

# CRITICAL-MAINTAINED BREEDS LIST

The Critical-Maintained Breeds List is an inventory of all breeds on which there is data to suggest that the total number of breeding females is less than or equal to 100 or the total number of breeding males is less than or equal to five; or if the overall population size is less than or equal to 120 and decreasing and the percentage of females being bred to males of the same breed is below 80 percent and it is not classified as extinct, but are maintained by an active conservation programme or populations are maintained by commercial companies or research institutions. The breeds are listed alphabetically by most common name within each species (mammalian species followed by avian species). This list includes 79 local breeds.
