10315
- antitrypanosomal antibodies** *see* antibodies
- antitrypanosomal drugs** *see* drug(s)
- anti-trypanosomal effects of plants** *see* plant extracts
- anti-tryptophan-like antibodies**, 10629
- Anuak populations**
surveillance of human trypanosomiasis, 10383
- arsenicals**
CNS-trypanosomiasis, 10522
nitroimidazoles with, 10522
T. b. rhodesiense infection, encephalopathy after, 10390
- artificial insemination**
non-fertile oestrus in Zebu cattle infected by *T. congolense*, 10410
- aspartate aminotransferase (ASAT)**
diagnosis of nervous stage of trypanosomiasis, 10492

- astrocyte**
development prevention by eflornithine, 10316
- attractants for tsetse** *see* odour
- Atylotus agrestis***, 10638
- autoantibodies** *see* antibodies
- autoimmune response**
trypanosusceptible cattle, 10509
- autoimmunity**
experimental, idiotype usage by B cells, 10667
- B-1 cells**
antibodies to non-trypanosomal antigens, 10401
- Bacillus thuringiensis* variety *israelensis***
delta-endotoxin, 10605
- baits** *see* odour; odour-baited traps/targets
- bait techniques**
tsetse control in Zimbabwe, 10277
- barriers to tsetse (re)invasion**, 10277
- B cells**
CD5⁺, increase in *T. evansi*-infected sheep, 10648
idiotype usage in experimental autoimmunity, 10667
T. congolense-infected buffalo, 10508
T. congolense-infected cattle, 10508
antibodies to non-trypanosome antigens, 10401
T. vivax infections of buffalo/cattle, 10508
- Benin**
serological prevalence of trypanosomiasis in cattle, 10474
- Berenil** *see* diminazene aceturate (Berenil)
- bilirubin**
diagnosis of nervous stage of trypanosomiasis, 10492
- bioassays**
of deltamethrin applied during tsetse hunger cycle, 10377
diastereoisomer of kolavenol isolation, 10672
- biochemistry**
diagnosis of nervous stage of trypanosomiasis, 10492
experimental *T. evansi* infection, in albino mice, 10309
T. congolense infection of donkeys, 10400
- biodiversity**
plant, impact of land-use change in Zimbabwe, 10589
rangeland, Ethiopia, 10470
- biotopes**
classification, 10381
- blood**
crude heparinised, *T. vivax* DNA detection in sheep by PCR, 10394
dried samples, diagnostic PCR, 10307
effect of *T. congolense* infection of sheep, 10405
lysed, *T. vivax* DNA detection in sheep by PCR, 10394
quantitative buffy coat technique *see* quantitative buffy coat technique (QBC)
sample collection and preparation for PCR, 10622
smears, *T. evansi* diagnosis, in camels, 10498
T. evansi detection by PCR, 10474
volume, dietary protein effect in *T. congolense*-infected sheep, 10406
see also plasma; serum
- blood-brain barrier**
breaching in human trypanosomiasis, 10467
impairment in nervous stage of disease, 10492
T. evansi infection (exp.) of calves, 10650
- bloodmeal**
digestion, male tsetse, 10476
identification and host preferences of tsetse, 10607
isometamidium chloride in, effect on tsetse infectivity, 10655
residual, measurement, 10478
size
correlation with tsetse fat reserves, 10267
G. pallidipes on ox, 10600
- B lymphocytes** *see* B cells
- body reserves**
cattle, trypanotolerance affected by, 10399
see also fat reserves
- bone marrow**
bovine trypanotolerance determinant, 10294
- boscialin**
synthesis and activities of isomers, 10669
- Boscia salicifolia***, 10669
- bovine stem cell factor (SCF)**
in *T. congolense*-infected cattle, 10407
- bovine trypanosomiasis** *see* cattle
- brain**
infection model, *T. brucei* in rats, 10311
inflammation, prevention by eflornithine, 10316
mRNA for IκBα and iNOS, 10422
- breast milk**
environmental pollution, assessment, 10378
- buffalo**
Cape buffalo
serum, trypanocidal protein, 10308
T. brucei and plasma purines, 10515
Glossina species with feeding preference for, 10607
- buffalo (cont.)**
resistance to trypanosomiasis, 10508
T. b. gambiense Group 1, 10489
T. congolense and *T. vivax* development, 10508

buffy coat from haematocrit tubes

T. vivax DNA detection in sheep by PCR, 10394

Burkina Faso

community-based control of tsetse, 10259
factors affecting presence of tsetse, 10381
molecular epidemiology of bovine trypanosomes, 10486
Sissili Province (Yalé pastoral zone), epidemiological survey, 10486
trypanosomiasis risk prediction, 10381
tsetse distribution, 10365
Yalé area, PCR use for trypanosome identification, 10487

burst forming units-erythroid (BFU-E), 10407

bushbuck

Glossina species with feeding preference for, 10607
reservoir for *T. vivax* and *T. simiae*, 10486
urine as *Glossina* attractant, 10376

bushpig

Glossina species with feeding preference for, 10607

cachexia

T. congolense infection of rabbits, 10668

calcium

diagnosis of nervous stage of trypanosomiasis, 10492
serum levels, *T. congolense* infection in sheep, 10295

calves

blood brain barrier status in *T. evansi* infection (exp.), 10650
Jersey, blood brain barrier status in *T. evansi* infection (exp.), 10650
trypanosomiasis, effect on plasma kinetics of i.v. lactose, 10651
see also cattle

camels

antibodies, 10474
camel pox, therapies, 10367
diagnosis of trypanosomiasis, PCR method, 10474
ethnoveterinary practices in Northern Africa and India, 10367
mange, therapies, 10367
surra diagnosis and treatment evaluation, 10397
T. evansi infection
diagnosis by PCR, 10474
diagnosis by tyrosine aminotransferase, 10499
diagnostic methods, 10474
diagnostic tests evaluation, 10498
drug resistance and epidemiology, 10414
epidemiology in Mauritania, 10498

in Kenya, drug resistance, 10321
in Mauritania, 10395, 10498, 10638
prevalence, 10395
self-cure, 10402, 10644
serodiagnostic tests, 10397, 10398
traditional diagnostic methods, 10370
trypanosomiasis, therapies, 10367

Cameroon

Bafia HAT focus, tsetse distribution, 10606
Fontem focus, 10591
case-finding data collection, 10620
trypanosomes in domestic animals, 10633
G. p. palpalis
as dominant species, 10613
infection rate, PCR analysis, 10484
human trypanosomiasis surveillance, 10621
Kapsiki and Namchi cattle trypanosusceptibility, 10411
Manfé, case-finding data collection, 10620
Mbam focus
man-tsetse contact in dry areas, 10608
sociology of trypanosomiasis control, 10586
stages of trypanosomiasis (history), 10592
trypanosomes in domestic animals, 10633
PCR technique on blood of pigs, 10622
Santchou focus, human factors relating to trypanosomiasis, 10591
spatial distribution of tsetse, 10606
trypanosome infection
characterisation by PCR, 10613, 10614
domestic animals, 10633

capillary tube centrifugation technique (CTC)

T. b. gambiense infection diagnosis, 10491

capture techniques for tsetse, 10478

semi-automated, 10478

carbohydrate binding factors

in gut of disease vectors, 10379

carboxylic acid analogues, 10426

card agglutination test for trypanosomiasis (CATT)

animal trypanosomiasis diagnosis, 10293
case-finding in Uganda, 10632
diagnosis of human trypanosomiasis in northern Angola, 10619
T. b. gambiense
infection diagnosis, 10385
prozone phenomenon caused by complement, 10285
T. b. rhodesiense infection diagnosis, 10385
T. evansi
in camels, 10498, 10644
in Mauritania, 10395, 10638

case-finding

data collection on human African trypanosomiasis, 10620
in Uganda by CATT, 10632

cats

T. evansi transmission, 10421

CATT *see* card agglutination test for trypanosomiasis (CATT)

cattle

age, compensation for failure of trypanocidal drugs, 10304

Ankole, trypanosomiasis diagnosis, 10501

Baoulé, *T. congolense* infection, 10643

Berenil liposomes, effect in *T. evansi* infection, 10415

biodegradable polyester-trypanocide devices, 10428

Boran

genetics of trypanotolerance in crosses, 10653

T. congolense infection, 10511

antibodies to non-trypanosome antigens, 10401

T. vivax infection effect on pregnancy, 10298

trypanotolerance, 10294

breeding schemes, 10468

Bunaji (White Fulani), non-fertile oestrus after *T. congolense* infection, 10410

chemoprophylaxis/control of *T. b. rhodesiense*, 10302

control of tsetse

by bait techniques, 10277

G. f. fuscipes by 'pour-on' deltamethrin, 10276

G. m. submorsitans by 'pour-on' deltamethrin, 10275

Friesian, tick infestation susceptibility, 10652

Galana Boran

T. vivax infection effect on pregnancy, 10298

tick infestation susceptibility, 10652

Glossina species with feeding preference for, 10607

Gobra Zebu

food intake/digestion/weight after *T. congolense* infection, 10399

haematological changes in *T. congolense* infection, 10642

Gudali, comparative trypanosusceptibility, 10411

Holstein, *T. b. brucei* infection, 10506

immune response to trypanosomes, 10509

isometamidium and ethidium prophylaxis, 10512

Kapsiki, trypanosusceptibility, 10411

Maasai Zebu, tick infestation susceptibility, 10652

Namchi, trypanosusceptibility, 10411

N'Dama

comparative trypanosusceptibility, 10411

genetics of trypanotolerance, 10468, 10653
mortality causes in Faranah (Guinea), 10408
self-cure ability, 10305

T. congolense infection, 10511

antibodies to non-trypanosome antigens, 10401

development, 10508

food intake/digestion/weight, 10399

haematological changes, 10642

nutrition influence, 10300

T. vivax development, 10508

trypanocidal drug resistance in Côte d'Ivoire, 10305

trypanotolerance *see* trypanotolerance

Orma Boran

T. vivax infection effect on pregnancy, 10298

tick infestation susceptibility, 10652

trypanotolerance, 10510

productivity, after cypermethrin 'pour-on' insecticide, 10297

stem cell factor cDNA and mRNA, 10407

T. b. rhodesiense

chemoprophylaxis/control, 10302

reduced susceptibility *in vitro*, 10671

T. brucei and plasma purines, 10515

T. congolense

anaemia, 10511

transmission cycle, 10486

T. evansi infection, Berenil liposomes effect, 10415

T. vivax

effect on late pregnancy and post-partum cyclicity, 10298

indirect ELISA for antibody detection, 10637

transmission cycle, 10486

trypanocidal drugs

failure to cure infections in Côte d'Ivoire, 10303, 10304

isometamidium and ethidium prophylaxis, 10512

resistance in Côte d'Ivoire, 10303

trypanosomiasis

drug sensitivity in Nigeria, 10640

effect on plasma kinetics of i.v. lactose, 10651

cattle (cont.)

trypanosomiasis (cont.)

isometamidium sustained-release device, 10654

in Kenya, 10306

management approaches by Maasai pastoralists, 10306

molecular epidemiology, 10486

prevalence, Nigeria, 10502, 10639, 10640

prophylaxis, 10302, 10512, 10654

- rates in Côte d'Ivoire, in tsetse control areas, 10396
seasonal prevalence in Nigeria, 10640
serological prevalence, in Benin, 10474
in Togo, 10257
