

How it works?

A quick overview of the main components used for this demonstration

A SINGER demo web site providing simple search functionalities was implemented in order to allow the selection of accessions and simulate a germplasm ordering process.

SINGER Web Site

Ordering Tool Kit 'OTK'

An Ordering Tool Kit Web site was design linked to SINGER demo site. The 'OTK' allows users to proceed with their germplasm order following the SMTA principles.

SINGER Knowledge makes the difference

Welcome to the SINGER germplasm ordering system DEMONSTRATION SITE!

WARNING - WARNING - WARNING - WARNING
THIS SITE IS AIMED AT DEMONSTRATION PURPOSES. THE INFORMATION IT CONTAINS HAS BEEN EXTRACTED FROM THE SINGER DATABASE AND MODIFIED IN ORDER TO DEMONSTRATE THE POTENTIAL USE OF AN ON-LINE GERMPASM ORDERING SYSTEM.

[See the Demo](#)

The System-wide Information Network for Genetic Resources (SINGER) is the germplasm information exchange network of the Consultative Group on International Agricultural Research (CGIAR) and its partners.

Together, the members of SINGER hold more than half a million samples of crop, range and tree diversity in their germplasm collections. This diversity is vital for food security and agricultural development. SINGER provides easy access to information about this diversity.

THE SINGER PUBLIC SITE CAN BE ACCESSSED AT:
[HTTP://SINGER.CGIAR.ORG](http://SINGER.CGIAR.ORG)

Welcome to PID Server!

PID Server is used to obtain Permanent Identifiers (PIDs) by natural and legal persons wishing to participate in Standard Material Transfer Agreements (SMTAs) under the International Treaty on Plant Genetic Resources for Food and Agriculture.

You can now:

- Find out what PIDs are and why you need one
- Register to obtain your own PID
- Transfer your PID ownership
- Search the PID Server database
- Send inquiries about PID Server to info@pidserver.org
- Go to the PID Server Website
