ITEM I.  OPENING OF THE MEETING

1. The Third Meeting of the Standing Committee on the Funding Strategy and Resource Mobilization (the Funding Committee) was opened by the Co-Chairs, Mr. Manrique Altavista (Argentina) and Ms. Katlyn Scholl (USA). The Funding Committee had elected Ms. Scholl to replace Mr. Alwin Kopse of Switzerland as Co-Chair, by electronic means, in advance of the meeting.

2. The Co-Chairs welcomed the Members of the Committee, and active and silent observers, recalling that the Committee had agreed to hold its third meeting virtually, due to the COVID-19 pandemic. The List of Participants is provided in Appendix 2 to these Proceedings.

ITEM II. AGENDA AND TIMETABLE

3. The Committee adopted its Agenda, as given in Appendix 1 of this document, and the Provisional Timetable set out in Appendix 1 of the document, SFC-3/20/2, Provisional Annotated Agenda and Timetable. Upon consensus of the members of the Committee, the Co-Chairs accepted the proposal by Brazil to include a discussion on comments previously submitted on the Proceedings of SFC-2, under Agenda item VI, Other Business.

ITEM III. RESOURCE MOBILIZATION

4. The Co-Chairs welcomed the participation of a number of external experts and active observers from the European Union, FAO, the Global Crop Diversity Trust and an agribusiness research and analysis company, IHS Markit, all of whom were invited to give the Committee updates and information related to outreach for resource mobilization and the draft strategy to mobilize funds from food processing industries.

Announcement by the European Union

5. In a statement to the Committee, a representative from the Directorate General for International Partnerships from the European Union, Mr. Darrell Sexstone, expressed the EU’s continued appreciation for the International Treaty’s work to conserve invaluable natural resources, particularly in developing countries and centres of crop biodiversity.

6. Mr. Sexstone informed the Committee of the European Union’s decision, contained in its Annual Action Plan 2020 for Food and Nutrition Security, to support, in principle, the Treaty’s Benefit-sharing Fund with a further grant of four million Euros and to also earmark a grant of three million Euros for continued support to the Global Crop Diversity Trust’s work with gene banks. The Co-Chairs welcomed the announcement and thanked the EU for their continued support to the Benefit-sharing Fund and the broader implementation of the Treaty.
7. Mr. Alexander Jones, the Director of FAO’s Resource Mobilization and Private Sector Partnerships Division gave a presentation on FAO’s new Private Sector Engagement Strategy 2021-2025. The Committee thanked Mr. Jones for the insights provided on the new Strategy’s approach, modalities and the private sector consultations undertaken to inform its development. The Committee considered the insights as useful information in taking forward the Treaty’s own work on engaging with the Private Sector, including with the food processing industry.

Opportunities for the Treaty in FAO’s preparatory work for GEF-8

8. A representative from FAO’s GEF Unit in the Office of Climate Change, Biodiversity and Environment, Mr. Sameer Karki, gave a presentation on FAO’s preparatory work for the 8th Funding Cycle of the Global Environment Facility (GEF-8), noting that the Treaty Secretariat had been actively engaging in the process through the technical advisory group and the CBD Secretariat.

9. He highlighted the importance of the Treaty and FAO working together to ensure strong visibility and contributions toward conserving PGRFA by the GEF constituents, and noted several relevant entry points for doing so under the GEF’s new Private Sector Engagement Strategy. These entry points can include food systems, biodiversity mainstreaming and enabling activity support.

10. The Co-Chairs encouraged the continued collaboration between FAO, a GEF Partner Agency, and the Treaty Secretariat and welcomed FAO’s proposed strong engagement with the Treaty in developing priority areas of work for GEF-8.

11. They also welcomed the proposed initiatives of FAO to further raise the profile of the Treaty by working with other GEF agencies such as UNDP and UNEP, as well as the opportunities presented to create capacity, demand and actions from countries for designing and accessing innovative projects on PGRFA.

Overview of the Food Processing Industry

12. Mr. Paul Hughes, Chief Agricultural Economist & Director of Research, Agri-Business Intelligence, for IHS Markit provided the Committee with an overview of the Food Processing Industry along the supply chain and current major trends in consumer preferences regarding food products. He noted that in making a case for engaging with the sector, issues that were ultimately appealing to its consumers must be considered as well as the direct benefits to the food processing industry stakeholders themselves, such as better genetic materials for farmers. He highlighted the diversity of players across the food supply chain that make up the food processing industry, their different sizes, entity types, markets and consumers. He informed the Committee of a number of broad trends currently emerging in consumer preferences regarding food products that may be of relevance to the Treaty including sustainability, traceability of origin, third party certifications and plant based proteins.

13. The Committee noted the importance of better understanding the landscape of the food processing industry, and food chain more generally, in order to develop tailored engagement strategies that were aligned and responsive to the interest areas of food processing industry actors.

14. The Co-Chairs noted the opportunities to link the strategy to mobilize resources from the food processing industries by reaching the food processing industry through industry associations. This could include approaching platforms and networks that the Treaty has existing relationships with such as the International Coffee Council, the International Olive Council, the International Organisation of Vine and Wine, and seed sector platforms.

Update on resource mobilization and outreach initiatives

15. The Secretary provided an update to the Committee on a number of global initiatives that offer opportunities for leveraging and mobilizing resources for the Treaty. These include the new global biodiversity framework, the GEF-8 program, the COVID food systems measures and packages that countries are putting in place, the International Year of Fruit & Vegetables, and numerous joint initiatives with the Global Crop Diversity Trust.
16. Recalling Resolution 10/2019,¹ the Crop Trust provided an update to the Committee on its resource mobilization and outreach work and on related joint initiatives with the Treaty Secretariat. Such initiatives include:

- the development of an Emergency Reserve to enable rapid and immediate assistance to MLS collections;
- development of initiatives to mobilize funds from innovative sources and mechanisms, including the on-going collaboration to the launch of a Food Security Bond;
- a new global initiative in support of genebanks for capacity building, pre-breeding, seed system linkages and Svalbard back-ups;
- Global Conservation Strategies; and, numerous joint communications and outreach activities, including a series of international panels, and collaborative outreach efforts in upcoming international forums, such as the UN Food Systems Summit and European Development Days.

17. The Committee welcomed the expanded cooperation between the Treaty Secretariat and the Crop Trust, in particular in relation to joint fundraising, and thanked the Trust for the update on the launch of the Food Security Bond and other resource mobilization activities.

18. Concerning the Emergency Reserve, the Secretariat recalled that since 2018, it had been exploring the possibility of establishing such a fund in consultation with the Crop Trust and with guidance from the Bureau. At its last meeting, the Bureau requested the Secretary to share the concept note for the Reserve with the Standing Committee. The Secretariat informed the Committee that the concept note is currently being developed jointly with the Crop Trust and that it will made available to the Committee once finalised.

19. The Co-Chairs thanked the external experts, active observers and Secretariat for their updates and presentations and invited members of the Committee to share any developments taking place in their own countries or regions, that may be of interest to the Committee. The Co-Chair, Mr. Altavista, shared an update on the developments taking place in his Region in preparation for the GEF-8 program, and the resulting opportunities arising for the Treaty. Brazil informed the Committee that a national fund had been created for the centralization and redistribution of benefits arising from the use of genetic resources and associated traditional knowledge, for actions focused on research, development and conservation of genetic resources and the protection of traditional knowledge. The fund was established as part of Brazil’s 2015 “Biodiversity Bill”, which regulates access to genetic resources, protection of traditional knowledge and monetary and non-monetary benefit sharing. While the bill came into force some years ago, the management structure of the fund and the creation of the fund account were only recently finalized.

Draft Skeleton Outline of the strategy to mobilize resources from the food processing industries

20. The Committee discussed the draft skeleton outline of the strategy to mobilize resources from the food processing industries, the comments received by Committee members in advance of the meeting, and additional comments raised during its meeting.

21. The Committee requested the Secretariat to continue to develop the draft skeleton outline of the strategy based on the discussions and comments received and present it at a virtual check-point prior to SFC-4 for the Committee’s further consideration. A final draft, incorporating any further comments received would be prepared for the Committee’s finalisation at its fourth meeting.

22. In developing the strategy further, the Committee requested the Secretariat to invite input from external experts, including through collaborating with the Crop Trust, to provide a deeper understanding of the food processing industry along the food chain and the Treaty’s value proposition.

¹ Resolution 10/2019, paragraph 8: The Governing Body: Recommends that the Crop Trust continue expanding cooperation with the International Treaty on resource mobilization, in particular on joint fundraising activities with the Secretary, and encourages donors to consider initiatives, projects and programmes that are jointly designed and implemented by the Crop Trust and the Secretary;
23. The Committee discussed the scope of the strategy and agreed that it should not be limited to only mobilizing financial resources for the Benefit-sharing Fund, in light of the broad benefit sharing provisions within the text of Article 13.6 of the Treaty, and thus could also consider opportunities for engaging the private sector to support other aspects of the Multilateral System and broader implementation of the Treaty. It also noted that while mobilizing financial resources should be the ultimate objective, it would be important to explore engagement with the sector beyond financial contributions, as part of the strategy.

24. The Committee noted that the Treaty’s work on engaging with the private sector could serve as a useful example of a model for private sector engagement in the implementation of the FAO Strategy on Mainstreaming Biodiversity across the Food and Agriculture sector.

25. The Committee noted that the introductory text of the Strategy and objective should relate back to Article 13.6 and that further discussion may be needed by the Committee, and in the Governing Body, on the interpretation its provisions.

26. The Committee also noted that the strategy should include an implementation, monitoring and evaluation plan, which could be provided as a separate information document, as it may be difficult to reach an agreement on both the strategy and implementation matters together in such a short time frame. It was also acknowledged that the implementation issues would be informed by the strategy, and could be updated over time. It was noted that such a plan should identify the roles and responsibilities of the actors for the strategy’s implementation, and that related text could also be included in the broader strategy document.

27. The Committee agreed that the Strategy should, in principle, take into account FAO’s new private sector engagement strategy, while recognizing the specificity of the Treaty’s objectives and provisions. However, that clarity should be provided on the possible implications of engaging with the private sector that the Treaty may need to be cogniscent of.

ITEM IV. BENEFIT-SHARING FUND OPERATIONS

Monitoring, Evaluation and Learning (MEL) Framework of the Benefit-sharing Fund

28. The Secretariat presented the document, *Draft Monitoring, Evaluation and Learning (MEL) Framework of the Benefit-sharing Fund*, and acknowledged the inputs provided by the Global Crop Diversity Trust to its development.

29. The Committee thanked the Secretariat for preparing the draft MEL framework, noting that it was a good basis for continuing to develop it further and requested the Secretariat to provide a further developed framework to the Committee at its fourth meeting. It requested that, in doing so, it consider the recommendations emerging from the independent evaluation of the Third Cycle of the Benefit-sharing Fund.

*Options for BSF-5*

30. The Secretariat presented a range of possible options for the Committee’s consideration for the design of the fifth project cycle of the Benefit-sharing Fund, as set out in the document, *Options Paper for BSF-5* and invited the Committee to provide its guidance.

31. Related to the options for designing the funding allocation, the Committee expressed preference for advancing options B1 and B2, and possibly option A. It noted that some questions remained on options C and D about how these would work in practice, and that they may require further discussion. The Committee further agreed that the options to be explored further should consider how projects funded could leverage further resources available at national or regional levels.

32. The Committee noted the importance of taking into consideration the relevant recommendations of the independent evaluation of BSF-3, as well as considerations related to recovery from the impacts of COVID-19, in preparation for BSF-5.

33. The Committee requested the Secretariat to prepare a first draft of the BSF-5 program, based on the guidance provided and preferences expressed, for discussion at its fourth meeting.
34. Committee members agreed to support the Secretariat, as appropriate, on outreach and resource mobilization for BSF-5, including at the UN Food Systems Summit. It noted, given the crowded and competing agenda of the Summit, that there was an opportunity for greater impact if outreach and visibility was part of the broader agrobiodiversity agenda.

35. The Committee also requested the Secretariat to consult partners and relevant units within FAO on further opportunities for supporting the implementation of BSF-5, and update the Committee at its fourth meeting.

**ITEM V. FUTURE WORK OF THE FUNDING COMMITTEE**

36. The Co-Chairs noted that the agenda of the SFC-4 will follow the three focus areas of the operational plan of: Resource Mobilization; Benefit-sharing Fund Operations; and, Monitoring and Review to enable the Committee to take forward its planned work for the biennium. They also noted that a key output of the meeting will be the finalisation of the Committee’s report to GB-9.

37. The Committee requested the Secretariat to make arrangements for a virtual checkpoint prior to its fourth meeting for the Committee to consider and provide comments on the further developed draft strategy to mobilize funds from food processing industries.

38. The Committee agreed to delay the date of the SFC-4 meeting from April to June or July, due to the heavy workload and short timeframe between the Committee’s third and fourth meetings. The Co-Chairs agreed to work with the Secretariat and consult the international events calendar to identify a suitable date.

39. The Co-Chairs confirmed that, given the prevailing constraints resulting from the COVID-19 pandemic, the Committee’s fourth meeting would be held virtually, unless there were any significant changes. An updated timeline will, in due course, be provided to the Committee after consultation between the Co-Chairs and Secretariat.

**ITEM VI. OTHER BUSINESS**

40. The Co-Chairs informed the Committee that a minor amendment to the BSF-4 dates in the Operational Plan had been proposed by the Secretariat following the analysis undertaken on the impact of COVID-19 on portfolio implementation, which indicated a delayed timeframe for some BSF-4 projects.

41. The Co-Chairs noted no objections to the proposed adjustment of the concluding dates to the BSF-4 program from 2023 to 2025, and requested the Secretariat to reflect this in the Operational Plan accordingly.

42. The Committee discussed the observation of Brazil regarding the discrepancy in language of Article 13.4 of the Treaty, as reflected in paragraph 29k of Resolution 3/2019. The Committee agreed to resolve the matter by making a recommendation to the Ninth Session of the Governing Body to consider updating the reference, as appropriate, to reflect the exact language of Article 13.4 of the Treaty.

**ITEM VII. PROCEEDINGS OF THE MEETING**

43. The Co-Chairs expressed their appreciation for the constructive contributions of the members at its third meeting and thanked the external experts, active and silent Observers for their participation, and for the efforts made by the Secretariat in preparing for the meeting.

44. These Meeting Proceedings contain the summary of the Committee’s discussions at its third meeting. The final version incorporates any comments which members may have subsequently provided electronically.
Appendix 1

INTERNATIONAL TREATY ON PLANT GENETIC RESOURCES FOR FOOD AND AGRICULTURE

THIRD MEETING OF THE STANDING COMMITTEE ON THE FUNDING STRATEGY AND RESOURCE MOBILIZATION

23 – 26 February 2021

DRAFT PROVISIONAL AGENDA

1. Opening of the meeting
2. Agenda and timetable
3. Resource Mobilization
   a) Outreach for resource mobilization
   b) Draft outline of strategy to mobilize funds from food processing industries
4. Benefit-sharing Fund Operations
   a) Monitoring Evaluation and Learning (MEL) Framework
   b) BSF-5 options paper
   c) Guidance provided on outreach initiatives for resource mobilization for BSF-5
5. Future work of the Committee
6. Other business
7. Meeting proceedings
# List of participants

**SFC-3**  
23 – 26 February 2021
