The **European Fish Price Report**, based on information supplied by industry correspondents, aims to provide guidance on broad price trends. Price information is indicative and should be used only for forecasting medium- and long-term trends. FAO is not responsible for any errors or omissions.

# LATEST TRENDS

In the run-up to the Brussels seafood show, the market appears more influenced by supply variations for individual species and products, rather than any clear weakening of demand. Price levels as indicated by the FAO Fish Price Index also show clearly that current quotations are close to all-time highs, especially for capture fisheries. Rising energy and feed costs are likely to keep fish prices high during the year, especially as alternative protein sources such as meat, are influenced by the same factors.

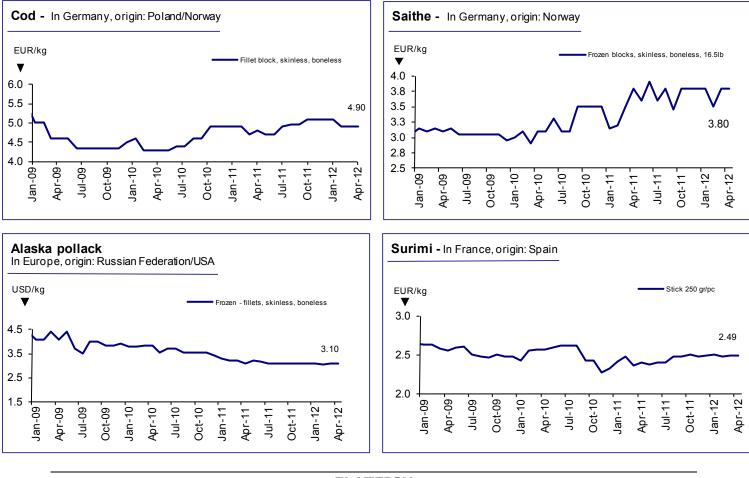

At the same time, prices are important drivers of demand as shown bv the market salmon where lower prices year this are boosting consumption in all markets.

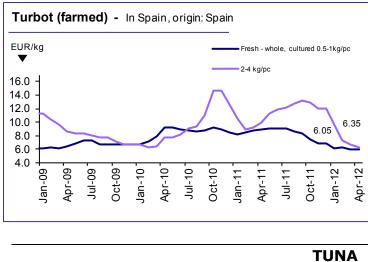

#### GROUNDFISH

Haddock prices of Norwegian origin H&G product have recovered somewhat in the last month and prices of other groundfish species seem to be relatively stable. The price of Alaska pollock fillet blocks also remains stable but an increase in global demand for surimi has pushed up the prices of the minced product.

The price of hoki (Macruronus novazealandiae) has risen, but the price of hake from the North Pacific (Merluccius productus) is still uncertain as the new season's figures are not yet available. Minced hake (Merluccius capensis) prices have also increased.

**FLATFISH** 

Low demand for turbot carried over from March into April, causing prices to continue falling. Farmers are reporting good growths mainly for larger fish over 2 kg, which could make prices for these sizes drop faster.

Poor fishing but steady demand from most of the major canned tuna markets caused the price of skipjack in Bangkok to jump to over USD 2 100/tonne for April deliveries, above the USD 1950/tonne price in March. Efforts by Thai canneries to increase their

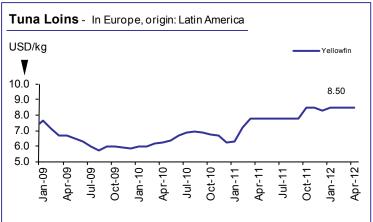

raw material inventories were unsuccessful as finished goods buyers moved quickly in March to fill depleted supply chains. Raw material supply coming into the market therefore was taken up by increased production. Meanwhile, projections for raw material supply to Thai canneries in April are expected to be 25% lower than normal.

The Western and Central Pacific Tuna Commission (WCPTC) annual meeting in March 2012 confirmed the Commission's management measures to control fishing efforts. The Parties to the Nauru Agreement (PNA) imposed a four month ban on FAD fishing that will start on 1 July. This ban is expected to reduce the overall tuna catch, in particular reducing bigeye mortality, in the WCPT fishery.

Fishing remained mixed in the Indian Ocean with most of the French and Spanish fleets operating in the Mozambique Channel. Prices for skipjack and yellowfin 10kg/up were reported to be EUR 1 380/tonne and EUR 1 980/tonne both CNF Seychelles.

Prices in West Africa rose slightly despite poor catches. The price of skipjack in Abidjan was EUR 1 360/tonne ex fishing vessels and yellowfin 10kg/up EUR 2 040/tonne.

Prices for yellowfin 10 kg/up in Manta, Ecuador jumped to USD 2 900/tonne from USD 2 650/tonne ex fishing vessel. The price of skipjack was unchanged at USD 2 050/tonne, USD 50 to USD 100/tonne lower than the price in Bangkok, which is unusual as Manta prices are normally higher.

With the increasing cost of skipjack and the 6% duty quota still not filled, the cooked loin market was firm with pricing at USD 6 000/tonne CNF Spain. The market price for double cleaned yellowfin loins remained at USD 8 500/tonne DDP Italy, but with expectations that it will increase as a result of the increasing cost and scarcity of yellowfin raw material.

#### SMALL PELAGICS

This year the EU executive decided to allocate a total allowable catch (TAC) for Spain and for France of 29 700 tonnes for anchovy. In 2011 the TAC was 15 600 tonnes. The season began on 1 March and will end on 30 June but so far Cantabrian fishermen have been unable to catch anchovy because of the large quantity of mackerel in the sea.

The average price of anchovy in the auction centres is expected to be EUR 2 per kilogram compared with EUR 1.70 reported last year.

The herring market is exceptionally tight with prices at very high levels. Export volumes from Norway are down this year except for the Russian market.

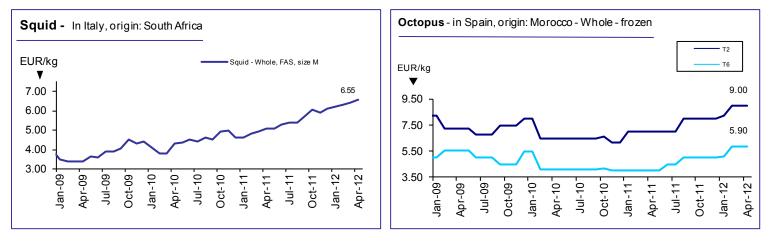

Norway's mackerel exports, in contrast, are up this year with strong demand in Russia and China. Prices are also good for the producers and exporters.

#### CEPHALOPODS

No information on the export of cephalopods from India to Europe is available at present. This is probably because the price and payment conditions in Europe are very bad and processors prefer to export to China where demand is good. Catches are also very poor and what little there is exported to China in whole form.

Squid catches in South Africa continue to be very low. High water temperatures and the lack of the south-easter wind may be the reason. There is no local stock holding and any landed product is shipped straight away. Prices are high and with the rand slightly weaker against the Euro, some relief is being felt by the industry.

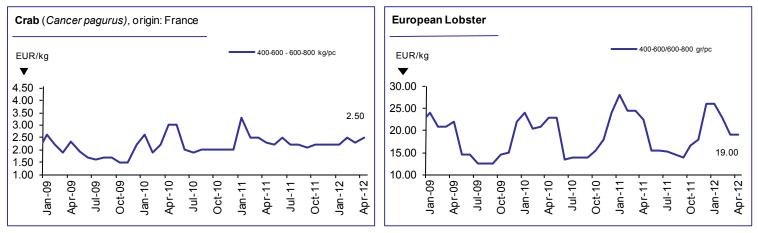

The spring season ban on octopus fishing in Morocco has been in effect since 1 April.

#### CRUSTACEANS

The new lobster season in Canada starts on 1 May and therefore new prices are not available yet. The market might have improved during the April holidays. In Germany, some retail food chains will reportedly stop selling lobster because of animal welfare concerns.

For crab, the Irish Food Board reports decreased landings and a relatively quiet market.

### SHRIMP

Vannamei prices in Spain remain stable, but purchasing prices at origin increased by USD 0.15 FOB prices compared with February. The demand for vannamei principally from Ecuador, Venezuela and Colombia is higher than current production levels, and more harvests from Central America will only be available in 4 to 6 weeks time.

The fishing season in southern Argentina for red shrimp (*Pleoticus muelleri*) started on 16 March. Captures are currently high with good availability of medium sizes (L2 (20/30) and L3 (30/40)), lower amounts of L1 (10/20) and L4 (40/60) sizes. Part of the fleet stopped fishing because of low international prices.

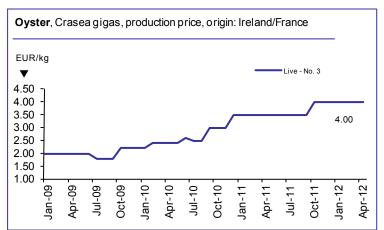

Low stocks of L1 and L2 in Europe are causing prices of these bigger sizes to firm, especially L1. For other sizes, some stocks remain from the previous season, and, together with the present good catches, prices remain stable despite an increase in demand at Eastertime.

In India, supply is poor at present as the main shrimp harvest will only start at the end of April.

#### **BIVALVES**

The Northern European Mussel season is over and the market remains quiet in France with low consumer spending.

Blue mussels of Dutch and Irish origin were present in the market in March, however, supply from both origins was reported to be tight. Dutch auction sales came to a halt at the end of March and are not expected to start again until mid-summer. French barfleur

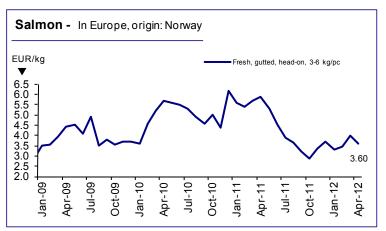

mussels are expected to come on to the market in late spring. Mediterranean mussel presence may increase temporarily.

Oyster prices remained firm because of a decrease in supply. The market is quiet as warm weather approaches.

#### SALMON

Atlantic salmon prices are vacillating almost on a weekly basis in a somewhat nervous market. Total production for the year is expected to be up from 2011 by between 10 and 15% but demand is also good given that prices are far below those of last year. Current European demand is positive with Norwegian

fresh exports increasing by 14% during Easter week compared with the Easter week of last year.

Norway's salmon exports for the first quarter jumped 28% with good volume growth in all segments, including Russia (+66%), EU (+25%) and Japan (+38%). China and Viet Nam were also markedly stronger. The only negative exception is the US market where Chilean producers have returned in force to the detriment of Norwegian suppliers.

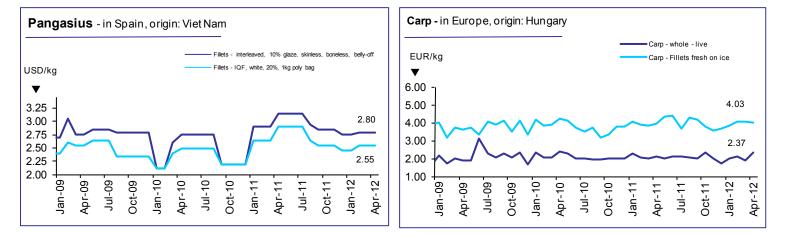

That price is an important driver behind strong salmon sales is shown by the solid growth in Norway's exports to Southern European markets where overall consumer demand is weak; imports by Spain, Italy, Greece and Portugal were all at record levels during the quarter.

TROUT

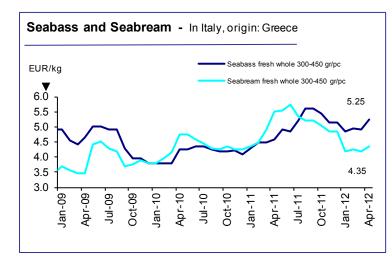

Trout is one of the export winners this year from Norway with shipments up 71% during the first quarter compared with 2011. Demand is strong driven by attractive prices, on average 31% lower than last year. Both Russia and the EU markets have increased their purchases from Norway, whereas Japanese buying interest has almost disappeared, as a result of stronger Chilean exports to that market.

#### FRESHWATER FISH

Carp purchasing activity in Hungary increased slowly and prices showed little change.

#### SEABASS/SEABREAM

Lower sea temperatures in the Mediterranean than is normal for the season is slowing growth for the new generation supply. Prices are rising for the moment and the market can be expected to firm further until mid summer.

# EUROPEAN PRICE REPORT

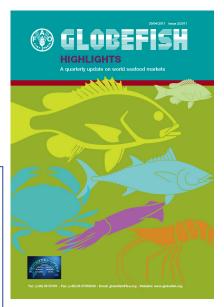

-			
the le	GLOBEFISH EUROPEAN PRICE REPORT		
Issue 01/2010 January 2010	The European Fish Price Report, based on information supplied by industry correspondents, aims to provide guidance on brand price trends. Price information is indicated and should be used only for forecasting medium- and long-term trends. PAD is not responsible for any errors or amissions.		
INDEX FOR PRICES	LATEST TRENDS		
Groundfish 6			
Flatfish 7	The Christmas and year end season were influenced by the economic crisis. There was a marked preference for eating at home rather than		
Tuna 7	out. Consumers' choice for home cooking included higher priced seafood items, such as lobster, most likely for use in special meals celebrating the season's events. As a result, demand for seafood was		
Small Pelagics 7	strong at the retail level, while restaurant demand was rather sluggish.		
Cephalopods 8	GROUNDFISH		
Crustaceans 8	The new EU Ataska sellinek		
Bivalves 9	regulations In Europe, origin: Resisten Redenation/USA		
Salmon 10	IUU fishing are v Frozen-files, shifes, brokes		
Trout 10	difficulties for the 9.5-		
Freshwater fish 11	groundfish market. 25. 3.80 At present, not all the 15		
Non Traditional Species 11	countries are able to		
	comply with the new a s s s s s s s s s s s s s s s s s s		
Seabass 11	will be a shortage of Surimi - In France, origin: Spain		
Seabream 12	Alaska Pollack and		
HEORE SALES	Chinese skis, there have been same and the same skip of the same skip of the problems, as in the aware of the documentation they		

12 issues per year

The **European Fish Price Report** provides monthly prices on more than 400 fish products and an overview of the major trends for each commodity on the European market. An extensive correspondent network reports on current market prices in the European market from both capture fisheries and aquaculture.

> The GLOBEFISH Highlights provides a quarterly detailed update on market trends for a variety of commodities. Key market data is presented in time series or graphs with analysis of trends and news for commodities such as tuna, groundfish, small pelagics. shrimp, salmon, fishmeal/ fishoil, cephalopods, bivalves and crustaceans.
