# EUROPEAN PRICE REPORT

## Latest trends

Cost of production continues high for the capture fisheries, despite a general decline in fuel prices. Despite this, and despite the strong demand that characterises the summer period, prices started to trend downwards in the European market. This is especially surprising for fish products used in the hotel, restaurant and catering (HORECA) sector, such as squid, shrimp, and octopus.

In this issue of the European Fish Price Report, more prices moved down (31 percent) than up (26 percent). Declines in prices were mainly for some traditional groundfish species, cephalopods and shrimp. These price trends need to be seen in connection with the persistent inflation rate in Europe leading to rising interest rates which is impacting disposable income and consumer demand, including for fish products.

### GROUNDFISH

As already described in the May issue of the European Fish Price Report the significant reduction in prices for continued in June 2023 after record levels reached last year. Companies with high inventories bought at the high prices prevailing in 2022 are waiting for further evolution of the market. At the moment there is low demand from the supermarkets and final consumers.

The hake market also shows signs of decreasing demand and good supply, especially for products coming from Namibia and South Africa. As a result, prices declined by about EUR 0.20 per kg.

June 2023  
6/2023

### Index for prices

Groundfish	8
Flatfish	10
Tuna	11
Small Pelagics	12
Cephalopods	13
Crustaceans	15
Bivalves	17
Salmon	18
Trout	18
Freshwater fish	18
Non Traditional Species	19
Seabass-Seabream-Meagre	20

The European Fish Price Report, based on information supplied by industry correspondents, aims to provide guidance on broad price trends. Price information is indicative and should be used only for forecasting medium- and long-term trends. FAO is not responsible for any errors or omissions.

## GROUNDFISH (cont.)

With regard to wet-salted cod fillets from frozen raw material (*Gadus macrocephalus*) and wet-salted cod fillets (*Gadus morhua*) from fresh raw material of Faroese and Icelandic origin, nowadays the situation is quite calm. Temperatures have increased a lot in Southern Europe, which does not help the consumption of these products, which is generally considered a winter product. Prices are expected to remain stable, unless, for the next few weeks/months, there are further changes in cod fishing in the relevant countries. It is a wait and see situation.

## TUNA - BILLFISHES

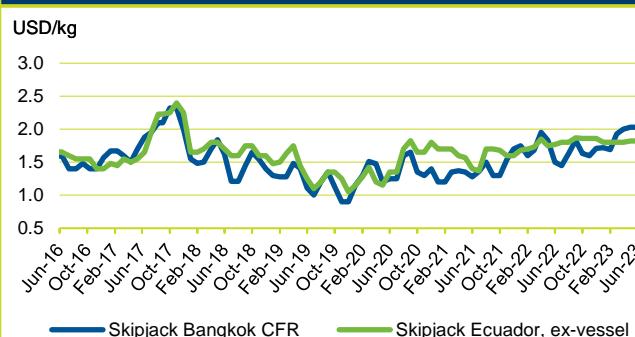

Fishing in the Western and Central Pacific has improved while carriers from the Indian Ocean are still supplementing raw material supplies. Despite the improvement in fishing, there is limited downward pressure in fish price due to the upcoming 3-months FAD closure commencing on 1 July. The skipjack price remains steady. However, buying interest is still limited due to the high prices.

Catching in the Indian Ocean slows down but raw material inventories at local canneries remain at the healthy level. Catches continue to be transhipped to carriers and diverted to other destinations. With the reduction in catches, both skipjack and yellowfin prices increase.

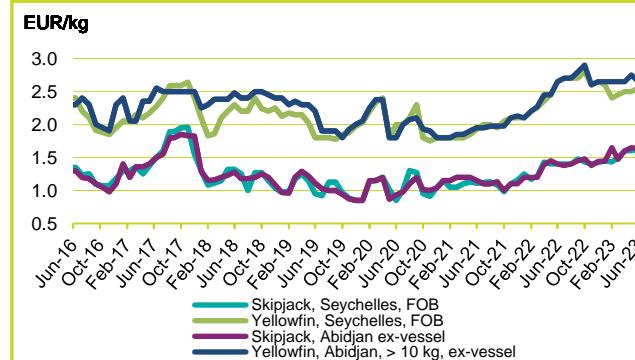

Fishing in the Atlantic Ocean improves slightly but fish size is reportedly small. Local canneries continue to report shortage in raw material. The skipjack price remains steady, while the yellowfin price falls due to the reduction in demand from the European market.

There is no change in the situation in the Eastern Pacific Ocean. Fishing continues to be good and demand from Latin American markets remain firm. Both skipjack and yellowfin prices remain stable.

### TUNA - Pacific Ocean

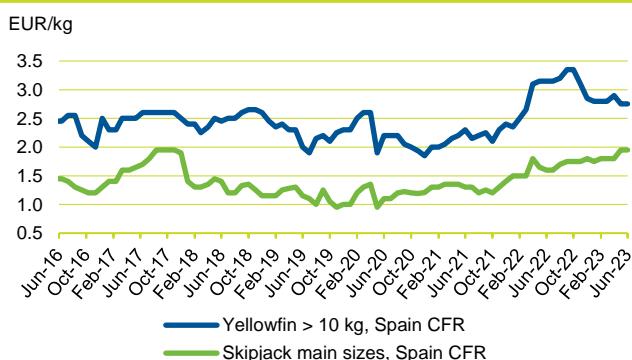

### TUNA - Indian/Atlantic Oceans

## TUNA – BILLFISHES (cont.)

In line with world prices, European prices for both skipjack and yellowfin, too, remain steady, while the indicative price for cooked, single cleaned skipjack loins continue to increase.

### TUNA - Spanish canneries

### TUNA - Loins

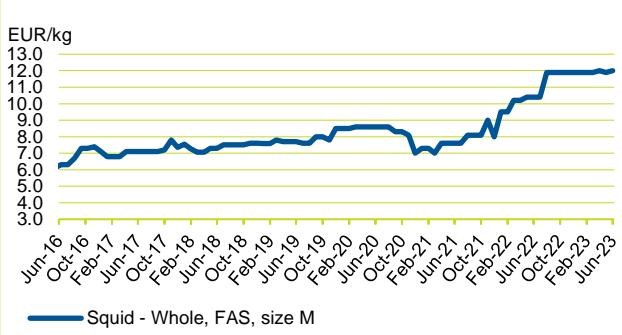

## CEPHALOPODS

The squid season in South Africa reopens only on 1 July. Prices in Euro have remained firm at previous levels but in terms of the local currency (the Rand) they have improved as the South African Rand has weakened relative to the Euro. Locally stocks are almost nil after the long period of catch bans.

Moroccan octopus prices declined sharply, especially for the bigger sizes. This was mainly due to good catches, but also due to a saturation of the Spanish market. Prices declined by EUR 2.00 per kg for the T1 and T2 (large size) categories.

### SQUID - in Italy, origin: South Africa

During low season, price is stable and since a few months ago. Catching keep from out of Java such as Makassar, Lombok, Sumbawa, etc. Java season will start from September estimated. However, Octopus exports from Indonesia are going mainly to United States of America, China, and European Union these days.

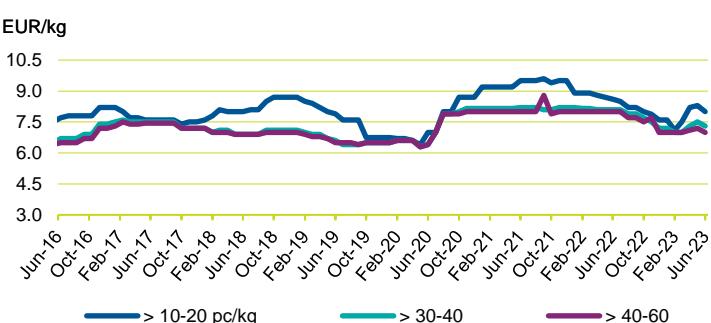

## CRUSTACEANS

Surprisingly prices of shrimp have been decreasing due to dropped demand from the United States of America. Indonesian packers have been mainly exporting to this country that now should be facing a glut stock continuously since the end of last year. However, supply is not going up despite the low price. Normally during this time of the year, prices go up as European traders fill up for the holiday season, where shrimp is in strong demand.

Argentine shrimp reported declining prices as well, as the shrimp fishing has started in the North of the country. In addition, demand in Spain is reportedly lower than anticipated.

Lobster and crab are in good supply, due to the start of the European fishing of these species. As normal in this period, prices have started to move downward in the Italian market. This comes as a surprise in the general climate of strong demand for all seafood which is going to the HORECA sector. On the other hand, North American and European lobster (*Homarus spp.*) are in good demand, and prices increased by EUR 3-4 per kg.

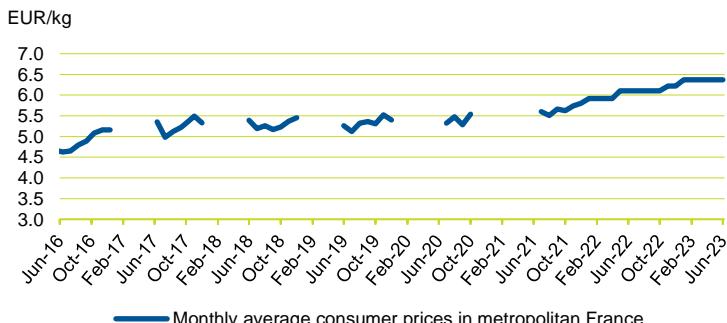

### ARGENTINA RED SHRIMP - origin: Argentina

## BIVALVES

Bivalve is a product in high demand during summer months, especially in the Southern part of the continent. Prices of mussels and clams moved up during the month of June by as much as EUR 0.50 per kg, which is a lot for a product which normally has quite stable price margins.

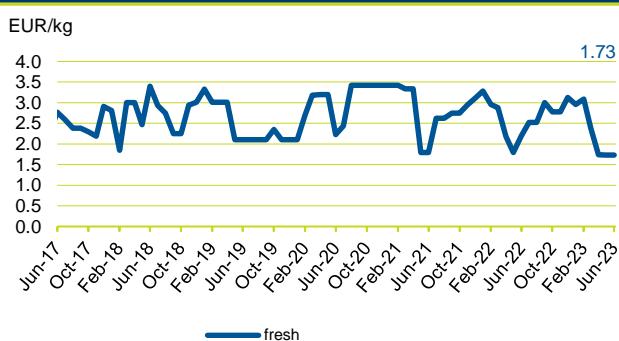

### MUSSEL BOUCHOT - in France

## SMALL PELAGICS

The spring spawning herring quota in Norwegian waters is 40 percent fished. Herring fishing in the North Sea was reported as poor, with only 44 000 tonnes taken in mid-June, of the total quota of 115 000 tonnes. The size of the fish taken was reported as smaller than usual. Fishers also reported that not even the start of the summer with warmer temperature led to improved fishing. The lower than expected production led to higher herring prices. On the other hand, mackerel seems to be in ample supply, with declining prices.

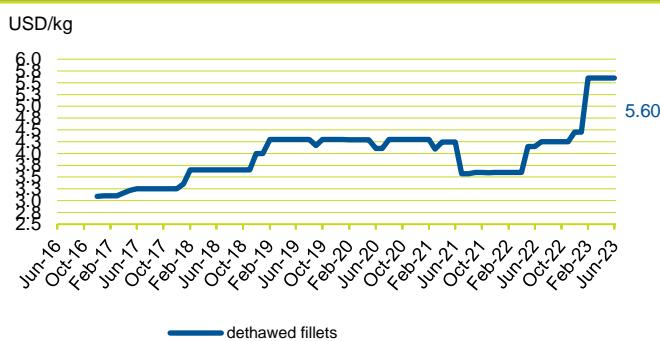

### Mackerel - in Italy, origin: France

## FRESHWATER

Pangasius exports from Viet Nam declined sharply over the course of 2023. In the first five months of the year, export earnings were down 28 percent. In addition, it is reported that production of fingerlings in the country is poor at the moment, which might lead to lower supply during the second half of the year.

### Pangasius - in Italy, origin: Viet Nam

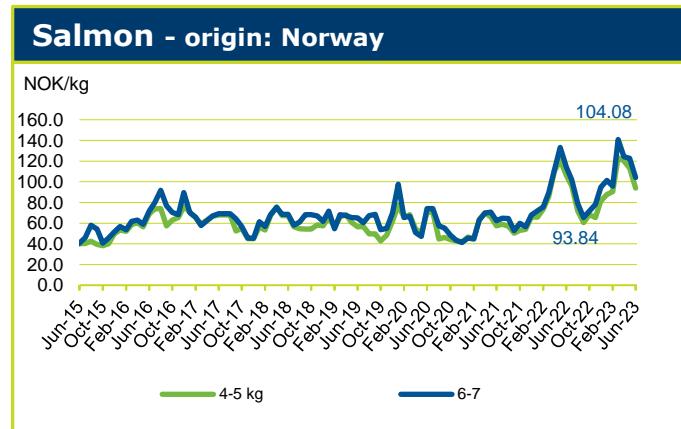

## SALMON

The Norwegian Parliament confirmed the reached agreement on the salmon farming tax after several months of discussion. The effective tax rate will be reduced from 35 to 25 percent, while the discount on the property tax value for farming concessions increases from 50 to 75 percent. While the original proposal was strongly criticized by the industry, this reduction apparently is receiving a more positive feedback, although companies are now studying details of the final tax and evaluating investments.

## SALMON (cont.)

According to the Norwegian Seafood Council (NSC), a fall in the total home consumption of seafood, including salmon, was observed in all major European markets in recent months, as many consumers are adjusting their shopping habits by choosing cheaper products and reducing consumption of both meat and fish.

Norway exported 82 148 tonnes of salmon worth NOK 9.6 billion in May, down 2 percent in terms of volume but a 14 percent increase of the export value compared to May last year. The NSC says that the growth trend at the most important market for Norwegian salmon, the European Union, has reversed. One example of this is the fresh whole salmon to Europe, with the export volume falling 6 percent to 44 874 tonnes, while the price measured in Euros fell by 4 percent.

On the other hand, there is a strong demand for salmon in China, with an export volume of 3 297 tonnes in May, which is 86 percent higher than the same month last year. The HORECA sector and demand in the grocery trade for fresh salmon for home consumption are important channels for Norwegian salmon in this market. Other Asian countries, such as the Republic of Korea and Thailand are also increasing purchases of the Norwegian salmon.

FOB prices for Norwegian fresh Atlantic salmon (sales to export markets at the Norwegian border) declined from NOK 120.31 (EUR 10.43) at week 16 to NOK 108.99 (EUR 9.35) at week 19, but then registered a rollercoaster trend up to NOK 113.06 (EUR 9.49) at week 22, meaning a 4 percent increase compared to previous week (21), according to data collected by the NSC in June.

Meanwhile, fresh headed and gutted Atlantic salmon (1-3 kg) from Scottish farms delivered to UK factories strongly declined from GBP 9.35 (EUR 10.64) at week 16 to GBP 6.85 (EUR 7.88) at week 20, but started to climb at GBP 7.50 (EUR 8.72) at week 22, up 9.48 percent compared to week 20.

## TROUT

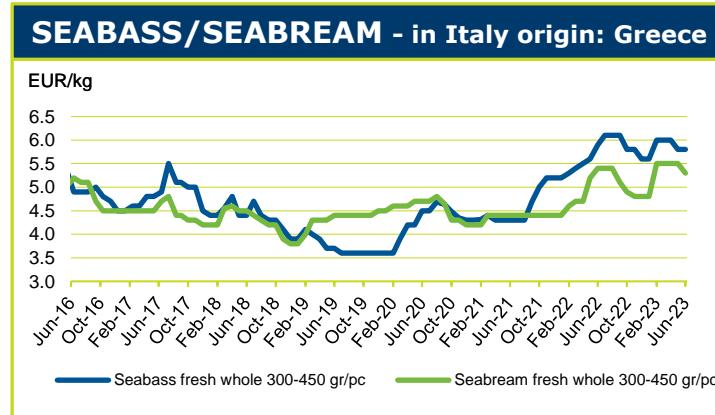

Norwegian trout exports fell during the fifth month of the year. Norway exported 3 085 tonnes worth NOK 361 million in May, which represented declines of 24 percent in terms of volume and 13 percent in value compared to May last year.

The United States of America, Thailand and Lithuania were the three biggest markets for trout in May, registering a change with the previous month, when Ukraine occupied the place of Lithuania. Poland had the largest increase in value this month, with an increase in export value of NOK 16 million (301 percent), compared to the same month last year, while export volume accounted for 201 tonnes (up 213 percent).

According to the NSC data prices, fresh Norwegian trout, H&G, FOB prices regarding sales to EU export markets at the Norwegian border reached NOK 96.76 (EUR 8.12) at week 22, which means an increase of 4.14 percent compared to the previous week. Nevertheless, prices at week 19 were posted at NOK 111.92 (EUR 9.60).

## SEABREAM/SEABASS

Seabass and seabream found in the European market are generally coming from aquaculture, but the wild products are also available and command a premium price. Generally wild seabass and seabream are bigger in size than cultured species. In the Paris wholesale market wild seabass (800-1000 g per piece) from trawling is sold at EUR 19.00 per kg, the one coming from line fishing even higher at EUR 25.00 per kg, while the same sized fish coming from aquaculture sells at EUR 11.50 per kg. For seabream the price difference is less pronounced: wild seabream sells at EUR 19.00 per kg which compares to EUR 12.50 per kg for the cultured seabream.

Overall prices of cultured seabass from Greece stayed stable in June 2023, while seabream showed decreases for the smaller sizes and increases for the larger specimens. This is mainly caused by demand from restaurants, where during the holidays season seabass and seabream are a prominent feature on the menus and where the bigger sizes are more demanded.
