

GLOBAL AGENDA FOR  
SUSTAINABLE LIVESTOCK

SUSTAINABLE LIVESTOCK  
*for people, for the planet*

# LIVESTOCK IN DEVELOPMENT

In decades to come, the demand for livestock products is expected to grow significantly driven by rising affluence, urbanization and an increasing global population estimated to reach 9.6 billion by 2050.

Consumption of food from livestock is projected to increase by 70 percent during the period.

Livestock sector policies and investments need to simultaneously address the vast diversity of livestock systems and the different demands and expectations placed by society on the sector.

## FOR GLOBAL FOOD SECURITY AND HEALTH

Livestock are critical to maintaining and improving human health. Livestock products are an important component in healthy diets, and provide food security particularly for low income people. Livestock connect wildlife and environmental health to human health, and are an important element in disease emergence and transmission. Seventy percent of all new diseases have their origins in animals.

## IN TACKLING POVERTY

No other sector is more important to the lives and livelihoods of the poor than livestock. An estimated 1 billion people derive at least part of their livelihood from livestock. Livestock are the last resort for people that lack other assets and forms of income.

## AND TO ADDRESS ENVIRONMENTAL ISSUES

Livestock are an important user of natural resources (land, water, nutrients, and biodiversity) and contributor to climate change. Livestock convert large amounts of by-products and waste material, for which there is no alternative use, into valuable products.

# ADDRESSING ALL FACETS OF SUSTAINABILITY

The partnership simultaneously addresses the social, environmental, and economic dimensions of livestock sector growth.

## **GLOBAL FOOD SECURITY AND HEALTH**

The sector is critical to human health and global food and nutritional security. The Agenda promotes an inclusive approach to managing disease threats at the animal-human-environment interface that involves all sector stakeholders at every level in the development and implementation of animal-disease and food-safety programmes.

## **EQUITY AND GROWTH**

Livestock is essential to the livelihoods of an estimated one billion poor. The Agenda supports a viable growth in value chains that have access to all necessary resources and services, and in which the poor can find secure livelihoods and participate in growing markets or take up other opportunities outside the sector.

## **RESOURCES AND CLIMATE**

The Agenda promotes livestock production based mainly on materials not competing with direct use as human food. It supports environmental stewardship through incentives and rewards to allow the sector to transition to existing and new resource use efficient ways of production and a greater contribution to climate change mitigation.

# SHARE KNOWLEDGE, DEVELOP ENABLING ENVIRONMENTS

The Agenda partnership conducts the following joint activities:

## **FACILITATE MULTI-STAKEHOLDER DIALOGUE AT INTERNATIONAL, NATIONAL AND LOCAL LEVEL**

- Stimulate multi-stakeholder interaction and sharing of knowledge
- Build consensus on priority issues and actions

## **IMPLEMENT AND SUPPORT JOINT ANALYSES AND ASSESSMENTS**

- Conduct analyses to enhance joint understanding on livestock sector sustainability
- Develop harmonized metrics and methodologies
- Identify entry points for sector improvement
- Provide strategic sector guidance
- Inform inter-governmental and other partnership processes
- Work towards policy and operational coherence

## **PROMOTE AND SUPPORT INNOVATION AND LOCAL PRACTICE CHANGE**

- Catalyze innovation and investment in sustainable sector development

## CURRENT AGENDA PARTNERS:

African Union – Inter-African Bureau for Animal resources

Agri benchmark, Germany

AgResearch, New Zealand

Animal Task Force, European Union

Association pour la Promotion de l'Élevage au Sahel et en Savane

ATB, Leibniz Institute for Agricultural Engineering Potsdam-Bornim

Beijing Environmental Asset Management Consultancy Centre, China

Bern University of Applied Sciences, Switzerland

The Canadian Cattlemen's Association

Centre de coopération internationale en recherche agronomique pour le développement, France

Compassion in World Farming, United Kingdom

European Livestock and Meat Trading Union

Food and Agriculture Organization of the United Nations

GIZ, Deutsche Gesellschaft für Internationale Zusammenarbeit, Germany

Global Initiatives

Global Roundtable for Sustainable Beef

Inter Eco Center, Ukraine

International Dairy Federation

Humane Society International

International Egg Commission

International Feed Industry Federation

International Livestock Research Institute

Institut National de la Recherche Agronomique, France

Institut de l'Élevage, France

Instituto Plan Agropecuario, Uruguay

International Meat Secretariat

League for Pastoral Peoples and Endogenous Livestock Development

LIFE Network, South Asia

Livestock Farming and Local Development (LIFLORD)

Ministry for Primary Industries, New Zealand

Ministry of Economic Affairs, The Netherlands

National Institute of Animal Husbandry, Vietnam

The Nature Conservancy

Novus International, United States of America

Ranch 4 International Ltd, Canada

Society of Animal, Veterinary and Environmental Scientists, Pakistan

Savory Institute, United States of America

Swedish University of Agricultural Sciences

Swiss federal Office for Agriculture

TAFS Forum, Switzerland

Turkey farmers of Canada

Universidade Federal de São João del-Rei, Brasil

Van Drie Group

VetEffect

World Society for the Protection of Animals
