Global Forest Resources Assessment 2020

Desk Study

Isle of Man

Rome, 2020

FAO has been monitoring the world's forests at 5 to 10 year intervals since 1946. The Global Forest Resources Assessments (FRA) are now produced every five years in an attempt to provide a consistent approach to describing the world's forests and how they are changing. The FRA is a country-driven process and the assessments are based on reports prepared by officially nominated National Correspondents. If a report is not available, the FRA Secretariat prepares a desk study using earlier reports, existing information and/or remote sensing based analysis.

This document was generated automatically from a desk study. FAO cannot be held responsible for any use made of the information contained in this document.

TABLE OF CONTENTS

Introduction

1. Forest extent, characteristics and changes
2. Forest growing stock, biomass and carbon
3. Forest designation and management
4. Forest ownership and management rights
5. Forest disturbances
6. Forest policy and legislation
7. Employment, education and NWFP
8. Sustainable Development Goal 15

Introduction

Introductory text

No official report has been received from Isle of Man. This report is the result of a desk study prepared by the FRA secretariat in Rome, which summarizes existing available information using the established format for FRA 2020 country reports.

Isle of Man is in the Irish Sea between Ireland and the United Kingdom and Northern Ireland. Hills and mountains make up much of the island's interior, with tall trees and deep valleys. There is a plain in the north, leading to cliffs at the coast. The highest point is the summit of Snaefell, at 621 m.

The Isle of Man has a temperate climate, with cool summers and mild winters. Average annual rainfall is high compared to the majority of the British Isles. Temperatures are cool, with the recorded maximum being 28.9 °C at Ronaldsway. Isle of Man is known for its overcast skies and low levels of sunshine.

Forests cover 6.1% of the island. Trees in the Isle of Man are protected under The Tree Preservation Act 1993. The Department of Environment, Food and Agriculture (DEFA) administers the Act. Trees that have a trunk diameter greater than 8 cm measured at a point 152 cm above ground level cannot be felled without a licence issued by DEFA. [\[1\]](#)

1 Forest extent, characteristics and changes

1a Extent of forest and other wooded land

National Data

Data sources + type of data source eg NFI, etc

Isle of Man Ecological Habitat Survey (Phase 1 Report) 1991 - 1994

National classification and definitions

-

Original data

Source: Isle of Man Ecological Habitat Survey (Phase 1 Report) 1991 - 1994

FRA 2005 Categories	Area (hectares)
	1991-94
Forest	3 459.9
Other wooded land	0
Other land	52 945.6
...of which with tree cover ¹⁾	0
Inland water bodies	103.1
TOTAL	56 508.6

Analysis and processing of national data

Estimation and forecasting

The figures for Other land have been adjusted with an additional 700 hectares in order to get a total surface area that correspond to the total area as reported by the UN Statistics division.

Assumed no change.

Reclassification into FRA 2020 categories

Not needed.

FRA categories	Area (1000 ha)
