Global Forest Resources Assessment 2020

Report

Tajikistan

Rome, 2020

FAO has been monitoring the world's forests at 5 to 10 year intervals since 1946. The Global Forest Resources Assessments (FRA) are now produced every five years in an attempt to provide a consistent approach to describing the world's forests and how they are changing. The FRA is a country-driven process and the assessments are based on reports prepared by officially nominated National Correspondents. If a report is not available, the FRA Secretariat prepares a desk study using earlier reports, existing information and/or remote sensing based analysis.

This document was generated automatically using the report made available as a contribution to the FAO Global Forest Resources Assessment 2020, and submitted to FAO as an official government document. The content and the views expressed in this report are the responsibility of the entity submitting the report to FAO. FAO cannot be held responsible for any use made of the information contained in this document.

TABLE OF CONTENTS

Introduction

1. Forest extent, characteristics and changes
2. Forest growing stock, biomass and carbon
3. Forest designation and management
4. Forest ownership and management rights
5. Forest disturbances
6. Forest policy and legislation
7. Employment, education and NWFP
8. Sustainable Development Goal 15

Introduction

Report preparation and contact persons

The present report was prepared by the following person(s)

Classifications and definitions

1987	National class	Definition
	Forest	Natural complex in which communities the trees of one or many species growing close from each other and forming more or less close forest stand prevail, the areas more than 0.1 ra.
	Other wooded land	The lands covered by bush vegetation and rare stood trees, groups of trees growing on fields, along coastal zone of the mountain rivers.
	Other land with trees	Urban park, squares and gardens

1990	National class	Definition
	Forest	Natural complex in which communities the trees of one or many species growing close from each other and forming more or less close forest stand prevail, the areas more than 0.1 ra.
	Other wooded land	

		The lands covered by bush vegetation and rare stood trees, groups of trees growing on fields, along coastal zone of the mountain rivers.
	Other land with trees	Urban park, squares and gardens

2000	National class	Definition
	Forest	Natural complex in which communities the trees of one or many species growing close from each other and forming more or less close forest stand prevail, the areas more than 0.1 ra.
	Other wooded land	The lands covered by bush vegetation and rare stood trees, groups of trees growing on fields, along coastal zone of the mountain rivers.
	Other land with trees	Urban park, squares and gardens

2003	National class	Definition
	Forest	Natural complex in which communities the trees of one or many species growing close from each other and forming more or less close forest stand prevail, the areas more than 0.1 ra.
	Other wooded land	The lands covered by bush vegetation and rare stood trees, groups of trees growing on fields, along coastal zone of the mountain rivers.
	Other land with trees	Urban park, squares and gardens

2010	National class	Definition
	Forest	

		Natural complex in which communities the trees of one or many species growing close from each other and forming more or less close forest stand prevail, the areas more than 0.1 ra.
	Other wooded land	The lands covered by bush vegetation and rare stood trees, groups of trees growing on fields, along coastal zone of the mountain rivers.
	Other land with trees	Urban park, squares and gardens

2015	National class	Definition
	Forest	Natural complex in which communities the trees of one or many species growing close from each other and forming more or less close forest stand prevail, the areas more than 0.1 ra.
	Other wooded land	The lands covered by bush vegetation and rare stood trees, groups of trees growing on fields, along coastal zone of the mountain rivers.
	Other land with trees	Urban park, squares and gardens

2016	National class	Definition
	Forest	Natural complex in which communities the trees of one or many species growing close from each other and forming more or less close forest stand prevail, the areas more than 0.1 ra.
	Other wooded land	The lands covered by bush vegetation and rare stood trees, groups of trees growing on fields, along coastal zone of the mountain rivers.
	Other land with trees	Urban park, squares and gardens

Уважаемые коллеги,

Сообщаем Вам, что за последние годы инвентаризация лесов не проводилась. В прошлом году в рамках проекта "Адаптация к изменению климата путём рационального лесопользования в основных водосборных бассейнах Таджикистана" (KAFT), финансируемой банком развития Германии (KFW) проводятся работы по инвентаризации лесов в 4-х лесных хозяйствах. По данным сборника охраны окружающей среды Республики Таджикистан за 2017 года, общий запас насаждений за последние годы составляет 5.11 млн. куб.м
