1 Introduction	1
1.1 Background	1
1.2 Why was this manual prepared?	1
1.3 What does this manual provide?	2
1.4 How should you use this manual?	2
1.5 How was this manual prepared?	3
2 Concepts and purpose of KAP surveys	4
2.1 Terminology	4
2.2 Purpose	5
Situation analysis for intervention planning	5
Outcome evaluation	6
2.3 Key indicators: knowledge, attitudes and practices	8
Knowledge	8
Attitudes	10
Practices	18
3 Planning and conducting KAP surveys	27
3.1 Activities to undertake before conducting a KAP survey	27
Designing the survey questionnaire	27
Translating the survey questionnaire	38
Training the surveyors	39
Pre-testing the survey questionnaire	42
Sampling the survey population	45
3.2 Collecting data: procedures for administering the survey questionnaire	47
4 Analysing the data and reporting the results	52
4.1 Cleaning and entering the data	52
4.2 Analysing and using the results	53
Sociodemographic characteristics	53
Situation analysis for intervention planning	53
Outcome evaluation	56
4.3 Putting the results into context	57
4.4 Reporting the results	60
References	64

Appendixes	69
Appendix 1: Visual support to measure attitudes	69
Appendix 2: Readiness to change	70
Appendix 3: Informed consent form and sociodemographic questionnaire for caregivers of infants and young children (0–6 months and 6–23 months)	71
Appendix 4: Informed consent form and sociodemographic questionnaire for school-aged children	74
Appendix 5: Informed consent form and sociodemographic questionnaire for adults (> 18 years)	76
Appendix 6: Nutrition-related KAP model questionnaires	78
Module 1: Feeding infants (0–6 months)	78
Module 2: Feeding young children (6–23 months)	89
Module 3: Diet of school-aged children	100
Module 4: Nutrition during pregnancy and lactation	107
Module 5: Undernutrition	113
Module 6: Iron-deficiency anaemia	118
Module 7: Vitamin A deficiency	129
Module 8: Iodine deficiency	137
Module 9: Food safety	142
Module 10: Personal hygiene	149
Module 11: Water and sanitation	155
Module 12: Food-based dietary guidelines	161
Module 13: Overweight and obesity	167
Appendix 7: Examples of possible nutrition strategies for low KAP indicators	175
Appendix 8: Qualitative methods – basic information on data collection and analysis	178

Tables

Table 1: Examples of short-, medium- and long-term outcomes of nutrition interventions that include an educational component	7
Table 2: Health and nutrition-related attitudes	18
Table 3: Approaches used to measure dietary diversity, intake of specific foods, frequency of intake of specific foods and specific observable behaviours and the purposes for which they are used	25
Table 4: Overview of general and nutrition-related characteristics of children of three age categories	33
Table 5: Suggested threshold levels indicating the need for a nutrition-education intervention	54
Table 6: Factors that affect the results of a survey or study used in a situation analysis or outcome evaluation	58
Table 7: Sampling strategies and their impact on interpretation of survey data	59

Figures

Figure 1: Situation analysis and outcome evaluation	5
Figure 2: Guatemala Food Guide	15
Figure 3: Flowchart for defining survey objectives, survey population and selecting topics to cover for an outcome evaluation	29
Figure 4: Social, environmental and intrapersonal factors affecting practices	56

Boxes

Box 1: Attitudes – three or five-point scale?	12
Box 2: Measuring infant and young-child feeding practices	20
Box 3: Tips for selecting interviewers	39
Box 4: Pre-testing debriefing: points to check with surveyors	45
Box 5: Planning a KAP survey: summary	46
Box 6: Limitation of KAP surveys	51

Acronyms

DDS	Dietary diversity score
FBDG	Food-based dietary guidelines
FFQ	Food frequency questionnaire
KAP	Knowledge, attitudes and practices
UNICEF	United Nations Children’s Fund
WHO	World Health Organization

Acknowledgements

The authors are grateful to all of those who contributed to the development of this manual.

Many people reviewed the first draft of the model questionnaires presented in Appendix 6, including Catherine Bessy (FAO Headquarters), Lalita Bhattacharjee (FAO Bangladesh), Florence Tonnoir (FAO Gabon), Shubhada Kanani (Network for Nutrition Awareness and Advocacy [NETNAA] India) and Pauline Samuda (Caribbean Food and Nutrition Institute, University of the West Indies, Jamaica). Their comments and suggestions contributed to improving the questionnaires.

The questionnaires were field-tested and validated in several countries; Delhi Anahí Trejo Hernández, Graciela Raya Giorguli, Estela Herrera Martignon, Jenifer Guerrero Morales and Elia Irene Corzo Nájera from the PESA Programme (Programa Especial para la Seguridad Alimentaria) in Mexico; Ana Elizabeth Hernández Marroquin, Cindy Elena and Rose Marie Rivas in El Salvador; Solange Heise in Malawi; and Yvette Fautsch Macías in Cambodia. These nutritionists trained and supervised enumerators, reported the results and modified the questionnaires accordingly. This process ensured that the questionnaires were valid, readable, easy to administer and were not burdensome for respondents. The guidelines also benefited greatly from lessons learned from the field-testing experience and the authors thank all those involved. Special thanks go to lean Russell and the FAO staff in Cambodia for providing the facilities to conduct the field tests in that country.

Within FAO, Carmen Dardano, Jane Sherman, Gina Kennedy, Theresa Jeremias and Warren Lee provided very useful practical advice on both the guidelines and the questionnaires at various stages of the manual's development. Ellen Muehlhoff reviewed and approved the final version.

The final document was edited by Paul Neate and designed and laid out by Joanne Morgante.
