Committee on Commodity Problems (CCP)
Established in 1949, the CCP – FAO’s oldest technical committee - tracks agricultural commodity markets. It deliberates key issues, debates the effects on food security, and makes policy recommendations. Equally important to the CCP, are the Subsidiary Intergovernmental Groups (IGGs) which focus on trade issues for key commodities.

GLOBAL COMMODITY MARKETS
- Commodity Markets Analysis
- Medium-term outlook
- FAO Food Price Indices
- G20-Agricultural Market Information System (AMIS)

GLOBAL INFORMATION AND EARLY WARNING SYSTEM
- Earth Observation for Crop Monitoring
- Crop Prospects and Food Situation
- Crop and Food Security Assessment Missions
- Food Price Monitoring and Analysis (FPMA)

TRADE POLICY & DIALOGUE
- Trade and Food Security
- Trade and Sustainable Development
- Trade Agreements
- World Banana Forum

EMERGING TRENDS, CHALLENGES AND OPPORTUNITIES
- Migration
- Climate Change
- Foreign Investments
- Global Engagement (G20 and G7)
The State of Agricultural Commodity Markets (SOCO) 2022
The geography of good and agricultural trade: Policy approaches for sustainable development

This edition of The State of Agricultural Commodity Markets (SOCO) discusses how trade policies, based on both multilateral and regional approaches, can address today’s challenges for sustainable development. Trade policies in food and agriculture should aim to safeguard global food security, address the trade-offs between economic and environmental objectives, and strengthen the resilience of the global agrifood system to shocks, such as conflicts, pandemics and extreme weather.
