### BACKGROUND

The EU-supported **TAP-AIS project**, which is scaling up the TAP Common Framework at both national and regional levels, is operational since August 2019. Two years on, FAO has conducted assessments of Agricultural Innovation Systems (AIS) in Burkina Faso, Eritrea, Malawi, Rwanda and Senegal in Africa; Laos and Cambodia in Asia-Pacific and Colombia in Latin America. The capacity needs assessments of organizations are gradually being rolled out and action plans developed for some countries.

TAP-AIS project aims at strengthening national capacities for innovation by promoting and scaling the TAP Common Framework on CD for AIS. This event is contributing directly to the current TAP Action Plan by showcasing national experiences on strengthening AIS, including assessments and capacity development.

At this point, it is important for the country teams to share findings and learning throughout the capacity development phase, and to exchange views with TAP members to explore opportunities for in-country collaborations, synergies with other DeSIRA projects and additional support from TAP members on specific challenges. Therefore, this side event will be an opportunity to share information, updates, experiences and needs that could benefit other country teams and the global project in general.

### OBJECTIVES

The side event has the following specific objectives:

1. To facilitate mutual learning and networking across country teams
2. To raise awareness of TAP Partners about country-level activities and
3. To explore opportunities for TAP Partners to support country-level activities
