

... objectives  
... understanding of the  
... shape changes in the  
... processes in the fishing  
... To share information about  
... approaches to self-regulation  
... have been implemented in different  
... countries...

... fishermen themselves help  
... management, a high rate of  
... can be expected.

... In a close-knit fishing  
... community, social  
... sanctions are far more  
... effective than legal  
... sanctions.

... When fishermen  
... themselves help design  
... management, a high rate of  
... can be expected.

... Giving citizens pride of place and putting them  
... stage of management, with government managers  
... from the sidelines, will go a long way toward  
... promoting community management of local fisheries.

... Governments should go all out to reduce  
... fishing capacity - by attracting capital  
... away from fishing, by finding alternative  
... employment for fisherfolk, and curbing  
... the fresh entry of fishing boats and  
... fisherfolk.

... Giving citizens pride of place and putting  
... them at the centre-stage of management,  
... with government managers watching them  
... from the sidelines, will go a long way toward  
... promoting community management of local  
... fisheries.

... Sustainable development is a multi-  
... faceted concept with biological,  
... and technological dimensions.

... Sustainable development is a multi-  
... faceted concept with biological, human  
... and technological dimensions.

... The workshop's objectives were to  
... an understanding of the global  
... shape changes in the  
... fishing industry... To share information  
... about innovative approaches to self-  
... regulation which have been implemented in  
... different countries.

... Giving citizens pride of place
