NEWS

New subscription on two e-journals from SAGE

The library has reached an agreement with the publisher SAGE to access the following two e-journals:

Outlook on Agriculture: Peer-reviewed journal containing reviews and perspectives on current developments in agricultural science and associated disciplines for an international and interdisciplinary readership. Access from 1998 onwards

Food and Nutrition Bulletin: Peer-reviewed, academic journal related to nutrition in developing countries. The FNB publishes articles by researchers from around the world that explore critical nutrition issues and potential solutions that developing countries face: undernutrition, malnutrition, nutrient bioavailability, food safety and more. Access from 1998 onwards.

We aim to add more SAGE content in 2024.

Call for interest in Devex trial

The Library is planning to set-up a trial in September on Devex, an independent news organization for the global development community. The trial will consist of one week free access to the Devex platform. The maximum number of people per trail is 10. If you are interested in participating, send us an e-mail at fao-library-reference@fao.org and we will add you to the list.

DATA CORNER

In which journals do FAO authors outperform the average journal citation rate?

Journals are ranked by Journal Normalized Citation Impact. The graph below identifies the top five journals where FAO is having the most impact with respect to other documents published in the journal.

FAO Library provides access to InCites Analytics, a bibliometric analysis tool based on data from the Web of Science. Every month, we will provide an example of the type of analysis available using this tool. If you already have an account for Web of Science, use those same credentials to access the InCites tool. Further information is available in the Help file. Training material (videos, guides, manuals) is available via the Training portal.

ARTICLES BY FAO AUTHORS

The following list provides an overview of the latest journal articles and some other document types (editorial material, letters, book chapters and conference proceedings) (co)written by authors affiliated with FAO. The main source of information is the Web of Science (WoS), the world’s largest publisher-neutral abstract and citation platform of leading peer-reviewed international and regional scientific literature. FAO Style (2023) is used as the citation style.

Are you planning to publish an article? Please ensure that you are familiar with FAO’s Open Access policy, as well as OCC policies and procedures for publishing FAO content in external publications. Please contact Copyright@fao.org before publishing articles externally. Copyright will negotiate a license agreement on your behalf, to ensure FAO retains the right to disseminate the content.

Did you recently publish an article? Please send the file to document-repository@fao.org and the citation to fao-library-reference@fao.org and we will add the article to the Library’s newsletter.
