Online now: Oxford Research Encyclopedias

With today's overabundance of information and misinformation, it becomes difficult to identify trustworthy sources. The Oxford Research Encyclopedias, published by Oxford University Press, were created to meet this challenge. These are dynamic digital encyclopedias continuously updated by leading scholars and researchers. These tools provide researchers with unbiased, up-to-date, and accurate information on topics of particular importance to FAO staff.

FAO Library now subscribes to two subject-focused editions of the Oxford Research Encyclopedia:

[Oxford Research Encyclopedias: Climate Science](#)

[Oxford Research Encyclopedias: Environmental Science](#)

Each of these editions have their own editor-in-chief and editorial team. Essays are written for a wide audience looking for basic overview information on key topics. Each entry is designed to be read in a half hour or less and contains an elaborate bibliography.

Reminder: A complete list of FAO Library's digital subscriptions for FAO Staff can be found [here](#).

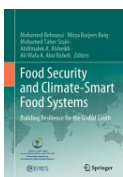

Happy World Book Day!

Last week, on April 23rd, FAO Library celebrated World Book Day by honouring a legacy of great thinkers in agriculture, development, and food security. From our own David Lubin to marine biologist Rachel Carson, social and environmental activist Wangari Maathai, and many others, these thinkers constitute the heart of our library collection. Please enjoy this [video on Twitter](#) from April 23rd.
