MUFPP Monitoring Framework Pilot Cities Project

Nairobi City County Case Study Presentation
Presenter: Winfred A. Katumo

Montpellier
October 9, 2019

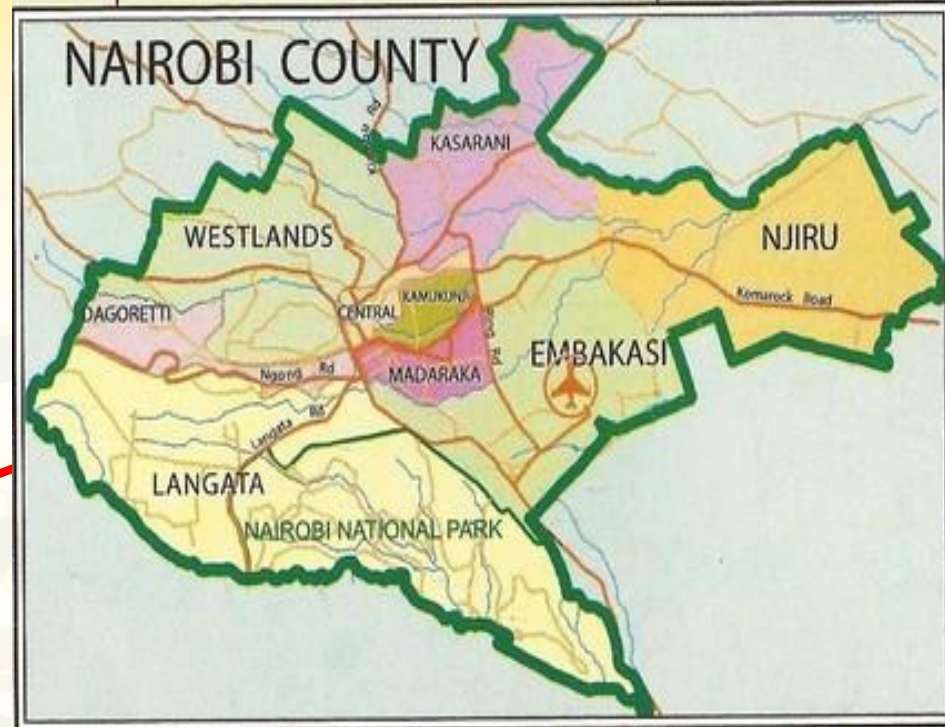

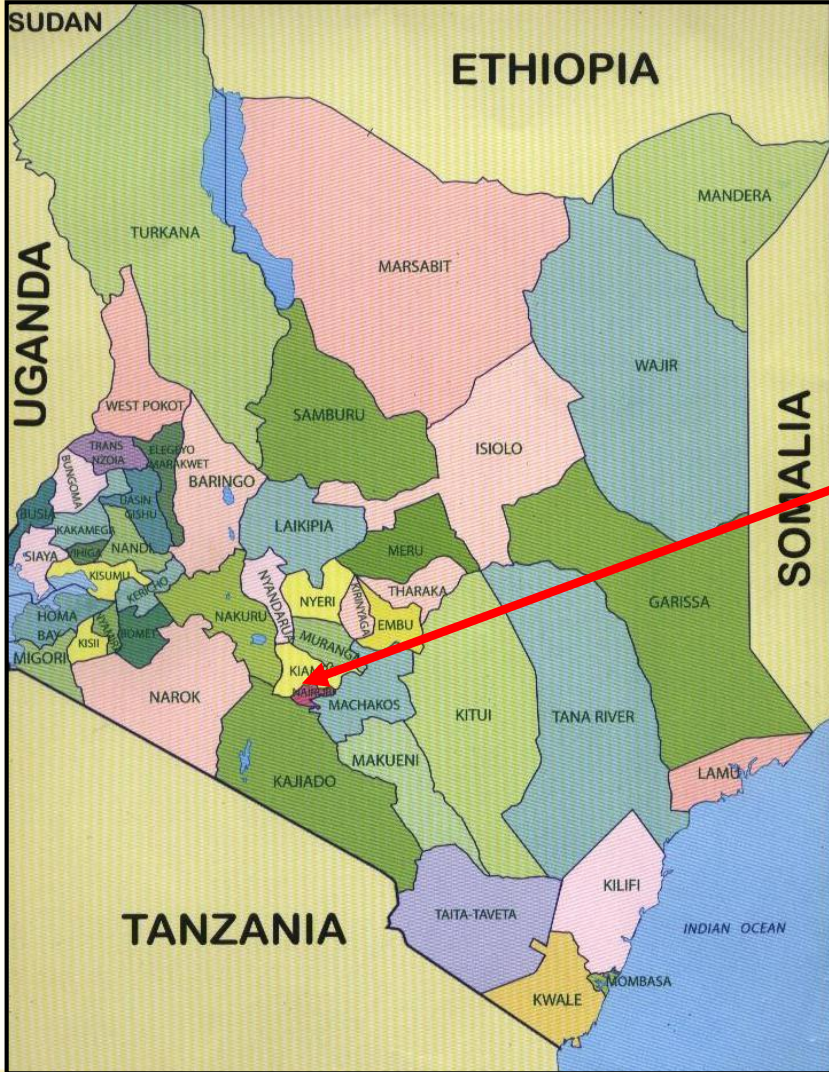

RESEARCH
PROGRAM ON
Water, Land and
Ecosystems

OUTLINE

1. Indicator selection , data collection & results
2. Using the data
3. Challenges in using the framework & coping strategy
4. Benefits in using the framework

LOCATION OF NAIROBI - KENYA

Size: 696 km²

Population: 3.134 million (2009) (Current estimate is 5,000,000)

1. Indicator selection, data collection, results

MUFPP	Indicator selected	Reasons	Data collection method	Results
Food governance	#3	On-going activity; ease of access to data and information	Desk review	Present
Sustainable diets and nutrition	#11	“	“	< 5 yrs = 954 (prev. 0.15%) > 5yrs = 56,310 (prev. 1.3%)

Indicator selection, data collection, results cont...

MUFPP	Indicator selected	Reasons	Data collection method	Results
"	#12	"	"	6.8%
Social & economic equity	#20	"	"	19.59% (n = 122,342)
"	#23	"	"	Present
Food production	#26	"	"	Present
"	#30	"	"	17,491

Indicator selection, data collection, results cont...

MUFPP	Indicator selected	Reasons	Data collection method	Results
Food supply & distribution	#36	Capacity	Census in 2 locations	Site1 = 86 per 1000 Site2 = 5.5 per 1000
“	#37	Ease of access to data	Desk review	2.3%
“	#39	“	“	Present
Food waste	#33	“	“	0.6%
“	#43	“	“	Present

Pictorials

Demonstration of fish harvesting & vegetables production on cone garden

Fresh fruit and vegetable market, Korogocho

New market under construction, Westlands, Nairobi

Inspection of fish and meat

Waste segregation and sorting station

2. Using the data

Learnt that:

- Nairobi City County government is implementing the MUFPP
- some articles have been implemented as part of the historical governance measures
- others were deliberately brought on board following MUFPP monitoring project
- implementation for some articles is well done, while others need re-focussing within government
- Institutionalizing the indicators framework within government will ensure full operationalization of MUFPP

3. Challenges in using the framework & coping strategy

Challenges

- Limited knowledge on MUFPP for majority of staff & stakeholders

Coping Strategy

- City MUFPP Lead Person training in Rome & participation in 3rd MUFPP Forum for Africa in Niamey
- Continued capacity building by RUAF
- Sensitization of;
 - 40 Government officials
 - 50 Stakeholders

Challenges in using the framework & coping strategy cont....

Challenges

- Limited time on piloting of indicators monitoring
- Limitation of funds for implementing MUFPP monitoring

Coping Strategy

- Dedicated team and each indicator had a team leader
- External facilitation from FAO & RUAF

4. Benefits in using the framework

- Greater collaborations within the sectors and also across sectors
- Recognition of gaps within the existing indicators
- Potential for funding of joint projects or programs to address existing issues

THANK YOU

Members of Cross-sectoral Consultative Group on 4/6/19
