Marine and coastal aquaculture detection and monitoring using free satellite data

A demonstration of innovative aquaculture cage and pond detection based on satellite data analysis and AI. The H2020 Blue-Cloud project combined innovations in satellite data analysis and spatial data management in a scalable and powerful e-infrastructure that makes IT accessible also for resource poor organizations.

Speakers: Anton Ellenbroek (FAO - Italy), Jeremy Augot (CLS - France), Tarunamulia (National Research and Innovation agency - Indonesia)
