Let’s see what you can do to enhance the soil organic matter content of your soil in a sustainable manner.

**UNSUSTAINABLE MANAGEMENT**

- BARE SOIL
- EXCESSIVE OR INAPPROPRIATE TILLAGE
- EXCESSIVE WATERING
- OVERGRAZING
- CONVENTIONAL FARMING/MONOCULTURE
- MISUSE OF FERTILIZERS

**SUSTAINABLE MANAGEMENT**

- ADDING COMPOST, MULCH, PLANT RESIDUES, GREEN MANURE
- REDUCED TILLAGE (decreased tillage frequency and depth)
- SUSTAINABLE WATER MANAGEMENT
- SUSTAINABLE GRAZING & PASTURE MANAGEMENT (e.g. grazing frequency and intensity)
- CROP VARIETY MIXTURE, INTERCROPPING, CROP ROTATION
- JUDICIOUS USE OF FERTILIZERS

Let’s see what you can do to enhance the soil organic matter content of your soil in a sustainable manner.
