CONFERENCE

Twenty-eighth Session

Rome, 20 October - 2 November 1995

LIST OF 1996-97 SCHEDULED SESSIONS AND SELECTED PUBLICATIONS

1. This supplement to the Programme of Work and Budget includes a list of scheduled sessions for 1996-97 (List A) and a list of selected publications, main documents and major working papers (List B). This document should be seen as a complement to the more comprehensive listing of "outputs" (including Meetings and Publications) under each programme element in the *Programme Budget* section of the main document. Some variations between the sessions and selected publications in this supplement and the *Main Outputs* selected for specific mention in the Programme of Work and Budget narratives will be noted. However, for statutory reporting purposes, this supplement will serve as the official list of scheduled sessions and selected publications, as done hitherto.

LIST A - SCHEDULED SESSIONS

2. This gives information, in sub-programme sequence, on all Regular Programme-funded sessions scheduled for the 1996-97 biennium, with details of the session number, the title of the session, the Article of Constitution under which the session is convened, the category, languages and attendance. The estimated direct cost of each session is also supplied. Direct costs comprise salaries, per diem and travel of temporary staff, staff interpreters and operators, hospitality and local operating expenses. For sessions pertaining to Technical and Economic Programmes, the programme element (PE) number is also given so as to provide an easy reference to the description of outputs in the *Programme Budget* section of the Programme of Work and Budget 1996-97 document.

3. The division/session number includes the symbol of the responsible division or Regional/Subregional Office and, where responsibility for sessions is being decentralized or meeting are jointly organized, both the HQ division and the Regional/Subregional Office is indicated. Sessions are identified by three-digit numbers according to the following criteria:

For reasons of economy, this document is produced in a limited number of copies. Delegates and observers are kindly requested to bring it to the meetings and to refrain from asking for additional copies, unless strictly indispensable.

Session Numbers	Description
Numbers from 700-799	These numbers are allocated to Statutory Bodies and their subsidiaries. The numbering of the sessions of the same body is represented by an additional figure separated by a hyphen.
Numbers from 900-999	These numbers are given to intercountry training courses, seminars, workshops, study tours and other group-training activities. Recurring courses or seminars are identified by an additional figure separated by a hyphen.
Numbers from 800-899	These numbers are given to all other sessions (including <i>ad hoc</i> activities) which do not fall within the 700 or 900 series.

4. The four categories defining the type of session are as follows:

Category	Description
Cat. 1	Intergovernmental meetings to which Member Governments send official delegations. These include sessions of the Conference and Council, of subsidiary bodies of the Council and of the bodies established under the Constitution, and also a considerable portion of the <i>ad hoc</i> meetings convened on technical and economic matters wherein policy matters are involved. Such meetings may also be attended by observers from Member Nations, non-Member Nations, and international intergovernmental and international non-governmental organizations having established relations with FAO, in accordance with the General Rules of the Organization and with the "Principles" set out in Volume II of the <u>Basic Texts</u> . Consultants may be used by FAO in such meetings to assist the secretariat in various ways, including the introduction of agenda items.
Cat. 2	Meetings to deal with technical and/or economic matters attended by experts designated by Member Governments and by observers as listed under Category 1 above, where the participants would not be expected to take decisions on behalf of the governments having designated them. Suitable arrangements may be worked out, in consultation with governments, for participation by representatives of national institutions, including para-statal and private institutions. Consultants may be used by FAO in such meetings to assist the secretariat in various ways, including the introduction of agenda items.
Cat. 3	Sessions of panels, committees and working parties of experts, composed of individuals selected by FAO in their personal capacity, and who normally participate at FAO expense.
Cat. 4	Seminars, training courses, workshops and other group-training activities, attended primarily by government-designated experts selected by the Director-General and participating at FAO expense.

5. The type of attendance in the table is defined as follows:

Code	Description
GOV	Government representatives (for Category 1 meetings) and Government experts designated by FAO Member Nations (for Category 2 meetings)
ISE	Individual experts serving in a personal capacity
GDE	Government designated experts

6. There are 316 sessions included in the list. The direct cost of these meetings, at 1994-95 rates, amounts to US\$9 718 000. Of this, an estimated US\$4 426 000 (for sessions of the Conference, Regional Conferences, the Council and its subsidiary bodies) is budgeted under Programme 1.1.1: Conference and Council. Direct costs of other meetings are estimated to be US\$5 292 000. Budgets for the direct meeting expenses of these latter meetings is shown as a separate budget component in the tables in Annex II - Summary by Organizational Unit and Budget Component of the Programme of Work and Budget 1996-97 and total US\$5 143 000 at 1994-95 rates. Thus, overprogramming of meetings resources for the biennium is less than 3 percent.

LIST B - PUBLICATIONS, MAIN DOCUMENTS AND MAJOR WORKING PAPERS

7. This list gives information on selected Regular Programme funded publications, main documents and important working papers which are planned for release in the 1996-97 biennium. For publications pertaining to Technical and Economic Programmes, the programme element number is also given so as to provide an easy reference to the description of outputs in the *Programme Budget* section of the Programme of Work and Budget 1996-97.
8. The cost of each publication in the list is based on estimates of factors such as the anticipated length of the document, its physical presentation, the number of languages in which it is to appear and the number of copies to be printed. The resulting costs cover charges for translation, revision, editing, proofreading, composition, printing, distribution and other operations performed by the Publications Division. The estimates exclude authorship costs.
9. The estimated cost to the Regular Programme of the listed publications is US\$16 646 000 at 1994-95 rates.
10. The entire Regular Programme publications and documents programme for 1996-97 is estimated at US\$31 595 000 at 1994-95 rates, as shown in Annex II of the Programme of Work and Budget 1996-97. The difference between the cost of the selected publications listed in this supplement and the total publications budget for 1996-97 is largely attributable to the documentation cost of Regular Programme meetings in List A (US\$ 10 200 000). The remainder is ascribed to Circular State Letters, miscellaneous working papers and information materials.
11. In the following list, languages are identified by the symbols shown below:

A = Arabic	P = Portuguese
C = Chinese	B = Bilingual document
E = English	T = Trilingual document
F = French	Q = Four-language document
G = German	R = Five-language document
I = Italian	

Extra-budgetary allocations may be available to cover additional translation costs.

12. The categories of the respective publications are indicated by the following abbreviations:

- P =** **Priced publications** - The material is chosen for issue in this form because of its permanent character, special importance or value to widespread readership. Recipients comprise all Member Governments; selected technicians and specialists; FAO depository libraries; the United Nations, other organizations in the United Nations family, and other international organizations and - usually by sale - other interested organizations and individual members of the public. Priced publications are normally typeset.
- M =** **Main documents** - Non-sales documents, the content of which is final, issued under the authority of FAO, in the languages constitutionally required. Main documents are primarily intended for one, several or all Member Governments, and/or for technicians, specialists and institutes, for delegates and participants at the relevant FAO conferences and sessions, for the United Nations, other organizations in the United Nations family, other international organizations as applicable, and for FAO depository libraries. Main documents may also be made available to other categories on specific request, either free or against a handling charge. This material is normally printed from camera-ready copy in limited print-runs.

W = Working papers for meetings - Papers intended primarily for participants at meetings or individuals directly concerned, as a basis for consideration, discussion, study and action, or for their information.

C = Computerized information series - This category covers machine-readable products (normally diskettes or CD-ROMs). Its creation reflects the recent growth of such products in FAO. The series contains specifically those programmes and applications that include a manual as part of a software package. This is not to be confused with a priced publication or main document that might happen to have a diskette or two supplied as additional material.

D = Document - This covers all documents that do not fit into the above categories. Essentially these are non-meeting documents whose substance is either not final, not the official position of the FAO or pertains to matters of a transient nature and which is generally for short-term information, discussion or reference.

I = Information material - Information material is printed matter intended primarily for broad distribution to the public or to the communications media in order to provide information on the Organization, its purpose, its programmes, etc., or to inform the public of new developments related to its operations. The category includes posters, bulletins, booklets, leaflets and folders for the information of the general public and news releases and features. Information material is issued in a variety of presentations depending upon the audience to be reached and the urgency of publication.

13. These categories have been further broken down into sub-categories as follows:

P/1	Periodicals	M/1	Technical papers and main documents (A4 size)
P/2	Yearbooks	M/2	Technical papers and main documents (A5 size)
P/3	Monographs	M/3	Major reports of meetings
P/4	Training materials	M/6	Bibliographies and terminology bulletins
P/5	Grassroots/intermediate-level materials	M/5	Directories
		M/6	External newsletters/periodicals
W/1	Preparatory papers	I/1	Information books
W/2	Special preparatory papers	I/2	Leaflets
W/3	In-session papers	I/3	Posters
W/4	Meeting reports	I/4	Press releases
D/1	Documents	C/1	Computerized information series - diskette
D/2	Special documents	C/2	CD-ROM
D/3	In-house newsletters/periodicals		
D/4	Speeches		
D/5	Vacancy announcements, Administrative Circulars, DG Bulletins		
D/6	Attachments to Circular State Letters		
D/7	Photo Reproduction
