Herring

COMMODITY update

The COMMODITY UPDATE reports, issued for each commodity once a year, contain information on prices, imports, exports and production by commodity. The information is taken from the network of GLOBEFISH correspondents and the GLOBEFISH European Price Report, INFOFISH Trade News, FAO FISHDAB, EUROSTAT and others.

The issues are scheduled approximately as follows:

FISHMEAL - FISH OIL –*Spring*

BIVALVES - *Spring*

SALMON - *Spring*

FRESHWATER FISH - *Spring*

SHRIMP - *Summer*

TUNA - *Summer*

CRAB - *Autumn*

LOBSTER - *Autumn*

CEPHALOPODS - *Winter*

GROUND FISH - *Winter*

SMALL PELAGICS - *Winter*

<p>For single issues please contact GLOBEFISH Viale delle Terme di Caracalla 00153 Rome ITALY Tel: ++39 0657056313 Fax: ++39 0657055188 E - mail: globefish - pub@fao.org Web site: www.globefish.org</p>	<p>For an annual subscription to the complete set please contact EUROFISH H.C. Andersens Blvd. 44-46 1553 Copenhagen V Denmark Tel: ++45 33377755 Fax: ++45 33377756 E - mail: info@eurofish.dk Web site: www.eurofish.dk</p>

World herring production, by major countries, in 1 000 tonnes	25

Low herring catches and high prices characterise herring market

In the second quarter of the year, very limited raw material was available from last season. Margins on herring increased during this period. Prices tended upward. Production went up in September as still plenty of quotas were available.

In the second quarter of 2009, Norwegian production of whole frozen herring was 9 000 tonnes, sharply down from the 26 000 tonnes produced in the same period of 2008. Herring fillets production was also lower in the second quarter of 2009: 24 000 tonnes, 25% less than one year earlier. This decline in production was due to little raw material available. Norwegian herring production is based on the catch of North Sea herring, which had low priority this season. Due to the shortage margins increased to 1.63 up from 1.5 in the second quarter of 2008.

Norwegian net sales of herring

Net sales of herring increased to Russia. Some 98 million NOK were sold to this country in the second quarter of 2009, up from 60 million NOK in the corresponding period of 2008. This was mainly due to sales of contract stored products. Also net sales more than doubled to the EU. The only area reporting lower sales of Norwegian herring were non-EU countries. This decline was due to a preference for capelin. These increases were realized in spite of volumes being more or less equal to the previous year, which indicates that prices went up impressively.

Africa is back as an interesting client of frozen herring. Here mainly small sized fish is sold, which is later processed in the traditional way.

Exports of Norwegian frozen whole herring increased in volume by 52% from 322 800 tonnes in 2006 to 491 500 in 2008, averaging a 23% year-on-year growth. The first quarter of 2009 also showed excellent growth compared with 2007, but a slight drop on 2008, down from 204 000 tonnes to 198 700 tonnes.

Source: Norwegian Seafood Export Council

The Russian Federation was the biggest export market for Norwegian exports of this product. This market grew by 8% over the period to 163 400 tonnes in 2008; however in 2007 it received 207 500 tonnes, which accounted for 52% of the 2007 exports. Exports to Nigeria grew significantly from just 3 100 tonnes in 2006 to 138 500 tonnes in 2008. The Ukraine was a relatively stable market during the period, ranging from 89 200 in 2007 to 79 400 in 2008. This meant that the share of total exports going to the Ukraine fell from 27% in 2006 to 16% in 2008. Imports of fresh and frozen herring into Japan fell by 18% from 42 800 tonnes in 2006 to 35 000 tonnes in 2008, although the volume dropped to just 27 600 tonnes in 2007.

Imports

Fresh and Frozen Herring: Japan

Total	35.7	38.4	30.2	13.6	16.0	19.5

Source: Statistisches Bundesamt

Between 2006 and 2008, German imports of frozen herring fell by 15% from 35 700 tonnes to 30 200 tonnes, but experienced an increase in 2007 to 38 400 tonnes. Total imports in the first quarter of 2009 were up by 30% on 2007 volumes, and up 18% on 2008, thus showing a steady increase during this period. Imports from Denmark accounted for 50% of the overall volume in 2006 and 36% in 2008, but just 11% in 2007, when the bulk of supply switched to Norway. German imports of Canadian frozen herring increased by +622% from just 500 tonnes in 2006 to 3 600 tonnes in 2008; although in 2007 there was 5 200 tonnes of this product imported. Imports from the UK varied between around 9% in 2006 and 2008 to 18% (7 000 tonnes) in 2007, making up for some of the reduction in imports from Denmark.

Market outlook very positive

Strong demand and consumption in Russia and Eastern Europe will be the main driver for sales of herring in the top season. Underlying consumption is strong, but financial stability and access of capital will have great importance for ability to put great volumes into the markets. Herring is still traditional food and is regarded as some of the cheapest proteins available. The transition to more herring fillets continues.
