Executive summary

The Committee on Constitutional and Legal Matters (CCLM) and the Programme Committee (PC) bring to the attention of the Council its findings on:

The Concept Note in relation to the types of FAO products and the means for their development, which illustrates the development process followed with respect to non-exhaustive types of recent FAO products. The Note has categorized the FAO products according to:

a) their substantive contents and defining characteristics;
b) the actors consulted in the review process and those ultimately responsible for their development, and where appropriate, approval; and
c) the legal basis and criteria set out in the Basic Texts.

Suggested action by the Committee on Constitutional and Legal Matters, the Programme Committee and the Council

The Council is invited to take note of the findings of the CCLM and the Programme Committee.

Queries on the substantive content of this document may be addressed to:

Annick VanHoutte

NI327/e
I. Introduction

1. At its 168th Session in December 2021, the Council “took note of the CCLM recommendation against the elaboration of a formal standardization procedure for FAO policies, voluntary guidelines, strategies, and action plans, noting the complexity of a standardization exercise, given the broad range and volume of products that the Organization develops”. The Council “invited the Secretariat to prepare a concept note for Members’ analysis in relation to the types of FAO products and the means for their development, and looked forward to further discussion at the next Sessions of the Programme Committee and the CCLM, within their respective mandates”.

2. This matter is referred to the Committee on Constitutional and Legal Matters (CCLM) and the Programme Committee respectively under Rules XXXIV (8) and XXVI (7) (d) of the General Rules of the Organization (GRO), pursuant to which they may “consider the legal and constitutional aspect of any other matters submitted to it by the Council or the Director-General” and “any other matter submitted to it by the Council or the Director-General”.

II. The types of FAO products and instruments, and the means for their development

3. As reflected in CCLM document 113/2, the Basic Texts do not identify every type of FAO product, nor how they may be developed and, where appropriate, approved. In the absence of these explicit provisions, the process for the development of FAO products has been guided by the functions and mandates in the Basic Texts assigned respectively to the Governing Bodies, Statutory Bodies, and the Director-General.

4. Further to the request of the Council, a detailed review of past practice was undertaken. This note offers illustrative, non-exhaustive guidance on past practice. It does not seek to define how the Basic Texts should be interpreted or applied. The review confirmed that, while the Basic Texts have been followed, varied procedures have been applied in the past for the elaboration and approval of products that may have been similar in nature.

5. The table in Annex I draws on the detailed review, and compares recent FAO products and categorizes: (i) their substantive contents and defining characteristics; (ii) the actors consulted in the review process and those ultimately responsible for their development, and where appropriate, approval; and (iii) the legal basis and criteria set out in the Basic Texts. The text below seeks to summarize the conclusions drawn from the table set out in Annex I. It is recommended, nevertheless, that the inherent flexibility found in the Basic Texts should be retained given the wide variety of products developed, and which could be developed in future, by the Organization as a knowledge-based specialized agency of the United Nations.

   A. Overarching governance and regulatory frameworks, including treaties and instruments establishing Statutory Bodies with global coverage

6. Global or cross-cutting policies and strategies and international regulatory frameworks, including treaties and instruments establishing Statutory Bodies with global coverage, must be submitted to the Conference for approval or endorsement. These products are normally first reviewed by the relevant Technical Committee(s) and are submitted to the appropriate Council Committee(s) and Council where they have programmatic, financial, or legal implications for the Organization. For

---

1 CL 168/REP, paragraph 30 (a).
2 Ibid.
3 CCLM 113/2, Section IV, paragraphs 25-32.
4 Constitution, Article XIV (1) and Resolution No. 7/2009 of the Thirty-sixth Session of the Conference, paragraph 2, which emphasizes the Conference’s role with respect to global policy issues and international regulatory frameworks.
example, treaties and instruments establishing Statutory Bodies have a legal component and are thus reviewed by the CCLM, following consultations by the relevant Technical Committee.  

7. The level of approval or endorsement required from the Conference depends on the specific type of FAO product concerned. For instance, the Basic Texts prescribe that the text of international treaties must be approved by the Conference, through Resolution, and those regulatory recommendations made to Members with a view to implementation by national action are adopted by Conference Resolution. Similarly, the practice has been to approve constituent instruments establishing Statutory Bodies with global coverage, including amendments to them, through Conference Resolution.

8. By contrast, normative guidelines developed by the Technical Committees concerning policy and regulatory matters are reported to the Conference for its endorsement or approval. Generally, normative instruments that have been reviewed by the relevant Council Committee(s) and Council are submitted to the Conference for endorsement only, while others that are submitted directly by the Technical Committee(s) are adopted by the Conference.

9. The Conference may also take governance decisions that specifically delegate matters to the Council as the executive organ acting on its behalf between Sessions of the Conference. These decisions normally relate to the implementation of global or cross-cutting policies and strategies between Sessions of the Conference, and, in such instances, the Council is assisted by the relevant Technical Committee(s) and Council Committee(s), as appropriate.

B. Regional treaties and instruments establishing Statutory Bodies with regional coverage, strategies related to programmatic or budgetary matters

10. The Basis Texts provide that treaties specific to a determined geographical area are approved by the Council, through Resolution, following prior review by the relevant Technical Committee(s) and Council Committee(s), as appropriate. Regional treaties and amendments to them are reviewed by the CCLM in view of their legal implications, following review by relevant Technical Committees. Once approved by the Council, they are reported to the Conference. Moreover, any constituent instrument of regional bodies, as well as amendments to such instruments, are approved through Council Resolution, after review by the CCLM and other Council and Technical Committees, as appropriate.

11. In addition, in view of the Council’s major role in defining strategies and priorities and establishing the budget of the Organization, the Conference may specifically delegate to the Council the final approval of strategies, policies or action plans calling for action by Members and other stakeholders having programmatic and budgetary implications for FAO. Normally, such instruments are first reviewed by the relevant Technical Committee(s), followed by the Programme Committee and/or Finance Committee.

8 GRO, Rule XXXIV, paragraph 7 (b) and (e).
9 Constitution, Article XIV (1); and GRO, Rule XXI (1) (c) (i).
10 Constitution, Article IV (3); and GRO, Rule II (2) (c) (i).
11 GRO, Rule II (c) (xii).
12 GRO, Rule II (c).
13 See for example the Voluntary Code of Conduct for Food Loss and Waste Reduction (FLW).
14 See for example the Voluntary Guidelines for Catch Documentation Schemes (VGCDS).
15 GRO, Rule XXIV (1) (c).
16 GRO, Rule XXIV.
17 GRO, Rule XXXIV, paragraph 7 (e).
18 Volume II, Section D of the Basic Texts, Implementation of the IPA regarding the Council; Resolution 8/2009 of the Thirty-sixth Session of the Conference.
19 Constitution, Article V (3).
12. Overall, the Council’s review and, where appropriate, approval of products depend on their specific purpose. As mentioned above, the Council may approve FAO products to specifically implement governance decisions taken by the Conference, approve strategies to facilitate the implementation of the Organization’s core functions,\textsuperscript{20} such as the FAO Strategy for Private Sector Engagement, or establish global policy frameworks to guide the Organization’s programmatic work concerning the world food and agriculture situation and related matters, particularly those of an urgent nature and which call for action.\textsuperscript{21}

C. Voluntary guidelines, principles and strategies developed by the Committee on World Food Security (CFS)

13. In view of its particular status as a \textit{sui generis} intergovernmental Committee established under the FAO Constitution,\textsuperscript{22} the CFS is mandated to assist the Conference\textsuperscript{23} and to develop and endorse international strategies and voluntary guidelines on food security and nutrition and other public goods.\textsuperscript{24}

14. Products developed by the CFS are normally reported to the Conference and the United Nations General Assembly through the Economic and Social Council.\textsuperscript{25} For example, the recent Voluntary Guidelines on Food Systems and Nutrition (VGFSyN) were endorsed by the CFS and at its 42nd Session, the Conference subsequently endorsed the Reports of the 46th and 47th Sessions of the CFS, and in particular, welcomed the approval of the VGFSyN and encouraged the use of CFS agreed policy instruments by all stakeholders.\textsuperscript{26}

D. Recommendations and international standards, guidelines and codes of practice by Statutory Bodies

15. The type of product developed by Statutory Bodies and the ultimate actor responsible for the endorsement, or approval, of such products depend on the legal framework of each body, as reflected in their terms of reference or statutes.

16. Statutory Bodies established under Article VI of the FAO Constitution normally have advisory functions and thus develop non-binding products and instruments – such as recommendations, studies, or reports – that address specific subject-matters within the context of their respective mandates and functions, as determined by the Conference or the Council. For example, Article VI Bodies with a regional mandate submit their products for discussion to the concerned Regional Conference and relevant Technical Committee(s). The final endorsement of these recommendations or other products depends on the terms of reference and rules of procedure of the body concerned, bearing in mind that recommendations having policy, programme and financial implications, are generally submitted to the Conference or Council, as appropriate.

17. By contrast, the constituent instruments of Article VI Bodies with a global mandate may vest them with competence to adopt international or regional standards, guidelines and codes of practice within their areas of competence. These products are adopted by the relevant Article VI Body as non-binding voluntary instruments, until adopted by national legislation.\textsuperscript{27} However, any recommendations made by these Article VI Bodies must nevertheless be referred to the Conference or

\textsuperscript{20} FAO Strategic Framework 2022-31, paragraph 43.
\textsuperscript{21} GRO, Rule XXIV (1) (b).
\textsuperscript{22} The composition and terms of reference of the CFS are governed by rules adopted by the Conference (GRO, Rule XXXIII (8) refers).
\textsuperscript{23} Constitution, Article III (9).
\textsuperscript{24} GRO, Rule XXXIII (9) (b); see also CCLM 113/2, paragraph 18.
\textsuperscript{25} CFS Rules of Procedure, Rule X (1) (CFS:2011/9 Rev.1); GRO, Rules XXXIII (16) and XXXIII (17).
\textsuperscript{26} C 2021/REP, paragraph 55.
\textsuperscript{27} For example, Codex Standards are adopted by the Codex Alimentarius Commission pursuant to Rule XII of the Rules of Procedure and the Procedures for the Elaboration of Codex Standards and Related Texts.
Council, as appropriate, and their reports should be circulated to Members, through the Director-General.\textsuperscript{28}

18. On the other hand, as per their respective treaty texts, Article XIV Bodies are vested with functional autonomy within the Organization’s legal framework and may thus develop and adopt products, such as international standards, guidelines and recommendations. In accordance with the applicable treaty and rules of procedure of the respective Article XIV Body, these products may become binding on Members once enshrined in their legislation\textsuperscript{29} or given effect by contracting parties to the treaty concerned.\textsuperscript{30} That said, the relevant constituent instruments of Article XIV Bodies normally provide that recommendations having programme or financial implications for FAO must be transmitted to the Director-General for the attention of the Conference, or Council, as appropriate.\textsuperscript{31}

\textbf{E. Internal administrative products, management tools, annual reports and flagship publications}

19. Under the authority of the Director-General to direct the work of the Organization, subject to the general supervision of the Conference and Council,\textsuperscript{32} the Secretariat has the competence to develop a wide variety of FAO products.

20. For example, the Secretariat may develop products that offer technical guidance to Members and other stakeholders supporting the implementation of products adopted by the Governing Bodies. Similarly, within the Director-General’s responsibility to carry out the decisions of the Conference and Council, and to guide the internal administration of the Organization, the Secretariat may develop strategies, policies and action plans regulating FAO’s implementation of the Members’ priorities as endorsed in other products. The above-mentioned products are not submitted to the Governing Bodies for endorsement; however they may be the subject of briefings for the Governing Bodies and/or Members, or submitted to the Governing Bodies as information on FAO’s activities to deliver Members’ priorities and Governing Bodies decisions.

21. Further, the Secretariat develops the Annual Report on the State of Food and Agriculture and the flagship technical publications of the Organization within the authority of the specific functions prescribed to the Director-General under the GRO.\textsuperscript{33} The Director-General transmits the Annual Report to the Conference to support the deliberations of its regular sessions\textsuperscript{34} and is responsible for publishing and communicating the flagship technical publications to the Members and Associate Members.

22. In addition, the Director-General is the ultimate actor responsible for the issuance of rules, policies and administrative issuances governing terms of employment, activities and conduct of employees.\textsuperscript{35} Normally, such products follow an internal consultation process in accordance with the relevant rules and procedures, including with recognized staff representative bodies, as appropriate. It is relevant to note, however, that the Director-General has the authority to promulgate Staff Regulations only with the approval of the Council,\textsuperscript{36} and thus, any amendments to the Staff Regulations require the final endorsement of the Council, following a review by the CCLM in view of the legal component.

\textbf{III. Summary of findings}

\textsuperscript{28}For example, Article 5 of the Statutes of the Codex Alimentarius Commission.
\textsuperscript{29}For example, the International Standards for Phytosanitary Measures of the International Plant Protection Convention.
\textsuperscript{30}For example, the General Fisheries Commission for the Mediterranean (GFCM) or Indian Ocean Tuna Commission (IOTC).
\textsuperscript{31}For example, Article XV of the GFCM Rules of Procedure or Rule VIII of the Rules of Procedure of the Commission of the Phytosanitary Measures.
\textsuperscript{32}Constitution, Article VII (4); and GRO, Rule XXXVIII (1).
\textsuperscript{33}GRO, Rules II (2) (c) (i), XXXVIII (2) (c) and (i), and XXXVIII (1).
\textsuperscript{34}GRO, Rules II (2) (c) (i) and XXXVIII (2) (i).
\textsuperscript{35}GRO, Rule XXXVIII (2) (a).
\textsuperscript{36}GRO, Rule XL (4).
23. As mentioned above, the table annexed to this note is not exhaustive in view of the broad range and volume of FAO products, and instead identifies processes for the various types of products that could serve as guidance to Members. However, it is recommended that such guidance be treated as informal and non-restrictive as this may not be able to address every type of product to be developed by the Organization in due course.

24. Consequently, the methodology utilized in this concept note is not an exclusive interpretation of how the Basic Texts should be applied, but rather an effort to offer guidance on how FAO products may be categorized with due regard to the existing practices of the Organization. Nevertheless, the Basic Texts should, in all instances, serve as the primary reference point for the development of all FAO products.

25. Indeed, a detailed review of the longstanding practice of the Organization has reflected that, while adhering to the Basic Texts, differing processes may have been applied to similar products. This emphasizes the importance of focusing on the substantive contents and characteristics of FAO products – not their title or use of FAO nomenclature – and reaffirms the Committee’s findings concerning the complexity of a standardization process applicable to the development of all FAO products.

IV. **Suggested action by the Committee on Constitutional and Legal Matters, the Programme Committee and the Council**

26. The Committees and the Council are invited to review this document, to make observations and provide guidance, as deemed appropriate.
## Annex I

### Concept Note in relation to the types of FAO products and the means for their development
