2. Zoom features

8. The Secretariat will act as “host” of the virtual meeting, together with the Co-Chairs, and will be responsible for checking and admitting participants through a virtual **waiting room**. The host and co-hosts will be able to monitor all participants’ activities and enable/disable access to the meeting as appropriate.

9. The **Host** may set all participants to mute upon entry, however all participants may mute/unmute their own audio. It is requested that participants keep the microphone on mute, unless when needing to speak, to allow a better audio quality for all. Silent observers should keep their microphone set to mute throughout the course of the meeting.

10. Participants are requested to keep their **video** on, where possible, to help facilitate the work of the Co-Chairs. It is advised to display your full name and country on your video or profile screen (depending on the device you are using this may be modified by clicking on your display name or the three dots appearing on your video image and selecting *Rename*).

11. The Co-Chairs will provide information on the protocol for requesting the floor at the beginning of the meeting.

12. **International dial-in numbers.** If you do not have access to a desktop, laptop or smartphone Zoom App, it is possible to use a **dial in** number followed by the meeting ID and pound key to join the meeting. In this case, please inform the Secretariat prior to the meeting so that a separate instruction on “how to connect” using **dial in** can be sent to you. Kindly note that your participation would be limited to audio only.

13. Participants can access Zoom from all devices, via web browser or App. It is strongly recommended downloading the App on your device for a better user experience and using a PC/laptop with ethernet (land wire) connection rather than Wi-Fi.

3. System requirements to join in a Zoom meeting

- PC or laptop with a good, stable internet connection. Smartphone is also possible.
- Speakers and a microphone, built-in or USB plug-in or wireless Bluetooth.
- A webcam or HD camcorder, built-in or USB plug-in.
